Previously, a preliminary survey of retardation consisted of a comparison of the chronological ages of the pupils in a class with the ages given in Form A. C. 7. Pupils who were severely retarded were listed and in the actual survey were given an individual intelligence examination. It appears that when a preliminary survey consists of (1) the administration of group intelligence and achievement tests and (2) a listing of pupils who show retardation chronologically, the number of pupils selected for individual examinations is almost doubled. In that part of the survey which follows, the pupils who have difficulty with one subject only are examined individually as well as those who are retarded in all subjects.

Remedial Teaching by a teacher who is specially skilled in the arts of adjusting pupils who have failed in arithmetic and reading is being used to an increasing extent. The child is given the help he requires at the time it is most readily received. He is enrolled in a regular grade class, but is also included in a small group which meets daily under a special teacher for periods of remedial instruction. Under this plan, many pupils are not required to spend two years in a grade.

In some cases, principals select pupils for remedial or corrective teaching, when it is evident that the pupil cannot progress at the normal rate and is in need of a slower learning programme. This shows that there is still some confusion as to the type of pupil who should be given remedial or adjustment teaching.

### Rural Organization

Opportunity, Speech Correction, Sight Saving and Home Instruction units may be organized by a school board in areas where the number of pupils is insufficient to form a class. Units are usually organized following a survey of a school or inspectorate conducted by the Inspectors of Auxiliary Classes with the assistance of the public or separate school inspector concerned and the teaching and nursing staffs. Special advisements for each pupil are prepared in the Auxiliary Education Branch and forwarded to the schools through the inspector.

The following table shows the survey work completed during the calendar year 1946.

| Inspectorate         | Inspector           | Number of Pupils |
|----------------------|---------------------|------------------|
| Carleton.....        | J. C. Wilker.....   | 631              |
| Essex.....           | R. A. Pierce.....   | 541              |
| Frontenac South..... | N. Campbell.....    | 18               |
| Grenville.....       | H. W. Knight.....   | 60               |
| Leeds.....           | E. Oakes.....       | 8                |

### The Report and Recommendations of Dr. and Mrs. Ewing

Dr. A. W. G. Ewing and Mrs. Irene R. Ewing of Manchester University visited the classes for the deaf and hard-of-hearing in Hamilton, Toronto and East York in September while they were in North America on a lecture tour which covered most of the United States.

Excerpts from their report, which deal with day-schools for the deaf and hard-of-hearing, have been selected for inclusion in this report as follows:

#### A. Classification

"There appears to be appreciable wastage of effort on the part of first-class teachers because they are called upon to teach classes of pupils who are so unequally matched in chronological age, mental ability, capacity to hear and educational achievement, that they cannot be taught as a homogeneous class or even in two or three smaller groups. This weakness in the system was most apparent in one or two of the day schools, where the unit is small and adequate classification is proportionately more difficult. In these cases it appeared to us that the system of classification had not been thoroughly applied. We realized that the Authorities concerned were fully aware of this and that there was already in operation, a scheme of classification planned on a scientific basis, that took account of all the factors involved, viz, the results of tests of mental ability and educational achievement, of audiometric tests of hearing and previous experience (if any) in hearing."

#### B. Buildings and Equipment

##### Day Schools.

"The ample accommodation provided in every school, the lighting equipment and colourfulness of the classrooms all roused our admiration and sometimes almost our envy."

"We understand that the provision of more and of more up-to-date hearing aid equipment is only a matter of time. When this becomes practicable, it would seem advisable to have the hearing aid equipment installed in those classrooms that are not reverberant or whose ceilings and walls have been treated with sound-absorbent material. Some of the rooms, in which we saw hearing aids in use, were not suitable because of intense reverberation or proximity to noisy places."

#### C. Methods of Teaching

"First we would like to express our admiration and appreciation of the zeal and keen interest of the teachers of the deaf in all the schools we visited in Ontario. We formed a high opinion of their skill in teaching and of their devotion to their work."

"It seemed to us that further progress in methods of teaching would be achieved if and when a more clear-cut scheme of basic classification should come into operation. This would in the first place separate entirely the partially deaf from the deaf pupils, but it would ensure that each child gets the kind of education for which he is most fitted e.g., a partially deaf child would be educated mainly through hearing supplemented by lip reading; a totally deaf child, whose intelligence is below normal, would be educated by finger-spelling and reading."

#### D. Training of Teachers

"As has already been stated, we thought the quality of the teaching staff was high. This was equally true in the case of those teachers who had been trained at Belleville and of those who had previously trained as speech correctionists and who were in charge of classes for the partially deaf."

"Nevertheless, if in the future, the education of the deaf in Ontario is to keep pace with modern developments and research, it would seem necessary for the Department of Education in Ontario to formulate a new and comprehensive scheme of training in order to secure an adequate supply of specialist teachers who would come within one of the following categories:

- fully qualified nursery school teachers who hold also a special qualification as teachers of young deaf children.
- certificated teachers who also hold a certificate as an all purpose teacher of the deaf.
- certificated teachers or speech correctionists who also hold a qualification as teachers of the partially deaf."

## The Ontario Age-Grade Table

The Ontario Age-Grade Table is based on the data on ages by grades collected by inspectorates on May 31st of each year. This table for ages by grades is extended to give ages for each month of every elementary school grade by interpolating the figures for each month of the school year. Because there are annual changes in the average or mean age of pupils in each grade, the age-grade table must be changed from time to time in order to fit the actual school conditions, and if possible to anticipate trends.

An illustration of the changes and trends may be noted from the Eight-Year Table of Ages and the graphs for each grade from I-XIII inclusive. It will have been noted that in 1937 the average age of graduates of Grade III was greater than the average age of beginners in Grade IV. Another way of saying this is that the age in June of graduates of Grade III was higher than the average age of the same persons when they entered Grade IV two months later in September. This anomaly may be explained by the habit in Ontario of accelerating the school programme by promoting pupils in Grade III to Grade V. By reference to the same tables it is apparent that by 1942, for some reason or other, the anomaly which showed in 1937 has disappeared.

The Age-Grade Table as a measure of retardation or acceleration has been used in Ontario since the inauguration of the Auxiliary Education Branch. If a pupil's age is above the average for his grade, he is said to be retarded, in terms of his chronological age. Where the converse situation occurs, he is accelerated. A year of a person's time is very important to him and as a result should be equally important to his teacher. Retardation is a sign to which all school officials should be specially alert. When retardation amounts to one and a half years in Grades I-IV inclusive or two years in Grades V-VIII inclusive, it is a signal that the retardation has reached a severe stage and that the pupil is in need of special educational methods, materials or conditions.

The data printed in the Eight-Year Table and shown graphically have been prepared by the Statistics Branch of the Ontario Department of Education to show the details on which this important measure of school efficiency is based. It is also given to allow school officials to enlarge the existing age-grade table by inserting ages for all classes above Grade VIII. These figures have been found necessary in recording the grade scores attained in Achievement Tests.

## AVERAGE AGE IN EACH GRADE

1938-1945

Standard grade pupils only

| Grade   | 1938 | 1939 | 1940 | 1941 | 1942 | 1943 | 1944 | 1945 | Average |
|---------|------|------|------|------|------|------|------|------|---------|
| 1.....  | 7.4  | 7.3  | 7.2  | 7.2  | 7.2  | 7.3  | 7.2  | 7.2  | 7.2     |
| 2.....  | 8.7  | 8.6  | 8.5  | 8.5  | 8.5  | 8.4  | 8.4  | 8.3  | 8.4     |
| 3.....  | 9.7  | 9.7  | 9.6  | 9.6  | 9.6  | 9.5  | 9.5  | 9.6  | 9.6     |
| 4.....  | 10.4 | 10.2 | 10.5 | 10.5 | 10.6 | 10.5 | 10.5 | 10.6 | 10.5    |
| 5.....  | 11.3 | 11.3 | 11.4 | 11.5 | 11.5 | 11.5 | 11.5 | 11.7 | 11.4    |
| 6.....  | 12.2 | 12.1 | 12.3 | 12.4 | 12.4 | 12.4 | 12.4 | 12.6 | 12.3    |
| 7.....  | 13.2 | 13.2 | 13.2 | 13.2 | 13.2 | 13.3 | 13.3 | 13.5 | 13.3    |
| 8.....  | 14.1 | 14.1 | 14.1 | 14.0 | 14.1 | 14.1 | 14.1 | 14.3 | 14.1    |
| 9.....  | 15.0 | 14.8 | 14.9 | 14.9 | 14.8 | 14.8 | 14.8 | 15.1 | 14.9    |
| 10..... | 15.9 | 15.9 | 15.9 | 15.8 | 15.6 | 15.6 | 15.6 | 15.8 | 15.7    |
| 11..... | 16.9 | 16.9 | 16.8 | 16.7 | 16.6 | 16.6 | 16.6 | 16.7 | 16.7    |
| 12..... | 17.6 | 17.8 | 17.8 | 17.6 | 17.5 | 17.4 | 17.4 | 17.5 | 17.5    |
| 13..... | 18.7 | 18.6 | 18.7 | 18.4 | 18.3 | 18.3 | 18.3 | 18.4 | 18.5    |

### **The Wechsler Bellevue Intelligence Examination**

The individual intelligence examinations in use in Ontario schools are not used so successfully with adolescents and adults for the reason that the mental age obtained through their use does not usually exceed twenty years. Even if the adult mental age of fifteen or sixteen years is used in these cases, the persons with the greatest ability cannot secure an I.Q. exceeding 133, except when the score is translated by means of tables into equivalents based on higher ages.

Results may be valid in the cases of approximately ninety per cent of the persons so tested. The remaining ten per cent of the school population because of academic, mental, emotional or physical handicaps require the services of a teacher or psychologist trained to give an individual intelligence test.

The Wechsler Bellevue Intelligence Examination is individually administered and the results can be interpreted in terms of chronological ages from 15 years to 60 years. It is in two parts to allow separate intelligence quotients to be worked out on (a) a verbal score and (b) a performance score, and has been validated by administering it to adolescents and adults. It has been added to the library of the Auxiliary Education Branch to serve as an extra tool to be used in the examination of adolescents.

In Auxiliary Education, it is used in the Sanatorium Classes where many of the students are from 15 to 60 years of age. It is being administered by trained teachers who enroll adult patients for educational therapy.

Copies of this test are now in the library of the Auxiliary Education Branch for the use of inspectors and trained teachers. Some use has been made of the tests in supplementing the data obtained from other tests administered to adolescents.

### **Tests of Manual Dexterity and Mechanical Ability**

This year Dr. W. J. McIntosh completed a five-year study of manual dexterity and mechanical aptitudes at the Jarvis Street School For Boys. Because of reading difficulties and other handicaps, these boys are unable to perform at their true ability levels on group tests. In this study, twenty-five different tests of manual dexterity and mechanical aptitude were each administered individually to some hundreds of boys in an attempt to find an efficient method of replacing them in shops for pre-vocational training.

The results indicate that by administering six of the twenty-five tests tried out in the experiment, the results can be used to place the boys in the kind of shop work they would eventually choose. This method is much more simple than the previous one of giving each boy a one-month trial in each of the twelve shops.

Dr. McIntosh's report was accepted in partial fulfilment of the requirements for the degree of doctor of pedagogy by the School of Graduate Studies of the University of Toronto. Mention of the work is made in this report because this is the first time a special class teacher has undertaken such a lengthy study out of which has come a valuable contribution to the education of the handicapped.

### **The Detroit Convention I.C.E.C.**

The International Council for Exceptional Children held its first post-war convention in April, 1946 at Detroit. The proximity of this city to Ontario was partly responsible for the attendance of more than sixty delegates from Ontario

including trustees, superintendents, inspectors, principals and teachers. Part of the programme included visits to the special schools and this allowed teachers to see classes in which the work of their particular specialty was duplicated.

This convention is of special importance to special class teachers on the North American continent because the reports of experiments in special education are first presented there. The next step in the dissemination of this information is its appearance in the magazines. The final step is its inclusion in textbooks when they are revised.

#### **Summer School Courses in Auxiliary Education**

The programme of the Summer Courses in Auxiliary Education was enlarged in 1946 through the co-operation of several governmental agencies.

The Workmen's Compensation Board gave permission to visit the Occupational Therapy and Physio-Therapy Clinic at 77 Richmond St. West. Over half the teachers enrolled in the Summer Courses attended. Dr. Storms gave a short talk on the purposes of the clinic and provided guides for the visitors. This excursion was valuable to teachers of special classes because it showed them how crafts were used by handicapped adults on the same principles as they are used by handicapped pupils.

The Audio-Visual Aids Branch of the Department of Education provided sound and silent moving pictures to supplement lectures given in the several Auxiliary Education Courses. The Nervous System, Nutrition, Hearing Mechanisms, Growth and Conditioning were pictures which contributed to the success of the summer course.

Dr. E. P. Lewis of the Psychiatric Hospital arranged for the full clinical discussion of two typical cases. These discussions illustrate to the teacher the fact that the difficulties felt by a pupil are seldom single but develop in groups or syndromes.

The D. V. A. Hospitals through the kindness of Dr. Bailey provided opportunities for observing clinical conferences on the cases of stutterers. D. V. A. psychologists demonstrated the Rorschach and the Thematic Apperception Tests.

C. E. STOTHERS,

*Inspector of Auxiliary Classes.*

Toronto, August 15th, 1947.

Statistical data relative to this report may be found on pp. 131-135.

## SCHOOL ATTENDANCE

The enrolment in the elementary and secondary schools of the Province of Ontario has again increased. This year it is 20,671 more than in 1944-45 which in turn was 15,741 more than in 1943-44. Thus, at the present time there are 36,412 more children in these schools than there were two years ago. This increase is divided into two groups. In the elementary schools there were 6,297 more than last year and in the secondary schools 14,374.

The following comparative table shows the enrolment of the last three years.

**Table No. 1—Enrolment**

|   | 1943-44 | 1944-45 | 1945-46 | Increase<br>or<br>Decrease |
|---|---------|---------|---------|----------------------------|
| Public Schools.....                         | 433,494 | 434,425 | 436,709 | 2,284 I.                   |
| Separate Schools.....                       | 99,361  | 104,285 | 108,298 | 4,013 I.                   |
| High Schools and Collegiate Institutes..... | 66,041  | 73,866  | 79,853  | 5,987 I.                   |
| Continuation Schools.....                   | 8,471   | 8,997   | 9,668   | 671 I.                     |
| Vocational and Special Industrial Schools—  |         |         |         |                            |
| Day Classes.....                            | 31,433  | 29,405  | 32,159  | 2,754 I.                   |
| Night Classes.....                          | 29,546  | 33,109  | 37,807  | 4,698 I.                   |
|   | 668,346 | 684,087 | 704,494 | 20,407 I.                  |

**Table No. 2—Schools and Teachers**

|               | 1944-45        |                 | 1945-46        |                 |
|---------------|----------------|-----------------|----------------|-----------------|
|               | No. of Schools | No. of Teachers | No. of Schools | No. of Teachers |
| Public.....   | 6,603          | 14,754          | 6,575          | 15,232          |
| Separate..... | 907            | 3,225           | 943            | 3,453           |
| Totals.....   | 7,510          | 17,979          | 7,518          | 18,685          |

While the enrolment in the Public Schools has increased by 2,284, yet the number of schools decreased by 28. This is due to the increase in the number of township areas. In many of these the smaller schools were closed and the children transported to other schools where better opportunities are afforded. As the Separate Schools are more widely separated, there is not the same opportunity for Union School Boards.

**Table No. 3—Percentage Attendance**

| Class of School               | 1941-42 | 1942-43 | 1943-44 | 1944-45 | 1945-46 |
|-------------------------------|---------|---------|---------|---------|---------|
| City Schools.....             | 92.7    | 91.6    | 91.8    | 92.55   | 93.04   |
| Town and Village Schools..... | 94.7    | 91.4    | 91.5    | 92.05   | 91.52   |
| Ordinary Rural Schools.....   | 89.6    | 89.6    | 88.3    | 88.52   | 89.53   |
| All Urban Schools.....        | 92.8    | 91.5    | 91.7    | 92.38   | 92.65   |
| All Suburban Schools.....     |         | 87.9    | 91.7    | 91.66   | 94.04   |
| All Elementary Schools.....   | 91.7    | 89.6    | 90.8    | 91.03   | 92.02   |

For only one year in the last ten has the percentage attendance fallen below 90 and in that year (1942-43) it was 89.6.

**Table No. 4—Public School Attendance**

|               | 1944-45               |                          | Days Lost<br>per Pupil | 1945-46               |                          | Days Lost<br>per Pupil |
|---------------|-----------------------|--------------------------|------------------------|-----------------------|--------------------------|------------------------|
|               | Average<br>Attendance | Percentage<br>Attendance |                        | Average<br>Attendance | Percentage<br>Attendance |                        |
| Rural.....    | 118,426               | 87.12                    | 23.5                   | 121,386               | 89.27                    | 20.01                  |
| Urban.....    | 229,662               | 92.30                    | 14.5                   | 227,719               | 93.10                    | 13.16                  |
| Suburban..... | 32,126                | 91.66                    | 17.1                   | 37,013                | 94.19                    | 10.97                  |

From the above table it would appear that there is a tendency to move from the cities to suburban areas; the average attendance in the cities has decreased and the attendance in the areas nearby has increased.

**Table No. 5—Separate School Attendance**

|               | 1944-45               |                          | Days Lost<br>per Pupil | 1945-46               |                          | Days Lost<br>per Pupil |
|---------------|-----------------------|--------------------------|------------------------|-----------------------|--------------------------|------------------------|
|               | Average<br>Attendance | Percentage<br>Attendance |                        | Average<br>Attendance | Percentage<br>Attendance |                        |
| Rural.....    | 15,951                | 91.33                    | 21.0                   | 18,534                | 91.32                    | 16.09                  |
| Urban.....    | 72,287                | 92.66                    | 11.9                   | 75,427                | 91.57                    | 16.99                  |
| Suburban..... | 4,962                 | 94.52                    | 11.6                   | 4,717                 | 92.78                    | 7.71                   |

Table No. 8—Absence in Elementary Schools

| Days Lost Through                | 1945-46   | Percentage Loss |           |           |           |
|----------------------------------|-----------|-----------------|-----------|-----------|-----------|
|                                  |           | 1942-43         | 1943-44   | 1944-45   | 1945-46   |
| Illness.....                     | 5,395,099 | 61.28           | 67.64     | 57.71     | 66.19     |
| Home Help.....                   | 691,779   | 10.16           | 10.09     | 9.84      | 8.49      |
| Parental Neglect.....            | 559,825   | 7.41            | 7.22      | 8.36      | 6.87      |
| Physical Obstacles.....          | 204,298½  | 6.14            | 1.50      | 5.61      | 2.51      |
| Truancy.....                     | 28,184½   | .39             | .43       | .40       | .34       |
| Privation.....                   | 9,807     | .31             | .28       | .24       | .12       |
| Irregular Closing.....           | 847,816   | 9.81            | 8.11      | 13.02     | 10.40     |
| Other Reasons.....               | 413,975   | 4.56            | 4.73      | 4.82      | 5.08      |
| Total Days Lost.....             |           | 9,961,625       | 9,304,145 | 8,940,898 | 8,150,784 |
| The above losses are classified— |           |                 |           |           |           |
| Lawful.....                      |           | 7,442,875       | 7,258,305 | 6,640,668 | 5,397,077 |
| Unlawful.....                    |           | 2,518,750       | 2,045,840 | 2,300,230 | 2,753,707 |
| Percentage Attendance.....       |           | 89.9            | 90.8      | 91.0      | 92.02     |

An analysis of the above comparative table shows some very interesting facts. The general health of the school children was not as good as the year preceding, there being more absences due to colds, mumps, chicken-pox, whooping cough and kindred diseases. Naturally, the percentage of loss for this factor has risen 8.68. The losses for home help and parental neglect both show declines. This is due in part to improved labour conditions and in part to the influence of the Family Allowance Bonus which is conditioned on regular attendance at school.

The winter of 1945-46 was exceptionally free from general storms and the loss from physical obstacles dropped about 3%. A similar condition prevailed in irregular closing with the result that loss from that factor was reduced from 13.02 to 10.40. Where irregular closing is caused by the illness of the teacher nothing much can be done about it as no substitutes are available. Loss due to truancy is now about a third of one per cent while the loss due to privation has been reduced to .12 per cent. There is little variation from year to year in the losses due to reasons which cannot be briefly classified. On the whole the percentage attendance of all elementary schools is the highest it has ever been, 92.02 per cent. It is interesting to note that of the 8% loss, only about one-third is unlawful.

Table No. 9—Summary of Attendance Officers' Reports

|   | 1942   | 1943   | 1944   | 1945  |
|---|--------|--------|--------|-------|
| School Children's Employment Certificates issued..... | 1,382  | 1,043  | 1,157  | 648   |
| Home Permits issued.....                              | 2,717  | 2,053  | 1,874  | 1,661 |
| Employment Certificates issued.....                   | 12,792 | 12,544 | 11,911 | 7,180 |
| Cases brought before Magistrate.....                  | 820    | 1,113  | 1,085  | 965   |

The above summary is for the calendar year. The number of certificates issued has been considerably decreased. It might again be pointed out that the number of certificates issued does not mean that that number leave school. School Children's Employment Certificates are all for short periods, not more than six weeks in a term. Home Permits, too, are usually for short periods. As an Employment Certificate is required for each change of employment, there are, naturally, many duplicates in the above total.

| Night   | 41                   | ‡1,174                | 33,109    | 37,807  |                          |             |
|   |                      |                       | 62,514    | 69,966  |                          |             |
| Totals  | †453                 | 4,751                 | 145,377   | 159,487 |                          |             |

\*Includes those who teach in both Vocational and Academic branches.

†Many of these teach in Day schools.

‡25 schools are composite, and appear in both academic and vocational totals.

In the Secondary Schools there is an over-all increase in the enrolment of 14,610. This increase combined with that of the Elementary System shows that there are 35,281 more attending school than in the previous year.

R. D. KEEFE,  
*Director of School Attendance.*

Toronto, June 25, 1947.

## DEPARTMENTAL EXAMINATIONS

---

### Changes in Staff

Within the past two years, the Branch has suffered the loss of three valued members, each of whom had given many years of devoted and effective service to education in the province.

The appointment of the Registrar, Mr. J. P. Cowles as Deputy Minister, and his subsequent retirement are mentioned elsewhere in this Report. The retirement of Mr. W. A. Beecroft, Head Clerk, was reported previously.

The third member of the group, Mr. Bruce Leadbetter, Confidential Printer, retired on April 25th, 1945, after forty-six years of service in the same office. During those years, Mr. Leadbetter was responsible for the printing of the Departmental Examination papers, a task he performed most acceptably and with never-failing courtesy toward all those with whom he came into contact. At one time he was required to print each year 110 papers, with a total run of 790,000 copies. In recent years, with the adoption of the recommendation system in the Lower and Middle Schools, the number of papers has dropped to 72, with a total run of 452,000 copies.

Mr. Leadbetter's place was taken by Mr. P. L. Burrows of Lindsay, who has had over twenty years' experience as a printer, chiefly of text-books.

### The Departmental Examinations

The main work of the Branch involves the supervision of the preparation of the Departmental Examination papers, the administration of the examinations, the oversight of the marking of the answer papers, the recording of the marks, and the issuing of Departmental certificates and diplomas and of teachers' certificates.

The extent of these activities in 1946 is indicated in the statistical tables in Part II of this Report.

### Increased Work of the Branch

During and immediately following the war years, the work of this Branch increased tremendously. Contributing factors were the operation of Circular 27, under which Departmental standing was granted to deserving candidates upon the basis of early release from school for enlistment or for farm service; the evaluation of educational standing for persons desirous of entering the Armed Forces; the necessity of issuing letters of permission for boards to engage unqualified teachers; the issuing of large numbers of duplicate certificates to veterans who planned to enter University; the issuing of certificates monthly to graduates of the Tutorial Schools for veterans; the issuing of letters of equivalent standing based upon successful completion of certain technical courses taken in the services; and the evaluation of educational standing for applicants for admission to Training Schools for Nurses.

These additional tasks, particularly those concerned with the rehabilitation of ex-service men and women, have been performed gladly, although with considerable strain upon the resources of the staff.

### Student-Aid

In 1943 a programme of financial assistance was inaugurated in Ontario for students of adequate ability who, because of the lack of sufficient funds, were unable to complete their formal education. Since 1944 the awards available under the programme have been announced as Dominion-Provincial Student-Aid Scholarships and Bursaries in virtue of an agreement reached with the Dominion Department of Labour whereby the Dominion government agreed to assist the province financially in the programme. The awards are cash grants paid directly to successful applicants to help defray the cost of their education. When an award is made, the only conditions entailed upon a recipient are regular attendance at classes and diligent application to the course of study in which he is engaged. As the name indicates, the programme comprises two distinct types of awards—Student-Aid Scholarships and Student-Aid Bursaries—and the conditions governing the two types of awards are appropriate to the purpose that each type is intended to fill.

Each year every county and territorial district in Ontario is allocated a definite number of Student-Aid Scholarships based on a consideration of their population and the enrolment in the higher grades of the secondary schools. The three classes of Scholarships available provide for attendance at the Ontario Normal Schools, the first year of courses in Universities and affiliated colleges in Canada or the last year of courses in the secondary schools. Applications for the awards are required to be submitted to the Department before the end of June. Each application must be supported by the school principal and by at least one teacher on the staff familiar with the applicant and his work. The applications are reviewed in August by the Special Revising Board and the Committee of Award, and applicants are advised early in September of the results of their applications. Each class of Scholarship has a fixed value, and the awards are paid in two equal instalments, the first in October and the second in January.

The Scholarships allocated under the programme are intended for students whose need of financial assistance is clearly established and who have reached a minimum standard of proficiency in their examinations. This minimum standard has been set at 66 per cent. which, in the opinion of the Committee of Award, will exclude students who might not succeed in the courses for which the Scholarships are provided but, on the other hand, will not exclude students of adequate ability by requiring them to attain an unreasonably high standard of achievement in examinations. The awards, therefore, are not provided solely for students of exceptional scholarship—they are provided for students, in financial need, who have sufficient ability to profit by further education.

The financial assistance made available in the form of Student-Aid Bursaries is a complement to the Student-Aid Scholarship programme. University Student-Aid Scholarships provide for attendance during the first year only of courses in Universities and affiliated colleges; students who maintain an acceptable standard of proficiency may apply for Student-Aid Bursaries each year that financial assistance is required. An application for a Bursary, therefore, is not considered until the applicant is actually enrolled in his course. Each applicant is required to give an account of how he occupied his time during the vacation period. If at all possible, he is expected to engage in remunerative employment for at least part of this period to help finance his further education. The Committee of Award does not look with favour upon an applicant who was not gainfully employed during vacation unless, of course, he has a valid reason. Each applicant must indicate in his application the amount of money earned and saved

during his employment as well as other funds he has on hand to meet the expenses of the school year. If the application shows that the applicant will not have sufficient funds to complete the year, the Committee of Award will recommend a Bursary, the value of which will depend on the applicant's financial status (provided, of course, that he has obtained the minimum required standard on the examinations of the previous year). The Committee, therefore, adheres to a policy of awarding University Student-Aid Bursaries only to those applicants who give evidence of good faith by a reasonable effort to finance their own education. At the same time, it is to be pointed out that Bursaries are not restricted to applicants who were awarded Student-Aid Scholarships for their first year at University—all students in financial need, who meet the required academic standing, are eligible for consideration.

In addition to the assistance provided for students in the second and succeeding years of courses in Universities and affiliated colleges, Bursaries are also available to students enrolled in the Ontario College of Education, the Normal Schools, and the Ontario College of Art. With the exception of the Ontario Normal Schools, the academic requirements for entrance to these institutions are not based directly on the Grade XIII examinations. Consequently, applications are not considered until December, at which time the heads of the institutions will be able to estimate the proficiency of applicants on the basis of their work from the opening of the term in September until the applications are submitted in December. In the case of the Normal Schools, where Scholarships are also provided, Bursaries are made available in view of the serious shortage of elementary school teachers.

The following table gives a summary of awards made under the programme since its inception in 1943:

| School Year | Class  | Value of Awards* |              | Number Awarded | Total Amount Awarded |
|-------------|--|------------------|--------------|----------------|----------------------|
|             |  | Resident         | Non-Resident |                |                      |
| 1943-1944   | Scholarships:                                    |                  |              |                |                      |
|             | University                                       | \$200.00         | \$100.00     | 101            | \$33,500.00          |
|             | Normal School                                    | 125.00           | 200.00       | 38             | 7,200.00             |
|             | Grade XIII                                       | 100.00           | 100.00       | 53             | 5,250.00             |
|             |  |                  |              | 192            | \$45,950.00          |
| 1944-1945   | Scholarships:                                    |                  |              |                |                      |
|             | University                                       | 200.00           | 100.00       | 141            | \$49,000.00          |
|             | Normal School                                    | 125.00           | 200.00       | 40             | 7,475.00             |
|             | Grade XIII                                       | 100.00           | 100.00       | 86             | 8,400.00             |
|             | Renewals of 1943 Univ. (First Year) Scholarships | 200.00           | 100.00       | 58             | 20,400.00            |
|             | Bursaries:                                       |                  |              |                |                      |
|             | University                                       | 400.00           | 400.00       | 200            | 43,018.00            |
|             | Normal School                                    | 200.00           | 200.00       | 39             | 5,705.00             |
|             | Ont. Coll. of Art                                | 300.00           | 300.00       | 1              | 200.00               |
|             | Ont. Coll. of Ed.                                | 300.00           | 300.00       | 1              | 250.00               |
|             |  |                  |              | 566            | \$134,448.00         |
| 1945-1946   | Scholarships:                                    |                  |              |                |                      |
|             | University                                       | 200.00           | 400.00       | 161            | \$58,000.00          |
|             | Normal School                                    | 175.00           | 250.00       | 60             | 14,575.00            |

|             | Ont. Coll. of Ed.                                | 300.00           | 300.00       | 6              | 1,150.00             |
|             |  |                  |              | 632            | \$137,415.00         |

\*In these two columns the value of Scholarships is the actual value of the award; in the case of Bursaries, the value is the maximum amount available.

### Summer Courses

Departmental Summer Courses provide for teachers an opportunity to improve their professional qualifications and to fit themselves for more responsible positions. Through attendance teachers may refresh their knowledge of special subjects, acquire new skills and become acquainted with the latest development in educational content and method.

During the war the courses were necessarily limited in number and designed chiefly to meet wartime emergencies. Commencing in 1945, most of the usual courses were re-established.

The enrolments as follows for the past two years, while not yet reaching pre-war numbers, do nevertheless serve to indicate the increasing interest of teachers who are anxious to improve their qualifications:

|  | 1945  | 1946  |
|--|-------|-------|
| Agriculture.....                       | 87    | 104   |
| Art and Crafts.....                    | 144   | 311   |
| Audio-Visual Aids.....                 |       | 33    |
| Auxiliary Education.....               | 127   | 101   |
| Commercial Subjects.....               | 99    | 127   |
| Guidance.....                          | 150   | 230   |
| High School Assistant's.....           | 80    | 85    |
| Home Economics.....                    | 56    | 118   |
| Industrial Arts and Crafts.....        | 133   | 172   |
| Music.....                             | 327   | 432   |
| Oral French.....                       | 27    | 28    |
| Physical and Health Education.....     | 145   | 228   |
| Primary Methods.....                   | 168   | 258   |
| School Librarianship.....              |       | 22    |
| Vocational Courses.....                | 43    | 45    |
| Refresher English.....                 |       | 65    |
| Refresher History.....                 | 52    | 25    |
| Refresher Latin.....                   | 28    | 29    |
| Refresher Science.....                 | 34    | 15    |
| High School Principals' Refresher..... | 62    | ....  |
| Total.....                             | 1,762 | 2,461 |

### Interchange of Teachers

Interchange of teachers has been found to be very helpful, not only in developing interprovincial unity and Empire solidarity, but also in bringing to our schools many of the new ideas in education elsewhere. Interchange was greatly curtailed during the war years, being limited to a few interprovincial exchanges.

Interchange with Great Britain has now been resumed. During the school year 1946-47, twenty Ontario teachers were on exchange to Great Britain and seventeen to other provinces.

C. A. BROWN,  
*Registrar.*

Toronto, September 12, 1947.

*Photograph by Gilbert A. Milne*

These student-teachers at the summer course in art and crafts are rehearsing a puppet play. The Department encourages the use of puppetry in both elementary and secondary schools. Puppetry is considered an excellent teaching device since it involves not only group co-operation but also practice in written and spoken English, functional mathematics, music, art and crafts. Many students write original plays for puppet shows, while a few compose original music for them. Figures, costumes and stage sets for the puppet shows are always original.

## ART

---

### A Province-Wide Survey

A survey of art education in the schools of this province was begun in 1944 and was continued until the close of the school year, 1945-46. Upon completion of the survey, a 200-page report was prepared and submitted to the Chief Director of Education.

The report opens with a brief outline of the history of art in the schools. This is followed by a chapter describing developments in art education elsewhere, so that the progress made here may be compared with that in other parts of the world. The third chapter gives an account of the survey which was made in a number of provincial schools. Chapter four describes an experimental programme of art supervision and in-service education of teachers of art which was organized while the survey was in progress. The closing chapter offers recommendations for the improvement of art education in Ontario.

### Trends in Art Education in Ontario

A number of trends in art education in this province are becoming more clearly defined.

- (i) There is greater provision for creativeness in all activities and for all participants. The belief is gaining ground that every child is capable of producing work which is original. Former teaching techniques which relied upon copying are tending to disappear.
- (ii) Methods are being used in the classroom by which skills may develop through activities which engage the intellect and emotions of the learner. Teachers appear to be eliminating drills to develop skills, and instead are relying upon activities which are capably motivated and carefully selected according to the interests, abilities and life experiences of children.
- (iii) Provisions are being made for the learners to enjoy freedom of thought. The "step-by-step" form of art instruction is beginning to disappear, and in its place is found a methodology placing problems before pupils. These problems are solved largely through the guided efforts of the children themselves.
- (iv) Art is being fused with other subjects on the curriculum and with other life experiences of children. It is being increasingly realized that art cannot exist as a separate subject, but that it must be related to the varied experiences which children enjoy. The fusion of art with these experiences not only tends to create more vigorous expression in art, but also appears to increase general learning in the other subject fields.
- (v) Greater stress is being placed upon elevating the taste of the learners. Stress is being placed upon excellence of design used in the art programme. This is particularly noticeable in picture-making, where children are fusing the elements of design into more vigorous compositions. It is apparent also in some of the craft work, where a more

*Photograph by Gilbert A. Milne*

Here student-teachers at the summer course in art and crafts learn methods of correlating art and music. The students are making abstract patterns as the music plays. Later they will attempt to incorporate literary themes from music into more "realistic" designs. The freedom developed in the abstract forms will be maintained, however, in the "realistic" work. Some students make murals based upon operas and ballets.

*Photograph by Gilbert A. Milne*

These student-teachers at the summer course in art and crafts are putting the finishing touches to an "enterprise". An "enterprise" is a teaching method which arises from a problem requiring considerable research to solve. Here the problem is based upon "safety". Research included safety in the home, at play, on the street, and at school. The Department stresses the use of the "enterprise" in our schools in the belief that children should learn to do research and should, as far as possible, base their research upon practical problems which appeal to them. Facts and skills are acquired most efficiently this way, since the learning of them has real meaning for any child.

functional point of view is being adopted. The unfortunate oddities of design seen formerly, such as table-lamps looking like lighthouses or pumps, or mirrors looking like ships' wheels are tending no longer to be upheld by teachers as being worthy items of art appreciation and production.

- (vi) Art education is increasingly being used to relate the individual to his social group. The subject of art is frequently used to draw children together into democratic groups. For this purpose puppet shows, shadow plays, mural-making, and the like are being employed to a much greater extent. Stress is also being given to design in the community. Several examples of local town-planning may now be observed in the schools.

*Photograph by Gilbert A. Milne*

This unit of work at the summer course in art and crafts illustrates some of the recent trends in art education in the schools of Ontario. Puppetry and town planning shown here are group activities in which children learn to co-operate with their fellows, and to fuse their individual ideas and talents with the work of a group. No patterns for the designs are supplied, since it is believed that to use patterns in the classroom interferes with thinking. Paper sculpture in the foreground is being made for table decorations at a coming banquet.

#### Field Work

During the past school year, the Director of Art has done considerable field work in 16 public and separate school inspectorates throughout the province. This field work has included the giving of talks and demonstrations to teachers and to children, the conducting of short workshops for teachers, and the holding of conferences with inspectors.

#### The Normal Schools

The Director of Art visited each of the eight provincial normal schools in each of which he spent several days lecturing to the students.

### Bulletins

Five bulletins dealing with art education were issued to approximately 1800 provincial schools during the past school year.

### Summer Courses

The summer courses in art and crafts appear to be having a marked effect upon art education. The technique of administration of the summer course was based upon the educational workshop. Students were allowed to select work from 30 optional units. These units included all manner of art and craft work, such as silk-screen printing on paper and textile, wood carving, oil painting, metal work, textile printing, life drawing, puppetry, stage-craft, and so on. Much attention was given to pedagogy in all the work units offered.

C. D. GAITSKELL,  
*Director of Art.*

Toronto, August 16, 1947.

## AUDIO-VISUAL EDUCATION

---

### Radio Broadcasts

The Department of Education presented a programme of seventy-five educational broadcasts to elementary and secondary schools in the province. During the year, a survey of the effectiveness of the broadcasts in the secondary schools was completed. The questionnaire revealed that approximately 40% of these schools were using the broadcasts, and that others were planning to do so when new receiving sets became available. Reports from elementary schools indicated a fairly wide utilization of the broadcasts prepared for their benefit.

It is of interest to note that part of this Departmental programme, a series on Shakespeare's Julius Caesar, was given a First Award in the Regional Classification for a Secondary School Broadcast at the 10th Annual Exhibition of Educational Radio at Columbus, Ohio. The series was commended as "a programme of outstanding educational value and distinguished radio production."

### Film Utilization

The use of educational films during 1946 showed an increase over the previous year. Sound and silent films were shown to a total audience of 3,726,124 students. Approximately one hundred and fifty schools reported the purchase of a sound projector during the year. A slight decline in the use of our slides was evident.

### Filmstrips

The use of filmstrips is receiving increased attention, as good material is now becoming available. Our Branch has not distributed this type of visual aid to schools, owing to its cheapness and the need for easy accessibility. Leadership is being given in making available to all schools pertinent information concerning sources, prices, and general usefulness of this material.

### Teacher Training

In order to familiarize teachers with Audio-Visual Aids and approved techniques in their use, and to offset the tendency to accept movies and broadcasts as forms of entertainment rather than as instruments to enrich the educational experience, an Audio-Visual Aids Course was offered by the Department of Education in July, 1946. Valuable experience in the selection, evaluation, and utilization of Audio-Visual materials was gained.

In order to improve the in-service training of teachers, Audio-Visual Conferences were conducted in several specially selected areas. Afternoon and evening sessions were held with demonstration lessons using films, filmstrips, and radio broadcasts. Suggestions for the selection and care of equipment were given, and general utilization techniques were illustrated.

J. W. GRIMMON,

*Director of Audio-Visual Education.*

Toronto, June 28, 1947.

## GUIDANCE

---

I have the honour to submit herewith the report of the Guidance Branch for the year ending December 31, 1946.

As the fundamentals of the guidance programme are gradually being established and many teachers have obtained training, schools have this year been able to extend their organization considerably. As the practical nature of Guidance is being recognized by students, parents, and teachers, progress is more rapid.

Experience is demonstrating that an adequate service can be provided with a ratio of one teacher's time-table to each five hundred students. Many of the larger schools are moving toward that objective. While the Grade IX course in Occupations (two periods a week) is still the only obligatory part of the programme, many schools are providing additional group work in later grades, most commonly in Grade XII. Increasingly schools are realizing that group work alone does not make a guidance service, that individual counselling is the most important feature of Guidance, and that therefore a careful study of the individual pupil and an adequate system of records are essential. An increasing number of schools are providing the time, space, and privacy necessary for effective counselling, as well as assistance to do the clerical work.

Occupational and educational information is improving in quality, quantity, and form. A good deal of authoritative Canadian information of outstanding value is now available in the form of pamphlets, books and films. In addition to the classes in Occupations, other means of making information available to students are being used, such as files of occupational and educational information, guidance libraries, films, talks from outside speakers, service club counselling, careers programmes, and supervised work experience.

Progress toward a full programme varies greatly from one locality to another, depending on time available, training, and local conditions. Placement and follow-up must eventually be included, but in most centres this phase of the work is the last to be attempted.

The need for guidance work in the elementary schools is being recognized and the demand for it is growing. The work there differs in emphasis from the secondary school programme, being educational and remedial in nature, with Vocational Guidance introduced in the senior grades. The first tasks in the elementary schools seem to be as follows: (1) the study of individual pupils and the recording of all pertinent information in suitable form; (2) a study in Grades VII and VIII of educational opportunities and the relation between school and the world of work; (3) the development of each student to the limit of his abilities; (4) the preparation of each student for entry into and for success in the secondary school, with a minimum of disturbance to his progress.

Many elementary schools in the urban centres have undertaken considerable work in guidance. The results have been very encouraging and point to the time when guidance, through trained workers co-ordinating the programme, will become an integral part of education in the elementary schools.

During the year there was a marked increase in the number of letters received from teachers, pupils and parents. This has been encouraging because it indicates a desire to secure accurate and up-to-date information on which decisions may be based. It is extremely difficult for principals and teachers to have always on file all the information which may be requested by pupils and parents. Therefore the supplying of this information when it is requested is proving to be a real service to the schools.

The most pressing need in guidance work continues to be trained workers. A total of two hundred and thirty teachers attended in 1946 the summer courses leading to the Elementary and Intermediate Guidance Certificates. Ninety veterans availed themselves of the extramural Elementary course provided for ex-service personnel. While there is a concentration of trained workers in the larger schools, a considerable number of High Schools have someone with training. Few Continuation Schools have a trained teacher-counsellor. For that reason, the work there must continue to be largely informal in nature. However, with additional supervision and improvement in available material and information, the value of this informal work is increasing.

The Vocational Guidance Centre continues to be an invaluable means of distributing occupational information, tests, and other materials necessary to the work. The monthly paper, *The School Guidance Worker*, goes free to every secondary school and provides regular contact with those interested.

A third series of five half-hour radio broadcasts in Guidance was presented by the Department of Education in co-operation with the Canadian Broadcasting Corporation over a network of Ontario stations. Valuable and gratifying comments were received from the schools and the general public.

Mr. K. M. McIntyre was appointed Assistant in the Guidance Branch and assumed his duties January 1, 1946. His training in Psychology and his experience as a principal and in Army Personnel Selection qualify him to give valuable service.

Visits were made to most secondary schools during the year to assist in setting up or extending guidance programmes which will meet the needs of the school and community.

At the end of the second year, it is gratifying to note that the plans set forth when the Guidance Branch was established have proved serviceable. Progress has been more rapid than was anticipated. The practical nature of the work done has brought a sympathetic response from school administrators, teachers, parents, and the public. There is growing understanding that guidance is not dictation, but rather, practical help to the individual student in evaluating his abilities and opportunities, in gathering information about the educational and occupational world, and in making intelligent decisions regarding training and life work. Further progress waits not so much upon public acceptance as upon trained workers.

H. R. BEATTIE,  
*Director of Guidance.*

Toronto, May 14, 1947.

## MUSIC

### Extent of Music Instruction in Schools

#### *Elementary Schools*

The following statistics show the percentage of classrooms in the Elementary schools of Ontario providing a regular course in music, under the supervision of qualified music teachers. The figures are for the school year, and are based upon reports received from Inspectors.

|                               | 1945-6       | 1946-7       |
|-------------------------------|--------------|--------------|
| Cities.....                   | 100 %        | 100 %        |
| Counties.....                 | 77.7         | 79.9         |
| Districts.....                | 58.8         | 58.2         |
| R. C. Separate (English)..... | 48.3         | 60           |
| <b>TOTAL.....</b>             | <b>77.78</b> | <b>79.35</b> |

French-speaking schools, under the personal direction of Joseph Beaulieu, Mus. Bac., Assistant Provincial Director of Music, show satisfactory progress. Many urban centres have appointed Music Supervisors, and in 75% of both urban and rural schools music is being regularly taught.

#### *Secondary Schools*

The number of Secondary Schools offering a course in music is as follows:

| Schools                | Total No.<br>of Schools | Music<br>Grade IX | Music<br>Grade X | Music<br>Grade XI | Music<br>Grade XII | Music<br>Grade XIII |
|------------------------|-------------------------|-------------------|------------------|-------------------|--------------------|---------------------|
| Collegiates.....       | 71                      | 65                | 31               | 19                | 18                 | 6                   |
| High.....              | 168                     | 124               | 59               | 21                | 15                 | 5                   |
| Continuation.....      | 177                     | 109               | 69               | 23                | 14                 | 0                   |
| Vocational.....        | 24                      | 19                | 14               | 9                 | 7                  | 0                   |
| <b>TOTAL.....</b>      | <b>450</b>              | <b>317</b>        | <b>173</b>       | <b>72</b>         | <b>54</b>          | <b>11</b>           |
| <b>Percentage.....</b> |                         | <b>72</b>         | <b>39</b>        | <b>16.5</b>       | <b>12.5</b>        | <b>2.5</b>          |

Music organizations in Secondary Schools included Orchestras 98, Bands 34, Bugle and Pipe Bands 63, Choirs 245. Forty-six operettas were presented during the past year.

#### Music Teachers

The number of certificated music teachers and supervisors reported as being engaged full or part time in the schools during 1946 was as follows: in Elementary Schools, 762; in Secondary Schools, 233. Many teachers listed under Elementary Schools also teach part time in Secondary Schools.

#### Summer Courses

Nine different courses in Music were offered from July 3 to August 7 at Jarvis Collegiate Institute, Toronto. The total enrolment was 432 in 1946, compared with 327 in 1945.

#### Normal Schools

In the eight Provincial Normal Schools, music is taught to all students. While much time must still be spent in teaching the subject matter of music, there is a marked improvement in the attitude and ability of the student teachers, due to the Province-wide acceptance of music as a school subject.

Section of Provincial Secondary School Orchestra, Massey Hall, Toronto

### Matriculation Music

Music is one of the optional subjects in Grade XIII. Students may obtain standing by (a) submitting certain certificates from the Toronto Conservatory or other accredited examining bodies, or (b) attending a school course, if one is offered. It is impossible to state how many hundred students submitted certificates under (a) in 1946. The school course (b) was offered in four schools and fifty pupils wrote the Grade XIII Music examination in 1946. Corresponding numbers were 22 in 1944 and 33 in 1945.

### Music Festivals

Music Festivals have been encouraged as a means of motivating class-room work, establishing standards of performance, and stimulating public interest. The number of festivals held during 1946 was approximately 125, and the number of pupils participating is estimated at 50,000.

### Sound Films

The Department Library now contains 23 subjects dealing with music. The music films are among the most popular in the library.

### Radio

During January, February and March the Department, in co-operation with the Canadian Broadcasting Corporation, presented three series of Music broadcasts over a Province-wide network, i.e. "Junior School Music" - 10 fifteen-minute programmes for Grades I to VI; "Music for Young Folk" - 10 thirty-minute programmes for Grades VII to X; "Secondary School Concerts" - 3 sixty-minute programmes by the Toronto Symphony Orchestra. For all these broadcasts, the commentary was prepared and given by the Provincial Director of Music. The estimated audience was 100,000.

### Evening of Music by the O. E. A.

The Department co-operated with the Ontario Educational Association in presenting an evening of Music in Massey Hall on April 24th. This took the form of a cross-section of music in Ontario schools, and presented soloists and groups representing every activity carried on in the music programme. A special feature was a chorus of teachers from the Music Section.

### Scholarships

The Junior Leagues of Hamilton and Toronto offered four music scholarships of the value of \$200 each to pupils in Grades IX and X. Officials of the Music Branch collaborated with officers of the Junior Leagues to circularize schools and to give auditions to nominees. Awards were made to pupils in Port Arthur, Hamilton, Niagara Falls and Elmira.

### Concert Series

During the fall term, 56 concerts in 15 centres were sponsored and subsidized by the Department. 40,000 persons attended at Sudbury, Port Arthur, Port William, North Bay, Kirkland Lake, Orillia, Barrie, Lindsay, Peterborough, Smith's Falls, Brockville, Cornwall, Kitchener, Guelph, Brantford and Sarnia. The audience consisted mainly of Secondary School pupils who paid an average price of 30¢ per ticket. The cost to the Department was \$5,800. The series not

Teachers' Chorus, Summer School of Music, Varsity Arena, Toronto, July 1947

*Courtesy: Globe and Mail*

only brought good music to places far distant from the larger cities, but gave an opportunity for some 25 young Ontario artists to acquire platform experience and to build reputation. The press gave a great deal of very favourable publicity and comment.

### Publications

The following literature was prepared by the Music Branch:

Carols of Christmas  
Memorandum relating to the Teaching of Music  
Music in Rural Schools (revised)

### Field Activities of the Director of Music

|                                     |    |
|-------------------------------------|----|

Respectfully submitted,

G. R. FENWICK  
*Director of Music.*

Toronto, April 22, 1947.

## PUBLIC RECORDS AND ARCHIVES

---

During the past year, the work of this Department has increased very much. This was, of course, to be expected as part of the post-war readjustment. Both searches here and enquiries by mail have been more numerous and the information given has covered a wide field of subjects. We are pleased to report that the Department of Planning and Development has been making extensive use of our material along various lines.

The staff is always busy preparing material for use by the public. For instance, during the past year the indexing of the Church Records of St. Andrew's Church, Williamstown, Glengarry County, 1779-1914, the first Presbyterian Church in Upper Canada, was completed. It is estimated that over 16,000 cards were used.

Historians are becoming more and more aware of the value of county records and some county clerks, realizing the importance of the old papers in their possession, are anxious to have them preserved. To the County Council of the United counties of Leeds and Grenville we are indebted for county records covering nearly a century, 1832-1925. These were transferred to the Archives last summer and are being arranged chronologically as the first step in making them available to the public.

A start has been made on the checking and indexing of our thousands of Land Papers. This will take some time but will make these valuable records of much greater use to historians and others.

Further correspondence of the Ontario Library Association has come to light and has been incorporated in the previous group.

An interesting request was received from M. A. Gerard, Professor of History and Geography, Marcinelle (Charleroi), Belgium, for six of our Reports, to be used in a course of lectures on Canada. "J'ai choisi ce sujet parce que j'ai connu pendant la guerre à Bruxelles plusieurs soldats Canadiens qui m'ont beaucoup vanté leur beau et grand pays. De plus, ici en Belgique depuis la guerre, l'opinion publique s'intéresse beaucoup au Canada parce que vous avez été nos libérateurs." We were very happy to send these volumes.

Prof. G. W. Simpson, M.A., Professor of History, University of Saskatchewan, visited this Department last spring. Having recently been appointed Provincial Archivist, he wished to see our methods of handling material and expressed great interest and approval of our system. The idea of our historical exhibit appealed to him very much as he thought such aid to the teaching of history could be used to great advantage in his province, particularly for the rural schools.

### Historical Exhibit

It had been hoped to extend this service but restrictions on labour and material have not yet made this possible. The following are some comments from teachers who have had the use of the exhibit this year:

St. Marys Collegiate Institute:

I wish to express my appreciation of this material. It has served to stimulate considerable interest among pupils of Grades X to XIII. Several pupils brought in old documents, including a Crown Patent of 1830, similar to the one in the exhibit but on parchment.

I am sure my students would appreciate the opportunity to see another exhibit next year. . . . Kindly put our school on your list for any future exhibits.

Renfrew Collegiate Institute:

We assure you that this exhibit was much appreciated by the history department and was the subject of two or three history periods which, we are sure, served to give the pupils a far more vivid impression of various phases of life in early Ontario than mere text book treatment of the subject . . . and send herewith our hearty appreciation of your service.

Delhi High School:

Our History classes thoroughly appreciated your exhibit last fall. . . . Many of them enjoyed the newspaper of William Lyon Mackenzie with its variety of ads.

Havlock Technical High School:

All the students have seen this exhibit and were quite intrigued by it. The newspaper seemed to attract most of them. The poster stood second in acclaim. The writing on some of the manuscripts was also of interest to them and possibly was an incentive for them to improve their own penmanship. Again my appreciation for sending us the exhibit. If you have any more, I should be glad to have them after the New Year.

Belleville Collegiate Institute and Vocational School:

This exhibit was valuable and much appreciated by our classes. We appreciated this service very much. Is this the only display you send out to schools? We should like to have the same display a year or two later, or another one next year. Thank you!

Brantford Collegiate Institute and Vocational School:

In my opinion the exhibit was quite worthwhile and we received a great deal of benefit from it. It provides another means of stimulating an interest in history. The students seemed to show considerable interest, particularly after I had told them something about it. Students and teachers from other forms visited the room after four o'clock each night. If you are contemplating sending more exhibits in the future, I would greatly appreciate receiving some of them.

London Central Collegiate:

The pupils were very much interested in it (the exhibit), both boys and girls, and the librarian noticed they enjoyed the newspaper and coach advertisement most of all.

Wheatley Continuation School:

The students were quite interested especially Grade XIII, which is more capable of understanding the significance of such. I think the exhibits helpful and hope that others will be available. They often show to youth, which takes so much for granted, the contrast of earlier and modern history and life.

### Acquisitions

Albion, N.Y., The. Volume 45, 1866.

Arthur, A. J., Midland: Certificate re payment of subscription to Superannuated Teachers' Fund, for half year ended June 30, 1878, addressed to Harry Palk, P.S. teacher, Hillsdale, October 8, 1878.

Atkins, John, Bracebridge: Pamphlet: A Farmer Looks at Factories.

Campbell, Mrs. W. F., Toronto: Bound copy of The Daily Leader, Toronto, August 1st to November 5th 1855.

Clarke, C. D., Vancouver: Five copies of the Millbrook Messenger, 1875-1876, and the Markham Sun, September 10, 1885.

Clarke, Mrs. Rose E., Detroit: Packet of miscellaneous papers of the late Hon. Charles E. Clarke, formerly Speaker of the Legislative Assembly of Ontario.

Education Department Files: Those for 1842-1856 have been transferred to this Department. This is only the beginning. There are many more to follow.

- Glenney, Miss Vera, Toronto: Two pamphlets on the Orange Order, 1856; four Teachers' Certificates, 1851-1869; and a sketch of Andrew James Glenney, Little Britain.
- Hamilton, Miss Myra, Toronto: Thirty-nine volumes of the University of Toronto Monthly, 1907-1946.
- Harkness, John G., K.C., Cornwall: History of Stormont, Dundas and Glen-garry, 1784-1945.
- Harvey, Dr. D. C., Nova Scotia Archives: Report from surveys of part of the Georgian Bay, made in 1851 and 1852, for the purpose of selecting a harbour or terminus for the proposed St. Lawrence and Lake Huron Railway.
- Jarrett, Fred, Toronto: Packet of papers from the Court House, St. Catharines.
- Leeds and Grenville, United Counties of: Seven large cartons of county records, 1832-1925.
- Legislative Library, Toronto: Coloured engraving of Niagara Falls, 1833.
- Mathews, Mrs. Hazel, Oakville: Letter from Sir John Colborne, Headquarters, Montreal, to the inhabitants of the Township of Trafalgar, acknowledging their letter approving his actions during his administration, March 24, 1836.
- Municipal Affairs, Department of: Packet of documents, re Township of McNab.
- Park, B. C., Toronto: Certificate authorizing Alex'r McKee to teach in the Townships of Esquicing and Trafalgar, November 15, 1854.
- Patterson, The Rev. R. B., Toronto: Sketch of One Hundred Years of Church Life in Cannington Parish, All Saints' (Anglican) Church.
- Perth and Waterloo Gazetteer and Directory, 1870-71.
- Royal Ontario Museum: Collection of 89 large photographs of public buildings in Ontario, schools, institutions, court houses, &c., most of them built in the '70's.
- Smith, F. P., Kingston: Return of the Clerk of Elizabethtown for 1856 and "The Argus", Kingston, April 9, 1862.
- Smith, Miss Gertrude, Hamilton: Scrap Book, "Pioneer Life"- the story of Damaris Isabella Smith (Mrs. Sylvester Conrad Smith), Stoney Creek, 1831-1913.
- Talman, Dr. J. J., London: Notice from Daniel Lizars, Clerk of the Peace, Huron District, Goderich, re conduct of travellers on highways of the province, January 19, 1846; History of the First Woodstock Baptist Church, 1892.
- Tomlinson, Miss A. T., Toronto: Two photographs of Yonge Street, taken on Pretoria Day, 1900.
- Upper Canada map, by David Wm. Smith, 1800.
- Wallace, W. S., Librarian, University of Toronto: Packet of papers, re H. J. Boulton, 1792-1860.
- Wentworth County & Hamilton City Directory, 1865-1866.
- Willison, Mrs. Walter, Toronto: Box of miscellaneous papers belonging to the late Sir John Willison.
- Young, Mrs. George, Toronto: many copies of "Queen's Quarterly", to help complete our series.

H. McCLUNG,  
*Provincial Archivist*

June 3, 1947.

## PUBLIC LIBRARIES

---

It is with a feeling of some encouragement that I am able to report signs of improvement in our public book service during 1946. This improvement will not be evident in the statistical tables appended since the tables cover the operations of public libraries during the year 1945, before the adoption of the new regulations.

To those who have faith in the people and who believe, among other things, that the people generally will make intelligent use of public library service if it is provided for them in effective form, June 4th, 1946, will long continue to be a significant day. It was on this date that the new regulations for public libraries were approved and it is from this date, I believe, that we enter a new era in the development of a service essential to all education and to adult education in particular.

The intention of the new regulations is to stimulate public library service by offering library boards the opportunity to earn very much larger legislative grants than ever before. Increased grants will be earned on the basis of improved service to the public and will not be merely handed out to those libraries which make no effort towards improvement. For the free public libraries the main item governing grants is that by which a percentage of the municipal tax levy is returned to the community. This is not intended to reduce the amount spent locally on the public library but to encourage (without in any way compelling) more generous municipal support. In the past, municipal support of the public library has been, except in a few instances, wholly insufficient. It has represented only an infinitesimal part of general expenditures.

The item next in importance is that which establishes certification of those librarians who have taken qualifying courses. Certification is offered in five classes with appropriate grants based on each. It is not made compulsory, but courses are now being organized for those librarians who have not qualified and it is expected that within two years all librarians now in charge of libraries within the province, down to those operating the very smallest, and those on a part-time basis, will have had the chance to qualify in a course suited to the need of the library.

In these two main respects, therefore, the new regulations strike directly at the factors which have been responsible for the unsatisfactory state of our free public libraries, namely, inadequate financing and an insufficient number of librarians trained in their work.

During 1946 the shortage of professionally qualified librarians has become acute. All the large and medium-sized libraries are short-handed, some of them almost desperately so, while some of the smaller libraries which would ordinarily employ certificated librarians are operating with unqualified people. This situation is due partly to conditions engendered during the war, but chiefly to the fact that for many years the salaries offered were so inadequate to the training required and the responsibilities demanded, that a wholly insufficient number of university graduates were entering the profession. With the adoption of certification and its con-

comitant grants, however, boards are now in a position to offer more attractive remuneration. Library school registration is at a maximum, but it will probably be several years before the problem of qualified personnel will be satisfactorily overcome.

In spite of the financial and personnel handicap under which they have laboured, a number of the libraries have made distinct advances in the use of new material. Film collections have been established, which, used in connection with the programmes of local organizations, appear to have had a good deal of influence on the use of books of a directly educational nature. Collections of recorded music have received increasing attention. Loans of original paintings have been secured from various sources which, attractively displayed, have done much to stimulate general interest in art, its history, and the lives of those who have made notable contributions to it. In places in which there is no local art gallery this service is of untold importance.

I have mentioned these special services, not so much because of the interest being shown in them by a number of libraries, but rather because their adoption stresses the fact that the well-organized public library, in the face of great obstacles, is more and more tending to become the cultural centre, not merely the book centre, of the community. I must add, however, that this trend probably does not apply in the very large cities where art and music already have their own centres.

One more county library co-operative was organized (in Welland County) during the year. The work of these co-operatives continues to expand, and I cannot speak too highly of the initiative and far-sightedness with which so many of our county people are developing and spreading intelligent book service in their areas. No observer could help but be impressed by the quality of the reading material which is being offered to—and absorbed by—the farm and village communities through these county agencies.

## DEPARTMENT OF EDUCATION

### Travelling Libraries

Annual Report for the Year Ending December 31, 1946

#### LIBRARIES LOANED

|   |       |
|---|-------|
| Public Libraries.....                   | 180   |
| Schools (elementary and secondary)..... | 1,100 |
| Continuation schools.....               | 146   |
| Women's Institutes.....                 | 30    |
| Miscellaneous.....                      | 45    |

|            |       |
|------------|-------|
| Total..... | 1,501 |
|------------|-------|

|                         |    |
|-------------------------|----|
| Decrease from 1945..... | 85 |
|-------------------------|----|

| Non-fiction.....       | 10,538 |
| Total Adult books..... | 31,712 |
| Juvenile.....          | 89,474 |

|            |         |
|------------|---------|
| Total..... | 121,186 |
|------------|---------|

|                         |        |
|-------------------------|--------|
| Decrease from 1945..... | 60,584 |
|-------------------------|--------|

#### ACCESSIONS

|                          |       |
|--------------------------|-------|
| Fiction.....             | 1,079 |
| Non-fiction.....         | 696   |
| Total Adult books.....   | 1,775 |
| Juvenile.....            | 3,215 |
| Continuation school..... | 455   |

|            |       |
|------------|-------|
| Total..... | 5,483 |
|------------|-------|

|                                     |        |
|-------------------------------------|--------|
| BOOKS DISCARDED. . . . .            | 713    |
| NUMBER OF BOOKS IN LIBRARY. . . . . | 61,885 |

**Teachers' Library**

|  |       |
|--|-------|
| Number of Teachers registered. . . . .     | 3,256 |
| Circulation. . . . .                       | 865   |
| Accessions. . . . .                        | 58    |
| Number of books in library. . . . .        | 1,280 |
| Decrease in circulation from 1945. . . . . | 173   |

The decrease in circulation can partially be accounted for by the interruption in book purchasing and cataloguing caused by the long illness and subsequent death of the Librarian-in-Charge. Approximately 200 requests for juvenile books remain unfilled in December because the book-stock was depleted.

A. MOWAT,

*Inspector of Public Libraries.*

Toronto, March 28, 1947.

Other statistical data relative to this report may be found on pp. 213-228.

## TRADE-SCHOOLS

---

The Trade-Schools, providing a wide variety of trades and business training, have completed a year in which rehabilitation training of ex-service personnel was at its peak. Accommodation, equipment and staff alike throughout the year were taxed to the utmost and thousands of men and women discharged from the services in World War II have received valuable training in these schools. It is noteworthy that the 'Trade-Schools' total enrolment of ex-service personnel was approximately equal for the year to that of the seven Rehabilitation Training Institutes established throughout the Province. The service, therefore, that our Trade-Schools have rendered in providing the necessary facilities, equipment and staff in the emergency is worthy of recognition.

During the year the Department has recommended many improvements in the accommodation, equipment and staffing of the Trade-Schools. The response has been prompt and gratifying. The number of complaints registered by students claiming misrepresentation at the time of their enrolment or expressing dissatisfaction with the services rendered by Trade-Schools is lower than in any previous year. This indicates that with a few exceptions the Trade-Schools are fulfilling the expectations of the public. It is only fair to add that some of the complaints were found on investigation to be without justification.

The following courses of study are required to be registered under The Trade-Schools Regulation Act:—

- |   |  |
|---|--|
| 1. Advertising  | 21. Landscape Gardening                                  |
| 2. Aeroplane Construction and Operation                             | 22. Machine Shop Practice                                |
| 3. Air Conditioning and Refrigeration                               | 23. Mechanical Dentistry                                 |
| 4. Broadcasting Practice  | 24. Painting and Interior Decoration                     |
| 5. Business and Office Practice                                     | 25. Photography  |
| 6. Civil Service Occupations  | 26. Plastics   |
| 7. Commercial and Industrial Art                                    | 27. Printing and Bookbinding                             |
| 8. Concrete Construction  | 28. Pulp and Paper Making                                |
| 9. Dairy, Poultry and other Farm Work                               | 29. Radio and Wireless Communication                     |
| 10. Detective and Secret Service Work                               | 30. Railway Station Agents and other Railway Occupations |
| 11. Diamond Drilling  | 31. Salesmanship   |
| 12. Diesel and other Internal Combustion Engines                    | 32. Sheet Metal Work                                     |
| 13. Dress and Garment Designing, including Millinery                | 33. Sound Projection and Motion Picture Operation        |
| 14. Electric and Acetylene Welding                                  | 34. Speech and Oratory                                   |
| 15. Foot Correction   | 35. Stationary and Marine Engineering                    |
| 16. Foundry Practice  | 36. Telegraphy   |
| 17. Hand, Machine and Power Machine Sewing Operation                | 37. Television   |
| 18. Hotel Management and other Hotel, Cafe, and Hostess Occupations | 38. Theoretical and Industrial Chemistry                 |
| 19. Industrial and Business Management                              | 39. Theoretical and Industrial Electricity               |
| 20. Journalism and Story Writing                                    | 40. Theoretical and Practical Engineering                |
|   | 41. Woodworking and Cabinet Making                       |

The following schools have been registered during the year 1946 under The Trade-Schools Regulation Act:—

Academy of Radio Arts, Toronto  
 Orillia Commercial College, Orillia  
 Newspaper Institute of America, New York City  
 Port Arthur Business College, Port Arthur  
 Leavens Bros. Air Services Limited, Toronto

Leavens Bros. Northern Limited, Larder Lake  
Leavens Bros. Air Services Limited, London  
Leavens Bros. Air Services Limited, Windsor  
Felt Tarrant Comptometer School, Chicago  
Felt Tarrant Comptometer School, Toronto  
Felt Tarrant Comptometer School, Ottawa  
Felt Tarrant Comptometer School, Hamilton  
Euler Business College, Kitchener  
Campbellford Business College, Campbellford  
Midland Business College, Midland  
Brockville Business College, Brockville  
Kingston Business College, Kingston  
Tillsonburg Business College, Tillsonburg  
Lewis Hotel Training School Inc., Washington  
O'Neill Business College, Chatham  
Park Business College, Hamilton  
Parkhill Private School, Ansonville  
International Accountants Society Inc., Chicago and Toronto  
Sudbury Commercial Institute, Sudbury  
Sarles Business School, Trenton  
Miss MacKinnon's Business School, Ottawa  
Turner's Business College, Hamilton  
Simcoe Shorthand and Commercial College, Simcoe  
Robinson Business College, Waterford  
Alexander Hamilton Institute, Limited, Toronto  
National Business College, Ottawa  
Canadian Institute of Science and Technology, Toronto  
The Jan Chamberlain Studio of Effective Speech, Toronto  
Fort Erie Business College, Fort Erie North  
Agar Business College, Ridgetown  
St. Thomas Business College, St. Thomas  
Galt Business College, Galt  
Bowmanville Business School, Bowmanville  
Burrroughs Adding Machine of Canada Limited, Toronto  
Cassan Systems, Toronto  
Soo Business College, Sault Ste. Marie  
Weller Secretarial College, Toronto  
Avery's Business School, Gravenhurst  
Metzler Business School, Kingston  
Northern School of Commerce, North Bay  
Northern Institute of Technology (Radio College of Canada) Toronto  
Gillies Flying Service, Buttonville  
The School of Commerce, Clinton

Another record year for placement of graduates and undergraduates of all Trade-Schools is reported. The demand for men and women with trades and business training continues to be far beyond the supply. All too frequently, because of the shortage of trained men and women, students have been induced to accept employment long before they have acquired sufficient skill or knowledge to give satisfactory service. This exodus of partially-trained men and women from classrooms to occupations has been of great concern to school principals. It forecasts inevitable unemployment for many of their former pupils when competition among fellow-workers becomes normal and this in turn is bound to reflect unfavourably on the reputations of the schools.

W. S. KIRKLAND,  
*Registrar of Trade-Schools.*

Toronto, December 31st, 1946.

## THE SCHOOL FOR THE BLIND

I have the honour to submit the annual report of the Ontario School for the Blind for the school year 1946-47.

### Enrolment

|                                  | Boys | Girls | Total |
|----------------------------------|------|-------|-------|
| Enrolment June 1946.....         | 90   | 74    | 164   |
| Withdrawals June 1946.....       | 12   | 11    | 23    |
|                                  | 78   | 63    | 141   |
| New Pupils September 1946.....   | 16   | 7     | 23    |
| Re-entry during the term.....    | 1    | 0     | 1     |
|                                  | 95   | 70    | 165   |
| Withdrawals during the term..... | 3    | 1     | 4     |
| Enrolment June 1947.....         | 92   | 69    | 161   |

### Enrolment by Provinces

Ontario 123;      Alberta 13;      Manitoba 2;      Saskatchewan 23

### Graduates and Withdrawals

| Age     | No.<br>Pupils | Age        | No.<br>Pupils |
|---------|---------------|------------|---------------|
| 23..... | 1             | 15.....    | 2             |
| 20..... | 4             | 14.....    | 1             |
| 19..... | 3             | 8.....     | 1             |
| 18..... | 7             | 7.....     | 1             |
| 17..... | 4             |            |               |
| 16..... | 3             | Total..... | 27            |

Of the above twenty-seven students, five finished the complete school course and graduated. Two of these students went to McMaster University; one is a member of a teaching staff, teaching blinded soldiers, another is operating a dry stand, and one is in industrial employment. Of the remainder, one transferred to a school in Winnipeg, two of low mentality were sent to the school in Orillia, one remained at home ill, and fourteen are employed in factory or other work. One lad, who had an excellent standing in all his grades, dropped out at Eleventh Grade to become an officer in the Salvation Army. Three are not reported.

Five former pupils are now attending University. William Johnson and Louise Cowan have been doing M.A. work at Columbia and Toronto Universities respectively, while Robert Story, Gloria Mortimer and Betty MacMillan are undergraduates at McMaster. The school is proud of the achievements of these students.

## New Pupils in Age Groups

| Age     | No.<br>Pupils | Age                              | No.<br>Pupils |
|---------|---------------|----------------------------------|---------------|
| 6.....  | 2             | 14.....                          | 3             |
| 7.....  | 2             | 16.....                          | 2             |
| 8.....  | 1             | 17.....                          | 1             |
| 9.....  | 4             | 19.....                          | 1             |
| 11..... | 5             | 20.....                          | 1             |
| 12..... | 2             | Total (includes 1 re-entry)..... | 24            |

## Mental Ratings of New Pupils

|                 |    |
|-----------------|----|
| Untested.....   | 3  |
| 50 to 70.....   | 2  |
| 70 to 80.....   | 4  |
| 80 to 90.....   | 3  |
| 90 to 110.....  | 5  |
| 110 to 130..... | 6  |
| Total.....      | 23 |

Three pupils were not tested. One, a French lad, had little knowledge of English; the other two were too immature to be properly tested. Of the 110 to 130 group, one was seventeen years of age, two others, twenty years of age.

## Age-Grade Table

| Grade     | 6-7 years | 7-8 years | 8-9 years | 9-10 years             | 10-11 years | 11-12 years | 12-13 years | 13-14 years | 14-15 years | 15-16 years | 16-17 years | 17-18 years | 18-19 years | 19-20 years | 20-21 years | Total |
|-----------|-----------|-----------|-----------|------------------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------------|-------|
| I.....    | 2         | 4         | 1         | 5                      | 2           | 3           | 2           | .....       | .....       | 1           | .....       | .....       | .....       | .....       | .....       | 20    |

## Staff Changes

After eighteen years of faithful and efficient service as teacher of Household Science and Physical Training, Miss Laura Benrns has resigned her position.

Miss Deborah Haight, who has given seven years of devoted service to the School, resigned to take up secretarial work.

Miss Marie Butler has resigned her teaching post after three years of effective work, in order to be married. For the current year Mrs. Helen Lindsay took over Miss Haight's work and Mr. Robert Lindsay Miss Butler's work.

#### Toronto Conservatory Examinations

At the Toronto Conservatory of Music, Ronald Adams passed his Grade 8 Piano with First Class Honours. Henry Hoglund obtained Honours in Grade 8 Piano, and Annie Gray passed Grade 8 Organ with Honours. The results of those students who tried examinations in Theory have not yet been received.

#### Student Awards

Character Cups for senior boys and girls have been won this year by Muriel Mitchell of Lloydminster, Alta., and Ronald Adams of Forest, Ont., this boy being a second year winner of this cup. The Ethel Charlton Memorial Scholarship was won by Marjorie Fulton. This money prize of \$45.00 goes to the top academic student in the graduating class. The Women's Division of the Canadian Federation for the Blind gave a \$50.00 scholarship to the best graduating student from Saskatchewan or Alberta. This year, Muriel Mitchell was the winner.

The Rotary Scholarships are as follows:

|   |         |
|---|---------|
| Dr. D. C. Chapin Memorial Scholarship—General Proficiency Grade 8,      |         |
| Angus Vctor   | \$5.00  |
| Allen E. Cuthbertson Memorial Scholarship—General Proficiency—Grade 9,  |         |
| Reinhold Goliath  | \$5.00  |
| Flt. Lt. Ian Dowling Memorial Scholarship—General Proficiency—Grade 10, |         |
| Claude Chatelain  | \$10.00 |
| Lt. Charles Waterous Memorial Scholarship—General Proficiency—Grade 11, |         |
| Kenneth Holmes  | \$10.00 |
| Thomas Makusker Memorial Scholarship, Best Student, Dept. of English,   |         |
| Grades 11 & 12, Evelyn Crowe  | \$10.00 |
| Theodore R. Hamilton Memorial Scholarship—to student who has made the   |         |
| greatest progress in music during the year                              |         |
| Henry Hoglund   | \$10.00 |

At the Stratford Musical Festival this year Charles Rush, competing in the Baritone class (under 21 years of age) won first place and also captured the Junior Medlyn Cup as winner for all classes, vocal.

#### Extra-curricular Activities

On the resumption after a wartime interval of the annual field-day competition between this school and the Batavia School for the Blind, New York, the meet was held this year in Brantford. Our boys won all five events and permanent possession of the trophy.

Our Girl Guides in competition with all Brantford companies, ten in number, won the Elizabeth Edgar Memorial Cup for General Proficiency. Miss Esther Murray, a member of the staff, is Captain of the School Company as well as Divisional Commander for Brant-Norfolk.

The School Choir has given splendid service to Brantford and the surrounding district. There was scarcely a week in which the choir did not supply part of a programme for public meetings or service club dinners. Four full-length concerts were given at Galt, Scotland, Brant Sanitarium, and Colborne Street Church,

Brantford, The choir was especially honoured in being asked to sing at a banquet tendered to the Governor-General at the Brantford Golf and Country Club on May 30th. They were sincerely complimented by His Excellency, who expressed a desire to visit the Ontario School for the Blind.

The major musical-dramatic presentation for the year was Gilbert and Sullivan's "H. M. S. Pinafore," under the direction of Mr. George A. Smale, assisted by Miss Vera Kellett and Miss Eleanor Edmondson, and other members of the staff. This light opera was presented in Brantford and twice in Windsor to enthusiastic audiences. Despite high expense costs, over \$500 was contributed to the Brantford Boys' Band, to the Food Collection for British Children, and to the Home for the Blind in Windsor. At Windsor, the Lions' Club entertained the sixty young people in their homes.

On June 13th, the entire school were the guests of "Patty" Conklin, at a monster picnic given at his home. There was an hour's entertainment by some of his professional entertainers, good food in great abundance, and a warm show of hospitality. It was a red-letter day in the lives of our students.

Pupils of the school who have contributed for several years to missionary work in China through Dr. Robert McClure, have received warm letters of appreciation for their efforts.

#### Library Report

During the school year, 1946-7, a number of sets of Braille books were added to the text-book library. These are for use in the public school classes and consist of sets in mathematics and literature.

Not many volumes were added to the lending library, as owing to conditions created by the late war, many books in fiction and related subjects are temporarily out of print. Only a small proportion of the order was filled. Fortunately, however, this school received almost a full order of individual raised maps for the use of the geography classes in the High School Department.

Many of the library books are worn out from long service and will have to be replaced in the near future.

W. H. LITTLE, *Librarian*.

#### Double Defectives

Applications are received from time to time on behalf of students who are epileptic and blind, deaf and blind, physically crippled and blind, and all the combinations that these defects give, linked up with mental deficiency. The school is not equipped to care for any of these groups, yet they have a right to receive all the training that they are capable of assimilating.

During this past year, we have had four children who are epileptics, one of whom we had to exclude. We have had two physically crippled children who each needs two crutches to walk. All of these six double defectives are living in a school where they climb two flights of stairs to Assembly, one flight of stairs to their meals, and a part of them climb one flight to their classroom, as well as up and down concrete stairs from the school to the dormitories. Our type of building not only renders life unsafe for them, but also for others.

| All Pupils given reinforcing dose of Diphtheria Toxoid |    |    |
| All Pupils given Patch Test for Tuberculosis           |    |    |

The health of the students was very good during the term. Many of the hospital admissions were for observation only, where they could be supervised adequately from the medical and nursing standpoint. It was considered that the loss of school days due to illness was minimized by hospitalizing respiratory infections early and keeping the patients isolated.

In conjunction with the Brant County Health Unit, the pupils were all given the patch test for tuberculosis. The positive cases were X-rayed. No cases of active tuberculosis were found, despite the routine follow-up chest X-rays on doubtful cases. This was considered a very unusual record, as the pupils come from the Prairie Provinces as well as from Ontario and do not require a routine X-ray of the chest before enrolling at the Ontario School for the Blind. It was felt that in future, new pupils should be patch tested and those with positive reactions should be given chest X-rays.

The annual physical re-checks were completed as usual. It was gratifying to find that a number of pupils with recurrent tonsillitis, had followed our advice and had a tonsillectomy during the summer holiday season. The new pupils were found to be in fairly good physical condition. The immunization program was kept up to date, and the school was remarkably free from infectious disease during the term.

There are still quite a few students who urgently require tonsillectomies. The majority of these children have been strongly urged to have their tonsils removed during the coming summer.

Miss Anna Cook, the school nurse, is to be commended upon the skill and painstaking care with which she handled the medical welfare of her charges. The pupils are very fond of "their nurse" and have great confidence in her ability to help them during an illness. Miss Cook's cheerfulness and efficiency is a great acquisition to the medical welfare of the pupils.

Respectfully submitted,

J. A. MARQUIS,  
*Physician.*

### Ophthalmologist's Report

Degree of sight in new classes:

|            | Ability to count finger | Light perception only | No light perception in one or both eyes |
|------------|-------------------------|-----------------------|---|
| Boys.....  | 13                      | 5                     | 0                                       |
| Girls..... | 4                       | 1                     | 0                                       |
| 23         | 17                      | 6                     | 0                                       |

Our examination reveals an interesting fact in that in this year's class there is not a single pupil who has completely lost the sight in both eyes. One or two have lost one eye, but for many years, in each new group, we have always encountered two or three who have been totally blind.

Another relevant fact is that seventeen pupils have sufficient sight to count fingers at varying distances. For this category, this is a much higher number than is usually met with.

Diseases causing blindness:

|  | Boys | Girls | Total |
|--|------|-------|-------|
| Congenital cataract.....   | 2    | 0     | 2     |
| Other congenital causes—nystagmus, retinitis pigmentosa, microphthalmus..... | 8    | 4     | 12    |
| Keratitis.....   | 2    | 0     | 2     |
| Myopia.....  | 0    | 0     | 0     |
| Uveitis—traumatic and sympathetic.....                                       | 0    | 0     | 0     |
| Buphthalmus.....   | 3    | 0     | 3     |
| Optic atrophy.....   | 2    | 2     | 4     |

Study of the foregoing chart shows that congenital cataract, which is the usual lesion accounting for the largest percentage of visual loss, is much less prominent, —there being only two cases. This has been replaced by that group classified as congenital which includes nystagmus, retinitis pigmentosa and microphthalmus. This class accounts for some twelve cases,—or more than all the other eye lesions combined.

Another interesting observation is that such lesions as keratitis and myopia, —formerly liberal contributors to the cause of blindness—are not present in this year's class. This may be a coincidence, but we hope that it is an indication of an advancement of public education and interest in matters of health.

Our examination includes a routine survey of every pupil in the school. Many have shown a considerable improvement during the year. It was necessary to prescribe a change of glasses for many. A few needed ocular treatment and advice in the care and use of their eyes. All pupils showed a marked improvement in their weight, appearance, and general health. Some parents were seen throughout the year, and advice and direction were given as to their children's welfare.

Respectfully submitted,

NORMAN BRAGG, M.D. F.A.C.S.,  
*Oculist.*

## Dental Report

I have examined the teeth of all the pupils and found everything quite satisfactory. Of ninety-one boys, forty-two required no fillings, and twenty-five only one. Of sixty-four girls, twenty-nine required no fillings and sixteen only one. I consider this a very healthy condition.

|  | Boys | Girls | Total |
|--|------|-------|-------|
| Total number of fillings inserted..... | 93   | 71    | 164   |
| Teeth extracted—permanent.....         | 12   | 4     | 16    |
| Teeth extracted—deciduous.....         | 26   | 23    | 49    |

A porcelain crown was inserted for one pupil.

Respectfully submitted,

J. R. WILL, *Dentist.*

## BURSAR'S FINANCIAL REPORT for the year ending March 31, 1947

G. H. RYERSON,  
*Bursar.*

I am pleased to state that over the year, the teaching staff have given generously of their best, both in school and out. The help staff have been faithful to their duties.

I have the honour to be, Sir, your obedient servant,

H. J. VALLENTYNE,  
*Superintendent.*

June 28, 1947.

# THE SCHOOL FOR THE DEAF

I have the honour to submit the report of the Ontario School for the Deaf for the year 1946-47.

## Attendance

Enrolment by months:—

|               | Boys | Girls | Total |
|---------------|------|-------|-------|
| April, 1946   | 131  | 139   | 270   |
| May           | 131  | 139   | 270   |
| June          | 130  | 137   | 267   |
| September     | 145  | 145   | 290   |
| October       | 145  | 146   | 291   |
| November      | 145  | 145   | 290   |

Average enrolment for year—284

Twenty-three pupils left school during the year. Their ages are given below:—

|                        |                        |
|------------------------|------------------------|
| 4 years..... 1 pupil   | 11 years..... 1 pupil  |
| 5 years..... 1 pupil   | 15 years..... 3 pupils |
| 6 years..... 2 pupils  | 16 years..... 3 pupils |
| 8 years..... 1 pupil   | 17 years..... 3 pupils |
| 10 years..... 2 pupils | 18 years..... 3 pupils |
| 12 years..... 1 pupil  | 21 years..... 1 pupil  |
| 13 years..... 1 pupil  |                        |

The younger children left to attend other schools in Ontario or moved to other provinces.

## Age of Admission

Forty-four new pupils were admitted and their ages on admission were:

|                        |                        |
|------------------------|------------------------|
| 4 years..... 8 pupils  | 10 years..... 3 pupils |
| 5 years..... 14 pupils | 11 years..... 2 pupils |
| 6 years..... 5 pupils  | 12 years..... 1 pupil  |
| 7 years..... 4 pupils  | 13 years..... 1 pupil  |
| 8 years..... 2 pupils  | 14 years..... 1 pupil  |
| 9 years..... 2 pupils  | 19 years..... 1 pupil  |

### A Comparison

Most educators of the deaf have been advocating the earlier admission of deaf children to school. Owing to this tendency in other schools a comparison of ages for the school years 1936-37 and 1946-47 is given below.

| Ages September 15, 1936 |           | Ages September 15, 1946 |           |
|-------------------------|-----------|-------------------------|-----------|
| 4 years.....            | 1 pupil   | 4 years.....            | 7 pupils  |
| 5 years.....            | 8 pupils  | 5 years.....            | 18 pupils |
| 6 years.....            | 16 pupils | 6 years.....            | 16 pupils |
| 7 years.....            | 15 pupils | 7 years.....            | 16 pupils |
| 8 years.....            | 26 pupils | 8 years.....            | 18 pupils |
| 9 years.....            | 30 pupils | 9 years.....            | 35 pupils |
| 10 years.....           | 27 pupils | 10 years.....           | 35 pupils |
| 11 years.....           | 23 pupils | 11 years.....           | 23 pupils |
| 12 years.....           | 25 pupils | 12 years.....           | 33 pupils |
| 13 years.....           | 30 pupils | 13 years.....           | 17 pupils |
| 14 years.....           | 20 pupils | 14 years.....           | 17 pupils |
| 15 years.....           | 19 pupils | 15 years.....           | 25 pupils |
| 16 years.....           | 22 pupils | 16 years.....           | 16 pupils |
| 17 years.....           | 14 pupils | 17 years.....           | 8 pupils  |
| 18 years.....           | 8 pupils  | 18 years.....           | 6 pupils  |
| 19 years.....           | 6 pupils  | 19 years.....           | 4 pupils  |
| 20 years.....           | 2 pupils  | 20 years.....           | 0 pupils  |
| 21 years.....           | 1 pupil   | 21 years.....           | 0 pupils  |

It is significant that during the last year 41 children were six years or under compared with 25 pupils six years or under ten years ago. Also 53 pupils were sixteen years or over ten years ago compared with 34 pupils sixteen years or over last year.

This reduction of age should make possible more instruction for pupils at the secondary school level. Eight pupils obtained High School Entrance certificates in 1946 and six of these returned in September for high school work.

### New Equipment

Purchase of a 16-mm. Bell and Howell projector for silent and sound films has made possible programmes for educational, religious and entertainment purposes. Every Saturday evening the pupils have been entertained by films in the assembly room.

A permanent library of film strips and two-by-two slides is being built up. A projector for film strips and slides has been purchased and this equipment is being used for teaching social studies, shop practice, language and other subjects.

The new home economics room referred to in the last annual report was ready for use in September. The kitchens and laundry are equipped completely and have been used since September. Early delivery of living room and dining room furniture to completely furnish this room is expected.

A new printing press, a Pony Miehle, designed to take a maximum sheet of 26 x 34½ inches was installed in December. It is a late serial number press, which was rebuilt recently and is complete with standard factory accessories.

One of the latest models of group hearing aids, a Maico, was installed in March. It consists of 1 amplifier, 2 microphones, 14 pairs of receivers and a microphone for each two pupils. This adjustable set of microphones enables the pupils to hear their own voices as well as that of the teacher.

Equipment for the beauty culture shop was installed in September and includes a waving machine, hair dryers, and an Arno steamer for scalp treatment.

An electric drill and wall stand were placed in the farm mechanics shop and a school maintenance shop was set up in the basement of the main building.

#### **Visit of Dr. and Mrs. Ewing**

In April, 1946, Irene R. Ewing, O.B.E., M.Sc. and her husband A. W. G. Ewing, M.A., Ph.D., noted educators of the deaf from the University of Manchester, England, arrived in Washington, D. C. to visit schools for the deaf and to lecture to teachers, parents and others.

In September Dr. and Mrs. Ewing arrived in Ontario. After visiting day classes in Toronto, Hamilton and London and delivering addresses in Toronto and appearing before the Royal Commission on Education in Port Arthur, they spent three days at the Ontario School for the Deaf. While here they delivered eight lectures to an audience including the O. S. D. teaching staff and teachers of the acoustically handicapped from Montreal, Toronto, London, Hamilton and York County. The lectures included the following topics: Intellectual and Emotional Development of Deaf Children, a New Approach to Lip-Reading and Speech, and Tests and Evaluation of Residual Hearing in Relation to Education of the Deaf Child.

The Lectures were instructive, inspiring, and stimulating and the gracious personalities of Dr. and Mrs. Ewing impressed teachers, parents and other visitors.

At the close of the final lecture a reception was held under the direction and supervision of Mrs. M. Quinn, matron. An extract from The Ontario Intelligencer's report is quoted:

Being introduced to the guests of honour during the tea hour the Ontario Intelligencer had the privilege of an interview and found both Dr. and Mrs. Ewing gracious and entertaining. Asked about Ontario they said, "Visiting schools for the deaf in Ontario, we have been both inspired and delighted by what we have seen of the children and their teachers. For four months we visited schools for the deaf in the U. S. A., lecturing to interesting groups, but nowhere have we seen a better or more beautiful campus and buildings than here at Belleville.

We have spent three delightful days in this city and we have been deeply impressed by the happiness of the children in this school, and by the graciousness and charm of the teachers. We have seen the children at work, and at play on the campus, we've been with them for meals, yet from beginning to end we have never seen one pupil's face which has not shone with happiness and good health."

#### **Association Meeting**

Miss C. Ford, director of professional training, eleven teachers and the Superintendent attended the 56th Annual Summer Meeting of the American Association to Promote the Teaching of Speech to the Deaf, held in New York City from June 24th to 28th.

Highlights of the meeting were visits to Day School No 47 with an enrolment of 500 deaf pupils and to Lexington Avenue residential school. Addresses were given by Dr. and Mrs. Ewing, Mrs. Spencer Tracy of the John Tracy Clinic, Los Angeles, Dr. Arnold Geselt and other noted educators.

Panel discussions on such important subjects as reading, language, speech, hearing-aids, the nursery school, lip-reading, curriculum, supervision, and teacher training were held, many principals and teachers participating.

#### **Visit to Rochester School**

On May 24th. Misses C. Ford, E. Nurse, Messrs F. P. Cunningham, A. Gordon, C. A. Holmes and the Superintendent visited the Rochester School for the deaf. We were enabled to see all phases of school work, as the officials of the Rochester School did everything possible to make the visit profitable and helpful.

### Summer Courses

During the summer of 1946, three of our teachers, Misses K. B. Daly, M. I. Hegle and M. C. Maloney attended special classes for teachers of the deaf at Ypsilanti, Michigan. Other teachers took courses in Ontario.

### Special Events

On April 24th, Mr. A. Long, Historian of the Bell Telephone Company of Canada, assisted by Mr. Ferguson, his technician, gave a lecture and demonstration to the teaching staff, entitled "Looking Ahead with Science."

On Wednesday, May 8 Miss Wright, representing Underwood Ltd. gave a demonstration of typewriting for all pupils who are taking typing.

Thursday, May 30th, was Visiting Day at the School. Work of pupils in the various shops was on display and visitors observed the children at work in classrooms. In the evening a capacity crowd including many parents saw a group of dances by senior girls and a demonstration of gymnastics and mat work by the Intermediate girls.

The annual Christmas entertainment was held on Friday afternoon, December 13th, and was attended by pupils, members of the staff and many visitors. The programme consisted of singing of carols and the presentation of a pageant which portrayed the events leading up to the birth of Christ as recorded in the Bible.

Other events included Hallowe'en party, skating party and ice-races, St. Patrick's party, including dancing by the pupils and annual graduation exercises in June.

### Girls' Basketball and C. O. S. S. A.

For several years boys' teams from the O.S.D. have competed successfully in the Bay of Quinte district of the Central Ontario Secondary Schools Association in such games as rugby and hockey. For the first time a senior girls' basketball team was entered in 1945-46 and in 1946-7 a junior girls' basketball team was entered, winning the championship for the Bay of Quinte district. At Malvern Collegiate Institute, Toronto, the deaf girls were defeated in the finals by Niagara Falls Collegiate, score 23 to 19.

Boys' teams have also been successful in basketball games in competition with teams of hearing boys.

Reference is made to basketball as it was not possible for our pupils to play this game until the two gymnasiums were made available. The large floor space in the former drill hall of the R.C.A.F. has been divided making two gymnasiums, one for the boys and one for the girls. The work of partitioning was done by the boys under the direction of their instructors. Each gymnasium is 80 feet x 110 feet giving ample space for such games as basketball, volleyball and badminton.

### Medical Report for the School Year 1946-47

From April 1st, 1946, to March 31st, 1947, there were 347 admissions to hospital.

All new pupils not immunized against smallpox, scarlet fever, diphtheria and whooping cough were vaccinated or given the necessary toxoids.

29 cases of mumps were treated in the school hospital, all responding normally to treatment.

6 fractures resulting from play were reduced, X-rayed at the city hospital, and plaster casts applied.

Several cases of sore throats and four mild cases of pneumonia were treated.

The eyes of sixteen children were examined by Dr. Chant and glasses prescribed when considered necessary.

A new pupil, James Cooper, died in the Belleville Hospital from a brain tumour. His parents reported that he had been struck on the head at home with a baseball bat before he entered school.

With the assistance of Dr. Chant I gave all new pupils a complete physical examination.

On the whole the health of the pupils has been good.

R. W. TENNENT,  
*Physician.*

#### Dental Report for the School Year 1946-47

The following work has been completed during the School Term:

Boys: Fillings—(a) Amalgam 58, (b) Porcelain 14. Prophylaxis 51.

Extractions—(a) Permanent Teeth 11, (b) Deciduous Teeth 31.

Girls Fillings—(a) Amalgam 56, (b) Porcelain 13. Prophylaxis 49.

Extractions—(a) Permanent Teeth 6, (b) Deciduous Teeth 41.

G. C. CALDWELL,  
*Dentist.*

\*Excluding duplication. 25 Secondary Schools are composite. 251 male teachers and 167 female teachers spend part of the school day in both academic and vocational departments.

## I--TERMINOLOGY

**Assessment**—The valuation placed upon property for tax levy purposes. The County Council generally makes an equalization annually of local assessment figures, and this equalized figure is used in the computation of Legislative grants to schools.

**Attendance Efficiency**—The percentage relation of the actual days attended to the perfect aggregate.

**Auxiliary Classes**—These are provided for gifted, socially or educationally maladjusted, retarded, or physically-handicapped pupils.

**Capital Charges**—Debenture instalments, or sinking fund deposits, made on debt incurred for school buildings and equipment.

**Compulsory School Age**—Children 8 to 14 must attend full time; children from 5 to 8, if enrolled, must attend full time to the end of the school term for which they are enrolled. Adolescents, 14 to 16, who have not attained University matriculation standing must attend full time; those exempted on the plea of circumstances compelling them to go to work must attend part time (400 hours a year) in municipalities where part-time courses are provided. Urban municipalities with a population of 5,000 and over, are required to provide part-time courses.

**Consolidated School**—An amalgamation of two or more rural schools, or of rural schools with a village or town school, either for the purpose of strengthening the means of school support where the original schools were small or poor, or for the purpose of providing a graded school and other advantages, such as conveyance, instead of the original one-room school.

**Correspondence Courses**—Reach those more isolated than the school car pupils. They supplement the work of the regular school when remoteness, winter weather, ill-health, or physical disability prevent regular attendance. Twenty-five hundred is an approximate year's enrolment for these courses, which reach from Grade I to X, and are sets of carefully prepared lessons based on the new Course of Studies. A Departmental staff handles this correspondence with extreme promptness, and a pupil's progress depends entirely upon his own efforts. About 75% of these pupils live in Northern Ontario, and 15% of them are of foreign parentage. These courses are entirely free.

**Cost per Pupil-Day**—The cost of educating one pupil of actual attendance, for one day. It is found by dividing the total cost of education of the group of pupils concerned by the actual aggregate attendance of this group for the period under consideration.

**County Pupil**—A secondary school pupil living within the County but outside any secondary school district.

**District**—The eleven defined areas of Northern Ontario which do not constitute municipal units for any purpose. With the exception of Parry Sound and Muskoka, these areas lie north of The French River and Lake Nipissing. This region is newer and more sparsely populated than Southern Ontario, and produces most of Ontario's extensive mineral and forest wealth.

**Enrolment (Net)**—The number of pupils who have attended school during the year, excluding all duplications.

**Fifth Classes**—Grades IX and X in Elementary Schools, doing work similar to the first two grades of Secondary Schools. The majority of these classes are in rural areas.

**Free School Age**—The Public Elementary Schools are free to all resident pupils between the ages of 5 and 21 whose parents are public school supporters. The Separate Schools are free to the children of the separate school supporters. The Secondary Schools are free to all except non-resident pupils.

**General Maintenance**—Ordinary, current expense, as opposed to capital outlays and debenture charges.

**Inspectorate**—The area under the supervision of a local Departmental representative.

**Kindergarten Primary**—A class combining the work of the kindergarten and Grade I.

**Non-Resident Pupil**—A secondary school pupil who is neither a resident nor a County pupil.

**Public School Section**—A subdivision of a township for elementary school purposes, containing a minimum of 50 children between the ages of 5 and 21, and having a maximum area of four square miles.

**Resident Pupil**—A secondary school pupil living within the secondary school district.

**School**—Provincially controlled schools may be classified as:

I. **Elementary**—Those doing the work of the first eight grades. A few have Fifth Classes (see above).

- (a) **Public**—The first school established in any school section or urban municipality, and supported by the ratepayers.
- (b) **R.C. Separate**—For the children of Roman Catholics.
- (c) **Protestant Separate**—For the children of Protestants in centres preponderantly Roman Catholic.

II. **Secondary**—Those doing the work of Grades IX to University Matriculation.

(a) **Academic:**

- 1. **Collegiate Institutes.**
- 2. **High Schools.**
- 3. **Continuation Schools.**

These schools are differentiated by minimum staff requirements. Continuation Schools are located mostly in villages or rural areas. Academic Courses are designed to lead to Universities and Teacher-Training Schools.

(b) **Vocational:**

- 1. **Technical High School.**
- 2. **Commercial High School.**

In the smaller centres academic and vocational departments are frequently found in the one building, which is then called a composite school. Vocational courses are designed to lead to industry, trade and commerce.

**School Car**—A school on wheels, carrying education and social betterment to small communities scattered along the railway lines of Northern Ontario. There are seven of these cars at present, and the length of route ranges from 83 to 221 miles. The route is covered in four to six weeks, with stops of about 5 days at certain stations. Problems are solved, work is outlined for the next period, and daily problems of life are discussed. Emphasis is placed on English, writing, spelling and arithmetic. The present enrolment approximates 250, and comprises 15 nationalities. The Department pays all costs.

**School Year**—The school year consists of two terms, September 1 to December 22, and January 3 to June 30. In addition to the intervals between these terms there is a vacation of one week following Easter. In this Report statistics cover the school year where possible. Financial data remains on the calendar year basis.

**Secondary School District**—The area over which the secondary school board exercises supervision. Each city and separated town is a secondary school district. The County Council may establish a secondary school district composed of an urban municipality only, a group of school sections only, or a combination of both. In the territorial districts of Northern Ontario any municipal council or councils may establish the whole or any part of the municipality or municipalities as a secondary school district, with the approval of the Minister of Education.

**Township School Area**—A unit of school administration comprising two or more contiguous rural school sections in the same township or in adjacent townships, or comprising such rural sections along with one or more adjacent villages or towns. See Cir. Elem. 15, The Township School Area in Ontario.

## SCHOOL YEAR AND HOLIDAYS

Sept. 3rd, 1946, to June 27th, 1947

## PROVISIONS OF THE SCHOOL ACTS

The school year shall consist of two terms, the first of which shall begin on the first Tuesday of September following Labour Day and shall end on the 22nd day of December, and the second of which shall begin on the 3rd day of January and end on the 29th day of June.

When the 3rd day of January is a Friday, the schools shall not be opened until the following Monday, and when the 29th day of June or the 22nd day of December is a Monday, the schools shall be closed on the preceding Friday.

Every Saturday, every public holiday, the week following Easter Day, and every day proclaimed a holiday by the authorities of the municipality in which the teacher is engaged, and every day upon which a school is closed under the provisions of The Public Health Act, or the regulations of the Department of Education shall be a school holiday.

## HOLIDAYS

The following are the holidays in the schools during the school year 1946-47:

- (1) Thanksgiving Day.
- (2) Remembrance Day—November 11th.
- (3) December 21st to 31st, inclusive—part of Christmas vacation.
- (4) The first five days of January—part of Christmas vacation.
- (5) Easter holidays—April 4th to April 13th—both days included.
- (6) Victoria Day—May 24th.
- (7) The Anniversary of the King's Birthday.
- (8) Summer vacation—June 28th to September 1st, both days included.

## DATES OF OPENING AND CLOSING OF SCHOOLS

The following are the dates of the opening and closing of the High, Continuation, Public and Separate Schools:

|             |               |            |               |
|-------------|---------------|------------|---------------|
| Open.....   | September 3rd | Close..... | December 20th |
| Reopen..... | January 6th   | Close..... | April 3rd     |
| Reopen..... | April 14th    | Close..... | June 27th     |

## NUMBER OF TEACHING DAYS

In the High, Continuation, Public and Separate Schools, the number of teaching days is as follows:

|                |    |               |     |
|----------------|----|---------------|-----|
| September..... | 20 | January.....  | 20  |
| October.....   | 23 | February..... | 20  |
| November.....  | 20 | March.....    | 21  |
| December.....  | 15 | April.....    | 16  |
|                |    | May.....      | 22  |
|                |    | June.....     | 20  |
|                |    |               | 119 |
|                | 78 | Total.....    | 197 |

P.S.: As the exact dates of the Anniversary of the King's Birthday and Thanksgiving Day have not yet been proclaimed, the deduction has not been made from the above. The total number of teaching days for the academic year will be 195.

Number of teaching days for calendar year 1946 — 197; for calendar year 1947 — 196.

A In all Provincially-Controlled Schools.

B Commencing with 1943-44 the net enrollment has been taken instead of the May enrollment. Large suburban and semi-urban enrollment is contained in the urban figure.

C This includes the following: Manual Training, Household Science, Auxiliary, Kindergarten, Art, Music, Physical Culture, but excludes Itinerant Music Teachers.

D This includes Third Class, District, Permanent Ungraded, and Temporary.

E Included with Public Schools.

(1) Collegiate Institutes, High Schools and Continuation Schools  
(2) Paid to elementary school boards in poor financial condition; discontinued April 1, 1945. These figures include special grants paid to Cornwall in 1945 for earthquake damage; this accounts for the entry for secondary academic.  
(3) Includes building grant  
(4) Paid only to elementary school boards; discontinued during 1945.  
(5) Consolidated Schools are public elementary schools; grant discontinued during 1945.  
(6) Paid to city public school boards which maintained their own inspection staff; discontinued during 1945.  
(7) General Legislative Grant to Vocational Schools is for day and evening classes.  
(8) Paid only to elementary school boards; discontinued during 1946.  
(9) Discontinued during 1945.  
(10) Night school grants to elementary school boards discontinued during 1945.  
(11) Of the general legislative grants to vocational schools for 1946, \$599,000 was reimbursed to the Province by the Dominion Government.

\*Excluding payments by the Province to boards for services rendered such as education of pupils from certain unorganized areas (\$210,561 and \$190,953 in 1945 and 1946 respectively) and use of schools for practice teaching.

## NOTES

1. A new grant scheme came into effect in 1945. As a result, many of the former special grants were discontinued.

2. Where used in the above table, "n.a." means "not applicable".

### XIV—PROFESSIONAL TEACHING CERTIFICATES ISSUED SINCE 1908 TO NEWLY QUALIFYING TEACHERS

Because of war conditions, the general programme of Summer Courses was discontinued from 1941 to 1944, inclusive. During that period, the following courses were offered:

- 1942 — Summer Course in Defence Training, Health and Physical Education—925.
- 1942-43 — Winter Course in Manual Training, Type A—10.
- 1944 — Summer Course in Physical and Health Education and Cadet Training—313.
- 1944-45 — Winter Course in Manual Training Type A—48.
- 1944 — Refresher Course in Medieval History given during Christmas vacation—45.

### SUMMARY OF HIGH SCHOOL ENTRANCE EXAMINATION, 1946, AS COMPILED FROM THE RECORDS OF THE EXAMINATION BRANCH OF THE DEPARTMENT

(This includes results of candidates from private sources)

|  |        |
|--|--------|
| Grade VIII net enrolment for the school year 1945-46                   | 57,525 |
| Number of High School Entrance Candidates                              |        |
| Recommended by Principal on Group II                                   | 32,522 |
| Number taking written tests on Group II                                | 22,013 |
|  | 54,535 |
| High School Entrance candidate percentage of 1946 Grade VIII enrolment | 94.80% |
| Number of candidates successful on written test on Group II            |        |
| By Regulation 10 = (1) and (2)   | 12,937 |
| (3) and (4)  | 779    |
| (5)  | 582    |
| (6)  | 181    |
| (7)  | 426    |
|  | 14,905 |
| Total Number of Successful candidates                                  | 47,427 |
| Percentage of candidates who were successful                           | 86.97% |

(59.64% by Principals' recommendation and 27.33% by passing written test)

TABLE 4—STATISTICS OF AUXILIARY CLASSES

## OPPORTUNITY CLASSES

For backward and psychopathic children and those who have not successfully pursued the ordinary grade work, but who can be trained and whose mental age is not less than the legal school age

| Centre                                  | Number of Teachers | Enrolment at Inspection | Boys         | Girls      | Net Enrolment | Percentage Cared for in Opportunity, Handicraft and Special Industrial Classes | Special Departmental Grants |

# SCHOOLS TO WHICH PUPILS WERE TRANSPORTED BY BUS

## 1946-47

\* —Transportation Paid by Elementary School Boards.  
† —Transportation Paid by Secondary School Boards.

The map displays the boundaries of various school boards across Ontario. Major cities and towns are labeled, including Toronto, Ottawa, Kingston, Peterborough, and Sudbury. The map also shows the locations of various school boards, such as the Toronto Board of Education, the Ottawa-Carleton District School Board, and the York Region District School Board. The inset map shows Northern Ontario, including areas like Patricia, Kenora, Rainy River, and Thunder Bay.

—Transportation Paid by Elementary School Boards.

† —Transportation Paid by Secondary School Boards.

## NORTHERN ONTARIO

TABLE 22—TRANSPORTATION TO SECONDARY SCHOOLS (School year 1946-47)

A survey has recently been completed of the transportation of pupils to Secondary schools in the school year 1946-47. Some of the findings which are of more general interest are given below.

|  | Counties  | Districts | Totals    |
|--|-----------|-----------|-----------|
| <b>BY BUS OPERATORS:</b>                   |           |           |           |
| No. of schools to which pupils transported | 126       | 25        | 151       |
| No. of routes.....                         | 294       | 60        | 354       |
| No. of pupils transported.....             | 7,219     | 1,177     | 8,396     |
| Amounts received for transportation.....   | \$509,299 | \$69,573  | \$578,872 |
| Cost per pupil per month.....              | 7.05      | 5.91      | 6.89      |
| Cost per pupil per mile.....               | .0076     | .0068     | .0076     |
| Average mileage for morning route.....     | 22        | 23        | 22        |
| Average time for morning trip (minutes) .. | 65        | 60        | 64        |
| Average days missed due to road conditions | 5         | 3         | 5         |
| <b>BY PUBLIC VEHICLES:</b>                 |           |           |           |
| No. of pupils.....                         | 2,317     | 507       | 2,824     |
| Total cost to school board.....            | \$36,867  | \$17,271  | \$54,137  |
| <b>BY PARENTS:</b>                         |           |           |           |
| No. of pupils.....                         | 3,499     | 111       | 3,610     |

#### AVERAGE OPERATING COST OF SCHOOL BUSES, 1946-47

(Only vehicles of 1940 Model or later, and those having a seating capacity of at least 20 pupils have been used in this calculation).

|                               |        |
|-------------------------------|--------|
| Average miles operated.....   | 11,880 |
| Average miles per gallon..... | 8      |
| *Depreciation.....            | \$613  |
| Drivers' salary.....          | 757    |
| Gas and oil.....              | 594    |
| Tires and repairs.....        | 438    |
| Insurance.....                | 180    |
| License.....                  | 55     |
| Storage.....                  | 97     |

\*The cost of buses has increased since 1940, so that this figure is low.

#### (B)—Classification of Chassis of Vehicles used—Make and Year

|                     | Before '30 | '30-'34 | '35-'39 | '40-'44 | '45-'47      | Total |
|---------------------|------------|---------|---------|---------|--------------|-------|
| General Motors..... | 5          | 28      | 23      | 19      | 21           | 96    |
| Chrysler.....       | 1          | 1       | 15      | 25      | 13           | 55    |
| Ford.....           | 1          | 4       | 30      | 21      | 27           | 83    |
| Mack.....           | ..         | ..      | 4       | ..      | ..           | 4     |
| Reo.....            | 7          | 7       | 2       | 1       | 4            | 21    |
| Studebaker.....     | ..         | 1       | 2       | ..      | 3            | 6     |
| White.....          | ..         | 1       | 2       | ..      | ..           | 3     |
| Others.....         | 2          | 9       | 21      | 13      | 20           | 65    |
| Totals.....         | 16         | 51      | 99      | 79      | 88           | 333   |
|                     |            |         |         |         | Unclassified | 21    |
|                     |            |         |         |         |              | 354   |

#### (C)—Classification of Vehicles Used by Seating Capacity

|               |    |              |     |
|---------------|----|--------------|-----|
| Below 10..... | 69 | 41-50.....   | 45  |
| 10-20.....    | 69 | Over 50..... | 12  |
| 21-30.....    | 80 |              |     |
| 31-40.....    | 79 | Total.....   | 354 |

(D)—A survey of buses used discloses, in addition:

- (a) 85% are steel construction; balance steel and wood.
- (b) 70% are used cars, while 30% are new.
- (c) Seats are fixed in 96% of the vehicles, while 4% have the seats loose.

UNIVERSITY OF TORONTO

---

REPORT

OF THE

**BOARD OF GOVERNORS**

FOR THE YEAR ENDED 30TH JUNE, 1946

---

*To His Honour the Lieutenant-Governor-in-Council:*

The Governors of the University of Toronto have the honour to present their fortieth annual report of the financial administration of the University, both for Queen's Park and the Ajax Divisions, together with a comprehensive review by the President of the academic work of the University and its Colleges for the Session 1945-46, and the reports of various officers and departments; these reports covering the first complete year of the University since the close of World War II.

The financial report shows the funds and assets, including investments, receipts and expenditures, etc., as they stood at the close of business at 30th June, 1946, and the certificate of audit of the same by Clarkson, Gordon & Company.

The general revenue for the year amounted to \$3,498,945.05, which together with the Special Legislative Grant of \$1,100,000.00 and the Supplementary Grant of \$200,000.00 made a gross total of \$4,798,945.05. The expenditures under the appropriations made by the Board for salaries (including Wartime Bonus) and maintenance totalled \$4,695,515.88 (exclusive of the Ontario College of Education which is maintained by a separate vote), to which was added \$95,179.40 representing interest written to certain scholarship and trust funds, making a total expenditure of \$4,790,695.28. This resulted in an excess of receipts over expenditures of \$8,249.77 which was written off against the balance carried forward from the previous year. Additional funds totalling \$883,574.91 for research and other purposes were administered during the year.

The University is using its best endeavours to handle the tremendously increased enrolment and the many problems arising therefrom as well as to control the pronounced upward trend in costs.

All of which is respectfully submitted.

W. E. PHILLIPS,  
*Chairman.*

19th March, 1947.

## AUDITORS' CERTIFICATE

Toronto, Canada, 17th January, 1947.

*To the Governors of the University of Toronto:*

GENTLEMEN:

We have examined the balance sheet of the University of Toronto (Queen's Park and Ajax Divisions) as at 30th June, 1946 and the statements of general endowment and income and expenditure for the year ended on that date. In connection therewith we examined or tested accounting records of the University and made a general review of the accounting methods and of the operating accounts for the year but did not make a detailed audit of the transactions.

In the attached balance sheet the investment of the University in the Royal Ontario Museum is shown at its book value of \$248,376.30 and recoverable expenditures on alterations and improvements to leased premises at Ajax are shown at \$1,035,747.67. Subject to the determination of what equity, if any, the University has in the Royal Ontario Museum and the recoverability of the expenditures on leased premises at Ajax, we report that in our opinion the accompanying balance sheet and related statements of general endowment and income and expenditure read in conjunction with the footnotes thereto have been drawn up so as to fairly present the state of the University's affairs at 30th June, 1946 and the results of its operations for the year according to the best of our information, the explanations given to us and as shown by the books.

CLARKSON, GORDON & CO.,  
*Chartered Accountants.*

DEPARTMENT OF HEALTH

---

Twenty-second Annual Report

OF THE

Department of Health

ONTARIO, CANADA

FOR THE YEAR

1946

PRINTED BY ORDER OF  
THE LEGISLATIVE ASSEMBLY OF ONTARIO  
SESSIONAL PAPER No. 14, 1947

TORONTO

Printed and Published by Baptist Johnston, Printer to the King's Most Excellent Majesty  
1947

TO THE HONOURABLE RAY LAWSON, O.B.E.,  
*Lieutenant-Governor of the Province of Ontario.*

MAY IT PLEASE YOUR HONOUR:

I herewith beg to present for your consideration the Twenty-second Annual Report of the Department of Health, for the year 1946.

Respectfully submitted,

RUSSELL T. KELLEY,  
*Minister of Health.*

TO THE HONOURABLE RUSSELL T. KELLEY,  
*Minister of Health.*

SIR,—I have the honour to submit for your approval the Twenty-second Report of the Department of Health, made in conformity with and under the provisions of The Public Health Act, for the year 1946.

I have the honour to be, Sir,

Your obedient servant,

J. T. PHAIR,  
*Deputy Minister of Health.*

## PUBLIC HEALTH ADMINISTRATION

DEWILLET S. PUFFER, B.A., M.B., D.P.H.

R. G. STRUTHERS, M.D., D.P.H.

With each succeeding year the complexities of administration at the Departmental level multiply. New developments in the field of public health endeavour require readjustment of existing policies and facilities whereby they may be satisfactorily or reasonably well met. Old problems, freshly complexioned and clothed in garments a period of rehabilitation never fails to provide, continue to present themselves for appropriate attention.

The reports of the Divisional activities to be found in this the twenty-second annual report of the Department, are indicative of the increasing demands for service on the part of the public which continues to display growing interest in all matters pertaining to health. Administratively this necessarily requires integration and correlation of the various divisions now functioning within the Department, with the efforts of related official public health organizations which serve the population at the community level.

The employment of full time qualified personnel by Health Unit Boards of Health to serve at this latter mentioned level has been appreciably increased during the year under review. Seven such Health Units were established, bringing the total as of December 31st, 1946, to fifteen. During the same period, five counties officially expressed their desire to set up similar organizations as soon as staff becomes available. Those in operation at the date given and the year of their establishment is as herewith listed:

| Health Units Now Established        | Date of Institution |
|-------------------------------------|---------------------|
| Stormont, Dundas and Glengarry..... | 1940                |
| Porcupine.....                      | December, 1944      |
| Kirkland-Larder Lake.....           | April, 1945         |
| Welland and District.....           | June, 1945          |
| Northumberland and Durham.....      | July, 1945          |
| Elgin-St. Thomas.....               | July, 1945          |
| St. Catharines-Lincoln.....         | August, 1945        |
| Oxford County and Ingersoll.....    | September, 1945     |
| Brant County.....                   | January, 1946       |
| Dufferin County Health Unit.....    | June, 1946          |
| Prescott and Russell.....           | July, 1946          |
| Prince Edward County.....           | July, 1946          |
| Bruce County.....                   | July, 1946          |
| Peel County.....                    | July, 1946          |
| Lambton.....                        | September, 1946     |

As may be appreciated, the formation of the above listed Units and their final establishment as actively functioning official public health agencies was not accomplished without the expenditure of considerable effort on the part of both the Department and those locally interested in this comparatively new undertaking. Of the problems faced, the shortage of trained personnel whose qualifications were such as could meet the Department's regulatory requirements, particularly with respect to nursing personnel, was the most acute. As a means toward overcoming this handicap, the Department again made provision whereby

bursaries were made available to physicians, nurses, sanitary engineers, dentists and veterinarians desirous of obtaining the necessary academic qualifications. Those chosen by application on the successful completion of special courses, become eligible for appointment by local boards of health as full time members of staff where joint municipal or county sponsored health programmes are in operation or are to be instituted.

As a matter of interest, one might note that Directors of Divisions had the somewhat unique opportunity of meeting with representative groups of full time public health personnel serving in Units or larger centres at the municipal level and discussing with mutual advantage their problems and programmes. Two conferences of this type were held.

In addition to the full time public health programme carried on by Health Units and certain of the larger municipalities, a full time public health school nursing programme developed around school health continues to operate in the following counties: Halton, Haldimand, Huron, Lennox and Addington, Middlesex, Perth, Simcoe and Wentworth. Of the foregoing, the service in Lennox and Addington was initiated in August, 1946.

An extension of the mental health programme hitherto in effect and sponsored by the Department was initiated during the year. Psychiatrists to act as consultants to Health Units on a regional basis were appointed. Four such regional areas are now served. The programme, though still in the early stages of development, gives promise of becoming a very real contribution towards the advancement of the generalized principles and expanding practices of public health endeavour at the community level.

Changes directly affecting the Department during the year 1946 as related to Medical Officers of Health are as follows:

#### RETIREMENTS

|                   |                   |                    |                 |

## REPORT OF THE SOLICITOR

CHARLES WALKER, *Solicitor to the Department*

The following legislation was passed by the Legislative Assembly in the 1946 Session:

The following Act was passed:

*The Victoria Hospital London Act, 1946.*

The following Acts were amended:

*The Public Health Act.*

*The Venereal Diseases Prevention Act, 1942.*

*The Medical Act.*

*The Pharmacy Act.*

*The Optometry Act.*

Regulations were passed in 1946 under the authority of the following Acts:

|  | Date of Approval | Ontario Regulations Number |
|--|------------------|----------------------------|
| <i>The Athletic Commission Act, 1939</i>   |                  |                            |
| Amendment re Basketball.....   | May 21           | 65/46                      |
| <i>The Cemetery Act</i>  |                  |                            |
| Proclamation re Anglican Church Cemetery in Barrie.....                                    | Feb. 15          | 24/46                      |
| <i>The Nurses' Registration Act</i>  |                  |                            |
| Amendment re Registration of Nurses.....   | Feb. 19          | 22/46                      |
| Amendment re Council of Nurse Education...   | Oct. 1           | 125/46                     |
| <i>The Public Health Act</i>   |                  |                            |
| Regulations constituting Boards of Health of the various Health Units mentioned hereunder: |                  |                            |
| Prince Edward County Health Unit.....  | Jan. 15          | 11/46                      |
| Bruce County Health Unit.....  | Feb. 15          | 23/46                      |
| Peel and Dufferin County Health Unit...  | May 14           | 56/46                      |
| Halton County Health Unit.....   | May 21           | 61/46                      |
| Welland and District and Northumberland and Durham Health Unit.....                        | July 23          | 94/46                      |
| Kent County Health Unit.....   | Aug. 6           | 97/46                      |
| Lambton County Health Unit.....  | Sept. 24         | 119/46                     |
| Fostered-Food Locker Plants—New.....   | June 25          | 79/46                      |
| Pasteurization of Milk—Re-enacted.....   | July 23          | 93/46                      |
| Expectant Mothers—New.....   | Aug. 6           | 99/46                      |
| <i>The Public Hospitals Act</i>  |                  |                            |
| Amendment re Provincial Aid.....   | Feb. 26          | 25/46                      |
| Amendment re Woodedden.....  | Aug. 20          | 103/46                     |

The volume and complexity of present-day Health legislation and legislation associated with it appears to indicate the desirability of legal assistance being available to those engaged in health administration in its various aspects.

## DIVISION OF DENTAL SERVICES

F. A. KOHLI, D.D.S., D.D.P.H., *Director*

During the past year the Division has pursued its dental health educational activities.

An active programme has been carried out in conjunction with the Department of Education and the Committees of Organized Dentistry. Education of the public has been through the medium of educational motion pictures and slides; and lectures to public health workers, school teachers, Women's Organizations, Farm Federation, Service Clubs and other interested lay groups.

Educational booklets have been distributed to aid teachers and nurses in health teaching, and for the interest of the school children. Mouth Inspection Charts for use in dental surveys have also been supplied.

A Teaching Manual for Secondary Schools is at present in preparation.

Public interest has been maintained and stimulated, particularly in regard to school and pre-school children. Although shortage of dental personnel is still acute, school dental services, that have been operating with the assistance of the departmental grant, have maintained and in some cases extended their services. The following have been added to the list of those eligible for grant:

| <i>Townships</i> | <i>Villages</i> | <i>Towns</i> |
|------------------|-----------------|--------------|
| Lindsay          | Bradford        | Mount Forest |
| Trafalgar        | Braeside        |              |
| Bentinck         |                 |              |
| Artemesia        |                 |              |
| Whitchurch       |                 |              |
| Glenelg          |                 |              |
| Keppel           |                 |              |
| Flos             |                 |              |

The annual meeting of the Northern Ontario Dental Association, the Ontario Dental Association convention and the Winter Clinic of the Academy of Dentistry were attended by the Director.

There was a change of dentists on the dental car at mid-year. Dr. Switzer, who had been on the car since January, 1941, went to the dental clinic in the Ontario Hospital at Brockville, and Dr. Mitton, who had returned from overseas to the Ontario Hospital at Orillia, took over the duties on the car. During the year 36 places were visited, mainly in the Thunder Bay district, and over 1,500 appointments with school children were recorded.

With the return of staff from the Armed Services the hospital dental clinics are in a better position to take care of x-rays, routine examinations and necessary treatment. These clinics, the Central Dental Laboratory, and some of the clinics in Institutions under the Department of Reform Institutions, were inspected regularly by the Director, and consultations held when necessary.

The work in the Central Dental Laboratory has increased this year, and the two technicians have been busy trying to keep abreast of it.

There has been a very slight increase in the amount of emergent dental treatment for relief recipients.

---

The Division is associated with the Public Dental Health Committee of the Ontario Dental Association, in an advisory capacity, in a project sponsored by the Provincial Red Cross Society in the Welland-Crowland district. A full-time dentist has been engaged to carry on a school dental survey and educational programme. The programme is of a type that might be used by a Health Unit Dental Officer, and will demonstrate the value of a dentist in this capacity.

A comprehensive chart has been devised for this project and it will be used as a standard for school surveys.

## DIVISION OF EPIDEMIOLOGY

R. P. HARDMAN, M.D., D.P.H., *Epidemiologist*

There has been a general increase in the trend of communicable diseases reported in Ontario during 1946, as compared with the corresponding period of 1945. This general increase is chiefly accounted for by the biennial fluctuations of such diseases reported as Chickenpox, Measles, Mumps, German Measles and Whooping Cough.

There has also been a marked increase shown in the incidence of Diphtheria during the past year. In June of this year, an advisory letter was sent out to all Medical Officers of Health and the medical profession in the Province, drawing attention to this increase in the incidence of Diphtheria, and suggesting radical changes in the time limitations in the administration of reinforcing doses of Diphtheria Toxoid. The general response to this letter has been very satisfactory, as noted in the increased distribution of Diphtheria Toxoid throughout the Province in the past three months.

As compared with 1945, the incidence of Poliomyelitis reported in Ontario in 1946 was quite high. During the last week of July, an unusual number of Poliomyelitis cases were reported from Ottawa, Windsor and Sarnia. While it is not unusual for Poliomyelitis to be reported from the larger cities and towns in Ontario during the summer months, the trend for 1946 was one week ahead of schedule. In the first two weeks in August 49 cases were reported. During the last week of August 48 cases were reported. August was the peak month. 512 cases were reported during the year, the highest number of cases since 1937, when 2,546 cases were reported. As in previous years, all hospitalization and physiotherapy costs of these cases were provided by the Government. Cases were reported from all counties and districts in the Province. However, 12 or more cases only were reported from seven counties, Essex, Carleton, Victoria, Stormont, Dundas and Glengarry, Middlesex, Wentworth, and York.

Early in 1946, a mild outbreak of Typhoid Fever occurred in an eastern municipality. There were no deaths. This outbreak has been responsible for the slight increase in the 1946 morbidity rate of Typhoid Fever (.9 over 1945). During 1946, 82 cases of Typhoid Fever were reported in Ontario, an increase of 26 cases over the corresponding period of 1945. The mortality rates, however, have shown no increase to date. The rates per 100,000 have been below 1, for the past ten years.

There has been a marked reduction in the number of cases of Influenza reported during 1946, and no large outbreak has occurred since 1937.

A decrease has also been shown in the number of cases of Scarlet Fever reported in the Province and the incidence has remained low since 1944.

There has been no Smallpox reported. Ontario has been free from Smallpox since 1938.

Outbreaks of Food Poisoning, caused by staphylococcus enterotoxin, have shown a marked reduction during the past year. No new outbreaks were reported. Only two outbreaks due to staphylococcus enterotoxin, involving two families, were reported. There has been an increased interest by the medical profession in the diagnosis of mild types of enteritis. This has been shown by the number of specimens submitted to the laboratory for examination, and many types of Salmonella organisms have been isolated.

During the year, epidemiological assistance and direct consultation service was provided from this Division to many local Departments of Health.

The Government has also provided free immunization against Diphtheria and vaccination against Smallpox, last year in some of the unorganized townships in Northern Ontario.

The following tables relative to various communicable diseases are submitted.

TABLE 1  
CEREBRO-SPINAL MENINGITIS

| Year | Cases | Deaths | Morbidity Rate | Mortality Rate | Case Fatality Rate |
|------|-------|--------|----------------|----------------|--------------------|
| 1942 | 276   | 91     | 7.2            | .8             | 13.0               |
| 1943 | 185   | 32     | 4.8            | .8             | 17.2               |
| 1944 | 162   | 24     | 4.             | .6             | 22.2               |
| 1945 | 81    | 11     | 2.             | .2             | 13.5               |
| 1946 | 88    | 21*    | 2.1            | .5*            | 23.8               |

\*Tentative.

It will be noted that while there has been little change in the morbidity rates over the past year, as compared with the year previous, there has been an increase in the mortality rate and quite a significant increase in the case fatality rate, as compared with the previous year. However, deaths as reported by the local Boards of Health are sometimes changed in the final coding compilation, and only 11 deaths have been registered to date by Registrar-General. This would reduce the case fatality rate to 12.5, comparable with 1945.

TABLE 2  
DIPHTHERIA

| Year | Cases | Deaths | Morbidity Rate | Mortality Rate | Case Fatality Rate |
|------|-------|--------|----------------|----------------|--------------------|
| 1942 | 143   | 15     | 4.             | .4             | 10.5               |
| 1943 | 75    | 6      | 1.9            | .1             | 8.                 |
| 1944 | 185   | 11     | 4.5            | .2             | 6.5                |
| 1945 | 253   | 24     | 6.0            | .6             | 9.4                |
| 1946 | 455   | 41*    | 11.3           | 1. *           | 9.                 |

\*Tentative.

As noted in the above table, there has been a marked increase in the number of cases and deaths from Diphtheria in 1946, as compared with any one year in the past five-year period. The morbidity and mortality rates of Diphtheria during the past year are the highest experienced since 1937.

Towards the end of the European War, epidemics of Diphtheria appeared in all occupied countries. In the late Fall of 1945, an upward trend in Diphtheria was noted in Ontario. Many cases of the disease were reported to be due to contact with returning overseas personnel. During 1946, cases of Diphtheria were reported from 32 of the 49 counties and districts. Many municipalities reporting Diphtheria in 1946 had not reported cases in many years. It has been proven beyond doubt that had Ontario not provided immunization

against the disease in the past, that outbreaks similar to those following the last War would have prevailed. Reports show no deaths among persons who had received Diphtheria Toxoid. Over 50% of the deaths were reported in children under four years of age, so the need for more immunization in the early age groups is apparent.

TABLE 3  
TYPHOID FEVER

| Year | Cases | Deaths | Morbidity Rate | Mortality Rate | Case Fatality Rate |
|------|-------|--------|----------------|----------------|--------------------|
| 1942 | 109   | 8      | 2.8            | .2             | 7.3                |
| 1943 | 60    | 9      | 1.7            | .2             | 15.                |
| 1944 | 78    | 7      | 1.9            | .1             | 8.                 |
| 1945 | 58    | 4      | 1.5            | .1             | 6.8                |
| 1946 | 84    | 5*     | 2.9            | .1*            | 6.                 |

\*Tentative.

There was a slight increase in the number of cases of Typhoid fever reported during 1946; 21 of the 26 cases, as shown in the increase, were reported following a mild non-fatality outbreak in Eastern Ontario, in which a carrier was found. There were no outbreaks due to water or milk during the year.

TABLE 4  
POLIOMYELITIS

| Year | Cases | Deaths | Morbidity Rate | Mortality Rate | Case Fatality Rate |
|------|-------|--------|----------------|----------------|--------------------|
| 1942 | 89    | 14     | 2.1            | .2             | 12.5               |
| 1943 | 81    | 7      | 2.1            | .1             | 7.8                |
| 1944 | 332   | 21     | 8.3            | .5             | 6.3                |
| 1945 | 183   | 11     | 4.1            | .2             | 6.1                |
| 1946 | 512   | 30*    | 12.7           | .7*            | 5.8                |

\*Tentative.

There was a marked increase in the number of cases and deaths of Poliomyelitis during the past year, as compared with the previous five-year period. 512 cases and 30 deaths were reported. There was no early indication that an unusual number of cases would occur, as Poliomyelitis is unpredictable. For the past twenty years cases of the disease have been reported with regularity from the majority of the larger cities in the Province, and a certain number of cases for July may always be expected. No appreciable increase was noted until the first week in August, when 24 cases were reported and the principal foci was Ottawa, Windsor and Sarnia.

There were several unusual features observed in the incidence of Poliomyelitis during 1946, as compared with past experience. August was the peak month for the year, 169 cases by dates of onset being reported. With one exception, during the past twenty years, the peak month has been September. During 1946 there was a marked reduction in the number of cases in September, and only 39, 27 and 21 cases were reported during this three weeks period. In the past ten years, the highest number of cases have always been reported during the first two weeks in September. During the first two weeks in October, there

was an increase in the number of cases reported, and a second peak was noted on October 12th, when 37 cases were reported. From then on, the incidence of Poliomyelitis declined until the third week in November, when a third peak occurred. 14 cases were reported. The last peak occurred during the first week in December, when 7 cases were reported. During the month of December, more cases of Poliomyelitis were reported than during any previous December in the history of reporting of Poliomyelitis in the Province.

The geographic distribution of Poliomyelitis during 1946 was rather general throughout the Province, with the exception of eleven counties and districts. Cases were reported from Essex to Carleton County, in the southern part of the Province. In the northern part, only the districts of Algoma, Kenora and Manitoulin did not report cases. While Poliomyelitis was reported from 38 of the 49 counties and districts, only 8 of these counties or districts reported more than a dozen cases. Carleton, Essex and York Counties accounted for more than 60 per cent of the cases. Middlesex, Northumberland and Durham, Stormont, Dundas and Glengarry, Victoria and Wentworth were the counties with 12 or more cases and less than 22.

Of the 512 cases reported, 453 or 88.4% were provided with free hospitalization by the Ontario Government. This included maintenance, physiotherapy and special nursing care for cases receiving treatment in respirators. The treatment was provided in ten approved hospitals, located in strategic centres. The Ontario Government owns and maintains 17 respirators placed in the various hospitals throughout the Province for use on emergency occasions.

The average stay in hospital for the cases ranged from 15 to 43 days. The more severe cases are still undergoing treatment in the various hospitals.

While reports to date are only tentative, about 47% of the cases were of the abortive type. Poliomyelitis is a disease of childhood. 400 or 76.1% of the cases were in the 0-14 age group. 43.5% of the cases in this age group were of the abortive or non-paralytic type of the disease. Of the 146 cases said to have some paralysis on admission, 30, or 27.5%, are reported to have completely recovered. There were 30 deaths reported during the year, a mortality rate of .7 per 100,000. The case fatality rate was 5.8 per cent.

---

The balance of the report consists of statistical data. Table 5 shows the number of cases and deaths of communicable diseases for a comparative five-year period, as compiled from the weekly reports sent in by the 889 municipalities.

Table 6 shows the geographical distribution of certain communicable diseases reported for the year.

Table 7, the monthly incidence of cases and deaths of communicable diseases reported.

Table 8, distribution of literature and record forms used in immunization against Diphtheria, Smallpox, Whooping Cough and Scarlet Fever.

This Division distributes free biological products to physicians and local Boards of Health. Insulin is also distributed free to indigent patients throughout the Province. All distribution and accounting for these products is carried out by this Division, as shown in the following tables.

Tables 9, 10, 11 and 12 deal with the distribution of Insulin to indigent patients.

Table 13 shows the number of vials and cost of the various biological products distributed by months, during the fiscal year 1945-46.

Tables 14, 15, 16 and 17 are tables showing the total costs of the products distributed during the year, and comparative costs for previous year.

Tables 18 to 21 show the annual distribution and cost of Tuberculin.

## DIVISION OF INDUSTRIAL HYGIENE

J. G. CUNNINGHAM, M.B., D.P.H., *Director*

### HEALTH SERVICES IN INDUSTRY

Conditions attendant upon reconversion to a peace-time basis have had a retarding influence in the development of medical services in industry for the maintenance of health. The subject has been under consideration by many companies, small and large. A number of small companies have started this year. It is gratifying that certain other companies with Dominion-wide organization are making provision for a well integrated service of this type. The proposal whereby all industries in certain communities might embark on the project with limited technical help from the Department has been delayed partly from lack of suitable personnel.

There has been an increase in personnel interested in preparation for this type of work but the demand from industry is still not sufficient to warrant any considerable diversion from other medical activities. The position regarding nurses is quite different from that of physicians since nurses are mainly employed by industry on a full time basis. There are about 196 physicians retained on part time basis with only 12 full time. The time of the consulting industrial nurse of the Division is increasingly consumed in finding suitable nurses either for new services or as replacements and in guiding those nurses interested into adequate preparation for the work. This year the University of Western Ontario gave a short refresher course for industrial nurses attended by fifty-one nurses. A group of eight post-graduate nurses at the School of Nursing, University of Toronto, are taking lectures and field work in this subject. Field work for other post-graduate students has been arranged by the Division. Industrial executives have co-operated wholeheartedly in these endeavours. There are at present in Ontario about four hundred and fifty nurses in three hundred and twenty-five industries. The effort is made to keep in touch with them directly and through the various nursing organizations. These nurses supplement the work of the industrial physician in a manner for which there is no substitute especially in the subject of health education, both by personal contact and through the judicious distribution of literature on the subject.

#### *Occupational Diseases:*

More attention has been directed to known exposures which warranted less consideration during the war. There is still some delay in supplying equipment for the engineering control of certain occupational diseases.

#### *Fumes from Electric Furnaces:*

These fumes vary widely in their toxicity. Most of them are not considered to present a special health hazard. The high temperatures at which they are produced favour the removal from a working area by convection currents but there may be still considerable exposure to very fine particles which should be removed from the factory. This can be done with ventilation, but more difficult is the adequate disposal of such dust and fumes. Examination with the electron microscope shows an amorphous dust of less than 0.1 micron particle size. Existing methods are very expensive and not entirely satisfactory. Complaints are received from adjacent premises. The subject of the collection and disposal of these fumes requires research. One municipality has enlisted the services of

the Department of Reconstruction through its contact with the National Research Council for this purpose.

#### *Radioactive Substances:*

Testing to determine exposures in the smelting and refining of pitchblende has continued. The recommendations for control have been acted upon in a co-operative manner by the company. Radium dial painting is greatly curtailed, with corresponding reduction in the hazard from this source. Close check on radiation levels have been made at a salvage operation to recover radium. The demand for uranium in connection with work on atomic energy has increased the supply of radium, stimulating new uses. Some of these already involve gadgets having a wide distribution which may present a hazard to the general public and some affect industrial processes. Specific precautions are necessary but a knowledge of where these articles and substances are to be used is the first requisite.

Equipment for the determination of radon in the breath of workers exposed to radioactive materials has been set up, originally in conjunction with the National Research Council. Considerable technical difficulty has been encountered. The equipment will make possible the measurement of radium to some extent in liquids as well as in gas samples.

Geiger-Mueller tests for information on the storage of radium in bones have been made on ninety employees from three companies.

The Division is represented by Dr. F. M. R. Bulmer on the Project Health Committee of the Petawawa Works of Defence Industries at Chalk River. The control of hazard from radioactive materials has been time consuming in relation to the number of workers involved and to the other work of the Division.

#### *Refining Bauxite:*

The study of those engaged in refining bauxite ore for abrasive purposes has continued. The medical findings have been the subject of a technical paper by Dr. C. G. Shaver, St. Catharines, and Dr. A. R. Riddell, of this Division. The examination of the amount and kind of fumes produced by chemical, spectroscopic x-ray diffraction and other methods proceeds. Animal experiments are under way at the School of Hygiene, University of Toronto. Studies on the subject have been initiated in Great Britain and United States also. A similar condition was reported from Germany during the War.

#### *Electroplating, Porcelain and Storage Battery Manufacture*

Field tests into the efficiency of plastic floats in the control of chromic acid mist over electroplating tanks were carried out. The use of these floats alone is unsatisfactory since concentrations of 20 mg. chromic acid per 10 cu.m. of air were found under these conditions. However, if the floats are used in conjunction with local exhaust, the concentration of chromic acid present in 10 cu.m. was 0.2 mg. as compared with 5 mg. when local exhaust alone was employed to control the mist.

A survey of the dust conditions in the porcelain industry gave the following results. Dust counts in the storage rooms ranged from 10-50 M particles per cu. ft., at fettling operations from 5-50 M, in slip houses from 2-20 M, at clay lathes from 5-20 M, in casting rooms from 1-2 M. Some of these are too high. Crushing operations (one plant only) caused very high counts of 500 M. The use of sagger sand is decreasing due to increased use of continuous kilns. However, although the filling of the saggars with sand is, in general, well controlled, the employing of these saggars gives rise to concentrations of about 7 M particles per cu. ft.

The lead hazard in two storage battery plants is compared. One of these plants purchases the pasted battery plates, thus eliminating the most serious lead hazard. In this plant, concentrations of 0.35 mg. lead per 10 cu. m. of air were found in the casting department, of 0.9 mg. lead in the plate assembly, and of 0.50 mg. lead in the final assembly. In the other plant, the concentrations of lead per 10 cu. m. were as follows: casting department, 1.1 mg.; plate pasting, 1.5-2.5 mg.; plate splitting 1.4-2.0 mg.; plate assembly, 1.9 mg.; final assembly, 0.70 mg. In both plants, local exhaust was provided at each operation with the exception of the final assembly but good housekeeping is essential to prevent lead dust rising from the floor, benches and clothing.

#### *Skin Irritation:*

Occupational dermatitis encountered show solvents and oils as first causative agents, alkalis second, cement third, with various types of glue next. Prominent are cases in which exposure has continued for many years with no effect. Such cases when they develop are apt to resist treatment indefinitely. They emphasize that exposure should be kept at a minimum even if eruption does not appear. There was one group of twenty-five cases of chloracne from exposure to halowax. None presented other clinical evidence of damage. The exposure was discontinued. There were two acute cases of poisoning from nitrobenzene with recovery, from its use as a solvent for removing dyes where much less dangerous solvents were adequate. The number of protracted dermatitis cases which has reached medical care late and the number complicating minor accidents to the skin emphasize the danger of unsuitable home remedies where external irritants have damaged the skin. About four thousand claims for compensation for dermatitis were reviewed in the light of known exposure to irritants partly to detect any unexplained concentration of cases or lack of emphasis on prevention.

#### *Silica Dust:*

Chest x-ray examination with follow-up, including physical examination of suspects in dust trades, has been resumed with the return of staff from the Armed Services. There is a demand for periodic examination of workers in silica trades like granite cutting and foundries. About 1,750 x-ray films were submitted for interpretation regarding the effects of dust from outside the Province. For compensation purposes in the Province nearly 600 claimants were examined with a view to diagnosis and disability rating for silicosis and tuberculosis.

Visitors from Great Britain, Australia, Norway, Belgium and South America included the Division in the course of their enquiry regarding the use of aluminum inhalations for those exposed to silica dust.

Miscellaneous exposures involving a variety of physical examinations or chemical and engineering analyses with recommendations for improvement include the ventilation of large galvanizing tanks, irritation from dust from Brazilian cotton, noise from textile machinery, lead in ship breaking, arseniuretted hydrogen in a tank car, carbon monoxide in garages.

The Division has been unable to meet the demand for chest x-ray of employees where no dust exposure exists. Only thirteen thousand of these have been done this year. Active tuberculosis was discovered in .18 per cent and other chest abnormalities, including those of the heart, in about  $3\frac{1}{2}$  per cent. Chest x-rays as part of preplacement examinations totalled twenty-six hundred, about one thousand of these for the Civil Service Health Centre. The National Sanatorium Association at the Gage Institute has completed arrangements whereby chest x-rays are available as part of physical examination on employment and periodic examination for employees in Toronto when provided by the employer as part of a health service.

*Factory Health Legislation:*

Under the provisions of The Factory, Shop and Office Building Act, engineers of the Division, in co-operation with the Examiner of Plans, Department of Labour, reviewed plans submitted for new factory construction and made recommendations for engineering control of health hazards in the processes to be installed. Very effective work is done at this stage.

Further to the new regulations on terminal grain elevators under this Act specifications for ventilation in more useful form are under consideration. Plans for installation to conform with the regulations are reviewed and visits made where necessary.

Existing regulations are being reviewed in relation to good engineering practice for local exhaust ventilation for the control of dust and fumes. Wide variations exist from one jurisdiction to another. Standard practice in accessible form adapted to specific health needs should facilitate more effective installations. Ventilation for grinding and buffing wheels and woodworking machines have claimed attention first.

Considerable laboratory analyses of samples from exposures to solvents indicate that the less toxic of these materials are in general use. No sample was detected containing benzol which was not labelled to show its presence as required by regulation.

Periodic reports of physical examinations of employees were received from seventeen companies with lead exposure, from six companies with benzol exposure and from three companies with radium exposure. These examinations are required for the detection of any early indication of poisoning due to a breakdown of mechanical measures for control. Blood samples for laboratory examination totalled 3,300 from 123 different physicians representing employees from 94 companies.

Expression should be given to the co-operative arrangements which have existed with the Factory Branch of the Labour Department, Workmen's Compensation Board, Industrial Accident and Prevention Associations, Employer and Employee Groups and, Physicians, in the course of the year.

Dr. G. M. Parker resumed his duties with the Division on his release from Armed Services in August.

Dr. J. R. Card left the service on December 1st for the practice of Dermatology following a period of special training.

*Radium and X-ray for Cancer:*

1. *Radium Emanation Plant*—The demand for radon at the cancer clinics has necessitated the addition of 100 mg. of radium to the emanation plant which is operated by the Department. The distribution has been as follows:

ANNUAL CONSUMPTION OF RADON, 1946

| Centre                                 | Orders | Seeds | Milli-curies | % of total mcs. |
|--|--------|-------|--------------|-----------------|
| 1. Toronto General Hospital.....       | 138    | 4,055 | 3,493        | 48.0            |
| 2. London, Victoria Hospital.....      | 59     | 1,391 | 1,321        | 18.2            |
| 3. Ottawa Civic Hospital.....          | 164    | 1,077 | 1,090        | 15.0            |
| 4. Hamilton General Hospital.....      | 33     | 259   | 321          | 4.4             |
| 5. Windsor, Metropolitan Hospital..... | 27     | 305   | 308          | 4.3             |
| 6. Kingston General Hospital.....      | 38     | 238   | 240          | 3.3             |
| 7. Ottawa General Hospital.....        | 8      | 105   | 162          | 2.2             |
| 8. Other.....                          | 63     | 456   | 335          | 4.6             |
| Totals.....                            | 530    | 7,886 | 7,270        | 100.0           |

2. Following a report of the loss of 60 mg. of radium from one of the hospitals, using the Geiger-Mueller counter, 40 mg. was recovered in ash from the hospital incinerator and 20 mg. from the city dump.

3. The output from x-ray equipment used for cancer therapy has been checked at the cancer clinics and equipment of this type has been calibrated at four other hospitals.

#### *Cyanide Fumigation:*

Under the Act and the Regulations regarding the use of cyanide compounds for fumigation of premises there were issued during 1946 3 new licenses for household, and 3 for commercial purposes.

There were 29 renewals for household fumigation and 18 commercial. The decrease in the number of permits for cyanide fumigation issued in Toronto is ascribed to the wide use of D.D.T.

Methyl bromide is used to some extent in household disinfestation but to a greater degree in commercial fumigation. This substance also presents a hazard. Fortunately there have been no accidents from the use of cyanide for this purpose during the year.

#### *Bedding Regulations:*

Nearly all Ontario manufacturers have co-operated with the Department. During most of the year suitable cloth for labels has been scarce. About 2,500 articles placed off sale or returned voluntarily to the manufacturer by the retailer due to mislabelling have come mainly from outside the Province. This situation has shown marked improvement due to inspection as these manufacturers become more familiar with what is required.

Unit or municipal Health Departments have undertaken to assist in the detection of unlabelled goods while sampling and testing remains with the Department. More attention can now be given to mislabelling. There were 250 samples of material collected and subjected to laboratory analysis. One-third of these gave tests for new material, and two-thirds for used material. About 2,200 inspection visits have been made, thirty per cent to manufacturers, fifty per cent to retailers, five per cent to suppliers, ten per cent to renovators and a miscellaneous group.

## ANALYSES AND FACTORY VISITS FOR LABORATORY ENQUIRY

| TYPE OF INDUSTRY                | No. of Samples | No. of Companies | INSPECTIONS   |                  | HAZARD  |
|---------------------------------|----------------|------------------|---------------|------------------|---|
|                                 |                |                  | No. of Visits | No. of Companies |   |

## THE REPORT OF CHIEF SANITARY INSPECTOR

The year just closed has brought the retirement of Mr. John Richardson, Provincial Sanitary Inspector, after 26 years service in the North Bay district, and the retirement of Mr. Hugh McIntyre after 20 years service in the Kirkland Lake district.

Mr. S. Harris, on his return to duty from active service overseas, has taken over the work in the North Bay district, and Mr. D. J. Wood, recently appointed,

has taken over the work in the Kirkland Lake district. Mr. A. S. O'Hara has resumed his duties in the Kenora district after an absence of six years on active service. Mr. Geo. Powell returned in January from military service and is now located in Timmins. Mr. D. E. Moore returned from active service overseas during the early part of the year and has now been granted six months' leave of absence to resume his studies at the Toronto University.

To fit in with the return of the District Sanitary Inspectors from overseas, the district boundaries covered by the Inspectors were adjusted accordingly. In these adjustments, consideration was given to the changed location of the various industrial camps and other conditions.

During the past year, industrial operators have shown a much keener interest in the Regulations, and have worked in close co-operation with the district Sanitary Inspectors in an effort to develop better living and environmental conditions in the logging camps. This is important since the camps are gradually moving further from community life.

More frequent meetings and consultations were encouraged with the operators dealing with such subjects as the Regulations, health services, sanitary conveniences, and the development of recreational centres, reading rooms, moving pictures, etc., in these camps. Where moving picture facilities were available, arrangements were made through the District Sanitary Inspector's office to include educational films in French and English on the control of venereal disease. These films were loaned through the courtesy of Dr. W. G. Brown, Director of V. D. Control, and were much appreciated by the employer and employees.

During the year, the larger operators have given consideration to such improvements as electric lights in all camps, central heating systems, water flush toilet facilities, pumping systems to provide hot and cold running water for showers, laundries, etc. Many camps are now provided with these features and we hope they will be extended further in all camps in the near future.

The development of more general use of the two-way radio telephone systems to many of these isolated bush camps is proving very successful and economical and has assisted very materially in establishing close contact with the medical service and hospital centres and in the care of sickness and accidents in the camps.

#### *Industrial Operations:*

The following records show the number of operators, their camps and workmen employed in the various industries which are subject to the Regulations:

| INDUSTRY                     | Number of Operators | Number of Camps | Number of Men Employed |
|------------------------------|---------------------|-----------------|------------------------|
| Pulpwood camps.....          | 83                  | 411             | 22,407                 |
| Lumber camps.....            | 114                 | 239             | 10,254                 |
| Sawmill camps.....           | 64                  | 78              | 3,031                  |
| Mining camps.....            | 57                  | 57              | 6,391                  |
| Construction camps.....      | 25                  | 30              | 5,118                  |
| Extra B. & B. Ry. camps..... | 2                   | 57              | 1,044                  |
|                              | 345                 | 872             | 48,245                 |

*Lumber and Pulpwood Camps*

In an effort to meet the present demand for wood products and to counteract the shortage of experienced labour, many operators have extended the usual six months seasonal operations into a nine or twelve month operation when workmen were available.

The volume of routine inspection and follow-up work involved in the sanitary supervision of these camps is limited by the distances to be travelled, as many of the camps are now located many miles from the nearest rail centres, and by the lack of proper transportation facilities.

*Mining Camps:*

From records received, fifty-six mining companies were operating in the unorganized areas, showing a total of 6,391 workmen employed. The apparent dearth of experienced miners curtailed mining activities considerably during the year. Reports were received from the District Sanitary Inspectors on many new mining development camps located along the Groundhog River area in the Sudbury Mining Division, the Sault Ste. Marie Mining Division, Red Lake area, and the Port Arthur Mining Division.

*Construction Camps:*

Construction work on the four paper mills at Espanola, Marathon, Terrace, and Nipigon, was extended to the end of the year and will be continued into 1947. Eight highway construction camps gave employment to 800 workmen on the construction of the new highway between Quebell and the Red Lake mining area.

*Medical and Sanitary Supervision:*

While a preference is given to the nearest and most accessible resident physician to the camps and workmen in the Departmental approval of medical and sanitation contracts under the Regulations, the distance from the doctor's office and the hospital centres to the camps and workmen involves considerable time and difficulties. Airplane service, when available to the camps, is now used extensively and has assisted very materially in the medical care of the workmen and in the sanitary supervision and inspections, more particularly where large groups of camps are located in the same area.

During the year the records show 48,245 workmen were employed in the territorial districts without municipal organization. The following summary will indicate the amount and nature of the work involved in the medical care of the workmen and sanitary supervision of camps during the past year.

| Number of Medical and Sanitation Contracts                        | Number of Contract Physicians         | Number of Assistant Physicians | Number of Physician's Monthly Reports | Number of Inspector's Reports |
|---|---------------------------------------|--------------------------------|---------------------------------------|-------------------------------|
| 305   | 117                                   | 61                             | 4,096                                 | 1,176                         |
| MEDICAL SERVICE RENDERED AS REPORTED BY THE INDUSTRIAL PHYSICIANS |                                       |                                |                                       |                               |
| Number of Workmen Employed  | Number of Workmen Requiring Treatment | Routine Examinations           | Communicable Diseases                 | Immunizations                 |
| 48,245  | 25,658                                | 12,660                         | 1,469                                 | 1,898                         |

It will be noted 4,096 visits of inspection were made by the Contract Physicians, combined with 1,176 investigations and inspections made by the District Sanitary Inspector, showing a total of 5,272 visits of inspection made during the year in the sanitary supervision of the camps and the medical care of the workmen.

#### *Communicable Diseases:*

The incidence of communicable diseases is comparatively low taking into consideration the lack of modern conveniences in camp life and the improvised nature of housing, food handling, and drinking water supplies, etc. The absence of typhoid fever again this year in this large group of workmen is noted. The record of communicable diseases as reported by the Industrial Physicians appears to have been confined to mild sporadic outbreaks, which were limited to small groups of workmen, some of which were as follows:

| Disease                 | No. of Cases |
|-------------------------|--------------|
| Septic Sore Throat..... | 84           |
| Pneumonia.....          | 17           |
| Diphtheria.....         | 4            |
| Measles.....            | 33           |
| Influenza.....          | 431          |
| Chicken Pox.....        | 21           |
| Scabies.....            | 67           |
| Mumps.....              | 42           |
| Conjunctivitis.....     | 24           |
| Scarlet Fever.....      | 9            |
|                         | <hr/> 732    |

Thirty-two cases of venereal disease were placed under subsequent treatment at the camps or at the treatment centres. Such diseases as dysentery, diarrhoea, impetigo, infectious jaundice, mumps, ringworm, and trench mouth were also reported by the Industrial Physician.

Apart from investigations made by the District Inspectors relative to communicable diseases in camps, 341 investigations were made in respect to communicable disease in the unorganized territory of which 198 notices were served by the Inspectors under the V. D. Control Division.

#### *Unorganized Communities:*

In the sanitary supervision of the unorganized settlements, of which there are approximately 500, showing a population of from 200 to 1,000 persons, investigations of complaints and routine inspections were carried out in the limited amount of time available during the spring and summer months.

#### *Organized Municipalities:*

Frequent calls have been made during the year on the Provincial Sanitary Inspectors to assist the local part-time health officials in the sanitary supervision of their municipalities. Seventy-two investigations were made in connection with this work during the year.

#### *Rural School Inspections:*

In the unorganized districts, 198 public and separate school inspections were made. This work is usually carried out in the early spring and summer before school closes for summer months, enabling sanitary improvements and installations to be carried to completion during the school recess.

*Tourist Camp Inspections:*

During the tourist season, mainly July and August, the influx of tourists to the summer resorts in the unorganized districts far surpassed other years. In the investigations of complaints and in the sanitary supervision of water supply, milk and food control, a total of 168 tourist camps were inspected.

In the early part of the year a request was made by the Department of Lands and Forests for a sanitary survey to be made of all District Foresters' Headquarters camps regarding housing of employees, water supplies and sewage disposal. This work was carried out by the District Sanitary Inspectors, and reports and recommendations were sent to the Department officials.

*Improvement Districts:*

Under the Department of Municipal Affairs ten improvement districts are now established in the unorganized districts. In the absence of local public health personnel within these semi-organized municipalities, the district Provincial Sanitary Inspectors are called upon to investigate all complaints and render the required routine inspections and sanitary supervision under The Public Health Act and Regulations.

## REPORT OF CIVIL SERVICE HEALTH CENTRE

In reviewing the work of the Health Centre during the past year, one notes that there has been:

1. An increase in the work of the Centre.
2. A broadening in the Centre's activities.

As regards the increase in work, the figures for the year show a considerable jump over those of 1945. This is due in part to the addition of another doctor and a third nurse to the staff, in the latter half of the year, and in part to the fact that more people are passing through the Health Centre.

The greater volume of work, as reflected in the figures, is a healthy sign, but one feels that these same figures do not tell the whole story. Consultations require a varying amount of time and it is not uncommon to spend an hour or more, with one person. Within reason, time is a secondary factor, the patient's condition being the essential consideration.

As for the broadening of the Health Centre's activities, a unit has been opened in the Main Building, but response to it has not been encouraging. There is no waiting room and women object to waiting in the corridor, especially since that is in close proximity to the men's washroom. However, it is yet too soon to draw any conclusions as to the value, and appreciation, of this unit since it has been in operation for only one month.

A rest room at Osgoode Hall will be opened shortly. This will call for the services of a nurse for at least one half day per week and, together with the nursing demands for the unit in the main building, will necessitate an addition to our nursing staff. Mention of additional staff reminds one that another clerk is urgently needed.

It is becoming more widely recognized that our records are confidential and this, in turn, means that more and more people are availing themselves of the services offered.

Nutritional problems continue to rate high in the list of requests for information. No opportunity is missed to "spread the word" relating to the educational aspect of the work.

After approximately two years in our present location it is surprising how many civil servants are as yet unaware of our efforts to better their lot. This surely indicates the need for more publicity on our part.

## TOTAL VISITS TO DISPENSARY, 8,706

| TOTAL.....  | 8,706 |

## DIVISION OF LABORATORIES

E. L. BARTON, M.D., *Director*

The Division of Laboratories at the end of 1946 consisted of the Central Laboratory in Toronto, eight Regional Laboratories and six Subsidized Laboratories. The Regional Laboratories are situated at Fort William, Kingston, London, North Bay, Ottawa, Sault Ste. Marie, Timmins and Windsor. Subsidized Laboratories are located at Belleville, Peterboro, Kitchener, Stratford, St. Catharines and Woodstock.

On the staff of the Central Laboratory, which includes the East Block unit, 1011 Queen Street West (Outfit Preparation Section and Virus Laboratory) and Mimico (Serological Laboratory), there are 135 staff members. The staff of the Regional Branch Laboratories total 90 members. The total number of members on the staff of the Division is 225.

On March 31st of this year Dr. W. B. McClure, Director, resigned to return to Kongmoon, South China, as a Medical Missionary. Dr. McClure joined the staff in June, 1932, as Bacteriologist and assumed Directorship at the Central Laboratory in June, 1945. During his association with the Division of Laboratories Dr. McClure contributed greatly to the laboratory and his departure was regretted by all members of the Division.

All members of the Division of Laboratories who served in the Armed Forces have returned to duty, with the exception of Mr. J. Beilby, of our Ottawa Regional Laboratory, who is convalescing at Christie Street Hospital, Toronto.

Our hopes in regard to the establishment of complete laboratory services in our subsidized laboratories have not been fulfilled this year, due to the difficulty in construction and the difficulty in obtaining essential laboratory equipment.

On October 1, 1946, a change in administration of our Kingston Laboratory was effected whereby the work which had been carried on previously by Queen's University, Kingston, is now under the direction of Dr. J. H. Orr. The laboratory services in the Kingston area are being conducted in our Regional Laboratory in that city. The Subsidized Laboratory operated in the Richardson Laboratory was the first Branch Laboratory to be established in the Province. This was established in 1905. Laboratory services in the Richardson Laboratory were under the direction of Dr. James Miller, Professor of Pathology, of Queen's University. Dr. Miller acted as consultant in Pathology to the Division for many years.

On October 1, 1946, the Branch Laboratory in London was made a Regional Laboratory. Before this time, this laboratory was subsidized and operated by the University of Western Ontario under the direction of Dr. A. J. Slack. This laboratory was established as a Subsidized Laboratory in 1911. Under this change in administration our London Laboratory is now a Regional Laboratory and the staff members are members of the Division. The accommodation for our laboratory quarters in London is provided by the University of Western Ontario and Dr. W. M. Wilson, formerly Pathologist of the laboratory, took over the duties of Director.

On February 14, 1946, arrangements were made with the Kitchener-Waterloo Hospital for the establishment of a Subsidized Laboratory in that centre. This laboratory is under the directorship of Dr. L. Fischer. Due to the scarcity of

essential equipment the scope of this laboratory is limited at the present time. It is expected, however, that all the necessary laboratory procedures will be carried out in this laboratory at the beginning of 1947.

A Subsidized Laboratory has been established in Woodstock and in August of this year this laboratory took over the work for the County Health Unit in Oxford County. The services of this laboratory were extended to the physicians in Oxford County. An evening of demonstrations was carried out for the Oxford County Medical Society and consisted of eight demonstrations which were presented by members of the Central Laboratory staff. The Woodstock Laboratory is situated in the Ontario Hospital, Woodstock, of which Dr. A. E. Clarke is Superintendent. Mr. Robert Karn is in charge of the laboratory.

The scope of the Subsidized Laboratory in the Stratford General Hospital, under the directorship of Dr. S. J. C. Miller, is limited at the present time due to the lack of equipment, but it is hoped that this laboratory will take over all the required laboratory services for that area at the beginning of the next year.

Our laboratory quarters in Timmins are inadequate at the present time, due to the small space which has been allotted to this laboratory in the St. Mary's Hospital, Timmins. It is hoped that in the coming year suitable quarters may be obtained for the establishment of more satisfactory laboratory services for this area. This laboratory showed an increase of 4,074 examinations over the previous year and this increase is due both to an increase in bacteriological examinations and also to clinical pathological examinations. The present space and lack of trained personnel adds to the burden of Miss MacPherson and members of her staff.

During the year arrangements were completed with the municipality of the City of Windsor and a laboratory has been constructed at 2090 Wyandotte Street East, in Windsor, in a building purchased by that city to house the local Medical Officers of Health and our Regional Laboratory. Mr. W. J. A. Percy is in charge of this laboratory and equipment and staff were transferred to the new quarters on December 23, 1946. Up to the present time the work for the Windsor area, carried on in our Windsor Laboratory, has been restricted to procedures which were carried out previously by the local municipal laboratory. In the first part of 1947 the laboratory services will be extended to the physicians of Windsor and Essex County.

Difficulty in the construction of a laboratory in the Kirkland Lake District Hospital at Kirkland Lake has made it impossible to open the laboratory for the Kirkland-Larder Lake area, but the work of carrying out alterations to this laboratory is proceeding satisfactorily at the present time and it is expected that this laboratory will be in operation in the early part of 1947.

During the year 1946 a total of 1,214,421 examinations were carried out by the Division of Laboratories. This is an increase of 175,191 examinations over the previous year. This total consists of 1,192,662 examinations as noted in Table 1, with the addition of 9,709 examinations being performed in our Timmins Laboratory, 7,125 examinations in the Windsor Laboratory and 4,925 examinations in our Woodstock Laboratory. A total of 201,730 examinations were carried out for the Armed Forces during the year. This is a decrease of 86,915 examinations as compared with the year 1945. It is gratifying to note that the total volume of work carried out by the Division of Laboratories has increased considerably in spite of the fact that the work done for the Armed Forces during the recent World War II has decreased. In addition to the work done for the Armed Services examinations were carried out for the Department of Veterans Affairs in the amount of 17,300.

The following shows the distribution of work carried on in our Regional Laboratories in 1946, as compared with the year 1945:

| Location             | Volume 1945 | Volume 1946 | Increase |
|----------------------|-------------|-------------|----------|
| Toronto.....         | 515,583     | 608,776     | 93,193   |
| London.....          | 148,502     | 172,101     | 23,599   |
| Ottawa.....          | 140,512     | 146,189     | 5,677    |
| Fort William.....    | 43,540      | 56,903      | 13,363   |
| North Bay.....       | 36,786      | 47,086      | 10,300   |
| Sault St. Marie..... | 16,123      | 18,243      | 1,920    |
| Kingston.....        | 70,397      | 78,017      | 7,620    |
| Windsor.....         | .....       | 7,125       | .....    |

At the present time accommodation at the Central Laboratory in Toronto prohibits any further extension of laboratory services. The laboratory is scattered in several parts of the city, prohibiting efficient administration and increasing the operating expenses. In the near future lack of satisfactory laboratory accommodations may make it necessary to curtail some of the activities of this laboratory.

On taking over the duties of Director of Laboratories I wish to extend my sincere thanks to members of the Central Laboratory staff and the Directors of our Branch Laboratories and their staffs for the valuable assistance and co-operation which they have shown. May I extend my appreciation to administrative officers of the Department and laboratory consultants for their counsel and advice.

Following is a summary of the work conducted in the Central Laboratory, along with reports from Mr. A. R. Bonham, Chief Provincial Analyst and Dr., M. C. Dinberg, Provincial Pathologist, as well as from each of the Directors of the Branch Laboratories:

TABLE 1

| TYPE OF SPECIMEN                                | Tor-onto | Lon-don | Ot-tawa | Fort Wil-liam | Rich. Lab. King-ston | North Bay | Peter-boro | Sault Ste. Marie | King-ston | Belle-ville | St. Cath-arines | Total  |

Table 1 shows the distribution of examinations conducted at each of the laboratories in the Division, along with the diagnostic outfits distributed during 1946.

*Diphtheria:*

Table 2 indicates the number of examinations conducted for the isolation of *C. Diphtheriae*, 15.98 per cent of which yielded positive results. Virulence tests were performed on 698 specimens. Some of these were from pure cultures and others were from field cultures on tellurite slants; 66.18 per cent were positive.

TABLE 2  
DIPHTHERIA—CULTURE AND VIRULENCE TESTS

| CULTURES |          |          | VIRULENCE TESTS |          |               |
|----------|----------|----------|-----------------|----------|---------------|
| Number   | Positive | Negative | Positive        | Negative | Not Performed |
| 6,750    | 1,079    | 5,671    | 462             | 236      | 393           |

Identification of strains of *C. diphtheriae* was carried out on pure cultures submitted from Branch Laboratories and from isolations of strains from our own cultures at the Central Laboratory. Table 3 shows the incidence of types isolated. It has been interesting to note that the diphtheria which has been prevalent in the Province this year is not due to one particular type, but that the pattern presented shows that the various types of diphtheria are localized in the community in which they occur, without spreading extensively to other areas. The Intermediate type is the most prevalent type in the Province at the present time.

TABLE 3  
TYPES OF *C. DIPHTHERIAE*

| Intermedius | Mitis | Gravis | Not Tested | Total |
|-------------|-------|--------|------------|-------|
| 221         | 32    | 56     | 770        | 1,079 |

*Tuberculosis:*

TABLE 4  
MICROSCOPIC SMEAR EXAMINATION FOR *M. TUBERCULOSIS*

| Number Examined | Number Positive | Per Cent Positive | Number Negative | Per Cent Negative |
|-----------------|-----------------|-------------------|-----------------|-------------------|
| 29,988          | 2,385           | 7.95              | 27,603          | 92.05             |

Microscopic examination for *M. tuberculosis* has increased by 12,118 in the Division over the previous year. There was an increase of 5,730 in the Central Laboratories. Table 4 indicates the percentage of positive examinations obtained on smears in our Tuberculosis section.

TABLE 5  
CULTURAL EXAMINATIONS FOR M. TUBERCULOSIS

| TOTAL.....         | 19,512              | 498         | 802     | 1,300          | 18,212         | 6.6               |

Table 5 shows the results of cultures examined for *M. tuberculosis* in the Central Laboratory along with an indication as to the type of specimen examined. A total of 498 examinations were positive at the end of a four-week incubation period, and 802 were positive after eight weeks incubation. In the Division of Laboratories there was an increase of 5,516 cultural examinations for *M. tuberculosis* and 3,536 in the Central Laboratory, over the year 1945.

| Miscellaneous..... | 16       | 4        | 0        | 26       | 1        | 2        |
| TOTAL.....         | 87       | 26       | 8        | 126      | 7        | 23       |

The results of cultural and smear examinations for Actinomycosis are noted in Table 8. A total of 5 positive examinations were made on specimens submitted requesting examination for Actinomycosis and 18 positive cultural examinations were made on specimens in which no indication was made on the accompanying data sheet. It should be remembered that the figures presented in this table do not indicate the incidence of Actinomycosis since they include one or more specimens from the same patient.

221 examinations were made to identify the type of *Streptococcus haemolyticus* which was isolated from specimens submitted. 106 throat cultures were examined from inmates of an Industrial School for an outbreak of scarlet fever that occurred. The majority of these specimens proved to be *Haemolytic streptococcus*, Group A, type 17.

| Total Number Examined.....         | 20,884          | 20,884          | .....             |

A total of 26,690 examinations were carried out in the Enteric Disease section in 1946, under the direction of Miss V. Crossley. This is an increase of 4,678 over the year 1945. Besides the routine diagnostic tests which are carried out in this section, antigens for agglutination tests, antisera for the identification of strains and the identification of pure cultures submitted from other laboratories have been carried out. During the year 1946 a total of 16,955 mls. of concentrated antigen were prepared and 13,422 mls. of antigen were distributed.

A total of 2,258 mls. of antisera were prepared by animal inoculation. Some of the pure cultures were submitted from other Provinces in Canada and requests have been received to train technicians in the identification of enteric pathogens from laboratories outside the Province. A kit consisting of polyvalent antisera has been prepared under Miss Crossley's direction and has been distributed to the Branch Laboratories to assist in the identification of *Salmonella* organisms. With this kit Branch Laboratories will be able to determine whether or not the organism isolated is a pathogenic *Salmonella* organism and the culture can then be forwarded to the Central Laboratory in Toronto for complete identification. In this way Branch Laboratories without the facilities of carrying on complete identification of strains isolated can notify the physician submitting the specimen that the strain belongs to the *Salmonella* and reports in this way are accelerated. A total of 20,884 agglutination tests were carried out in 1946. These are indicated in Table 10.

TABLE 11  
ENTERIC DISEASES—FECES CULTURES

| ORGANISMS ISOLATED                            | Number Positive | Per Cent |
|---|-----------------|----------|
| <i>S. typhi</i> .....                         | 97              | 3.12     |
| <i>S. paratyphi B</i> .....                   | 107             | 3.44     |
| <i>S. typhimurium</i> .....                   | 27              | .87      |
| <i>S. bredeney</i> .....                      | 4               | .13      |

| <i>S. potsdam</i> .....                       | 2               | .06      |
| <i>S. derby</i> .....                         | 2               | .06      |
| <i>S. oranienburg</i> .....                   | 5               | .16      |
| <i>S. thompson</i> .....                      | 2               | .06      |
| <i>S. newport</i> .....                       | 21              | .60      |
| <i>S. bareilly</i> .....                      | 12              | .34      |
| <i>S. montevideo</i> .....                    | 1               | .03      |
| <i>P. morgani</i> .....                       | 31              | .88      |
| <i>Sh. paratyphenteriae</i> Flexner .....     | 9               | .25      |
| <i>Sh. paratyphenteriae</i> Sonne .....       | 3               | .097     |
| <i>Haemolytic staphylococcus aureus</i> ..... | 6               | .19      |
| Number Positive .....                         | 331             |          |
| Number Negative .....                         | 2,774           |          |
| Number Examined .....                         | 3,105           |          |

3,105 examinations were carried out on specimens of feces submitted for cultural examination. Organisms isolated from such specimens are indicated in Table 11.

TABLE 12  
ENTERIC DISEASES—PHAGE TYPING OF *S. TYPHI* STRAINS

| Type A | Type C | Type E | Type F | Types G,<br>J, L & M | Beta<br>Form | Gamma<br>Form | Total |
|--------|--------|--------|--------|----------------------|--------------|---------------|-------|
| 6      | 25     | 85     | 6      | 0                    | 0            | 23            | 146   |

Bacteriophage typing of strains of *S. typhi* is shown in Table 12 and types C and E are still the most common types of this organism isolated.

TABLE 13  
ENTERIC DISEASES PHAGE TYPING OF *S. PARATYPHI B* STRAINS

| Type 1 | Type 2 | Type 3a | Type 3a1 | Type 3b | Not yet typed<br>Further work<br>to be done | Total |
|--------|--------|---------|----------|---------|---|-------|
| 17     | 1      | 4       | 26       | 49      | 72  | 169   |

Bacteriophage typing of *S. paratyphi B* strains was started this year. A total of 169 strains have been examined, the most common type being Type 3B. These are indicated in Table 13.

TABLE 14  
ENTERIC DISEASES PARASITIC OVA AND AMOEBIC CYSTS

| PARASITIC OVA                  | Number | AMOEBIC CYSTS                | Number |
|--------------------------------|--------|------------------------------|--------|
| <i>Enterobius vermicularis</i> | 109    | <i>Entamoeba coli</i>        | 8      |
| <i>Ascaris lumbricoides</i>    | 3      | <i>Entamoeba histolytica</i> | 1      |
| <i>Taenia saginata</i>         | 2      | <i>Iodamoeba butschlii</i>   | 2      |
| <i>Necator americanus</i>      | 1      | <i>Giardia lamblia</i>       | 1      |
| TOTAL: Positive                | 118    | TOTAL: Positive              | 12     |
| Negative                       | 2,190  | Negative                     | 150    |
| Examined                       | 2,314  | Examined                     | 162    |

The number of examinations made for parasitic cysts and ova have doubled during the past year. A total of 2,476 examinations were performed. Table 14 indicates the results of the examinations carried out on specimens of feces and anal swabs submitted for the identification of parasitic cysts and ova.

TABLE 15  
ENTERIC DISEASES CULTURES SUBMITTED FOR IDENTIFICATION

| IDENTIFICATION                  | Number | IDENTIFICATION                 | Number |
|---------------------------------|--------|--------------------------------|--------|
| <i>Aerobacter aerogenes</i>     | 8      | <i>Salmonella enteritidis</i>  | 4      |
| <i>Aerobacter cloacae</i>       | 3      | <i>Salmonella gallinarum</i>   | 2      |
| <i>Alcaligenes faecalis</i>     | 7      | <i>Salmonella newport</i>      | 12     |
| <i>Eberthella kandiensis</i>    | 1      | <i>Salmonella oranienburg</i>  | 6      |
| <i>Escherichia coli</i>         | 31     | <i>Salmonella paratyphi B</i>  | 20     |
| <i>Proteus vulgaris</i>         | 26     | <i>Salmonella pullorum</i>     | 2      |
| <i>Proteus americanus</i>       | 2      | <i>Salmonella tennessee</i>    | 2      |
| <i>Proteus mirabilis</i>        | 8      | <i>Salmonella typhi</i>        | 88     |
| <i>Proteus rettgeri</i>         | 3      | <i>Salmonella typhimurium</i>  | 88     |
| <i>Proteus morgani</i>          | 6      | <i>Shigella alkalescens</i>    | 8      |
| <i>Salmonella bareilly</i>      | 6      | <i>Shigella sonnei</i>         | 3      |
| <i>Salmonella bonariensis</i>   | 2      | Paracolon group                | 87     |
| <i>Salmonella bredeney</i>      | 2      | Spore formers                  | 8      |
| <i>Salmonella cholerae suis</i> | 6      | <i>Bacterium proteolyticus</i> | 8      |
| <i>Salmonella columbiensis</i>  | 3      | TOTAL                          | 346    |

Table 15 indicates cultures submitted for the identification of organisms. A total of 346 cultures were submitted for identification as compared with 273 for the previous year.

*Gonococcus:*

TABLE 16

CULTURAL EXAMINATION FOR GONOCOCCUS FROM  
GENITO-URINARY SPECIMENS

|  |       |  |
|--|-------|--|
| Culture positive, smear positive.....      | 184   |  |
| Culture positive, smear extracellular..... | 107   |  |
| Culture positive, smear negative.....      | 47    |  |
| Total Positive cultures.....               | 338   |  |
| Smear positive, culture negative.....      | 25    |  |
| Total Positive Specimens.....              | 363   |  |
| Smear negative, culture suspicious.....    | 38    |  |
| Smear extracellular, culture negative..... | 9     |  |
| Total Doubtful Specimens.....              | 47    |  |
| Total Negative Specimens.....              | 3,366 |  |
| Total Examinations.....                    | 3,776 |  |

Table 16 shows the results of cultural examination for gonococcus from genito-urinary specimens. The number of cultural examinations being done were 3,776. Of this total, 154 examinations were positive by cultural examination and these were not considered positive by microscopic examination. A survey is being carried out to test the efficiency of specimens being submitted by mail.

*Spinal Fluids:*

TABLE 17

## BACTERIOLOGICAL EXAMINATION OF SPINAL FLUIDS

|   |    |       |
|---|----|-------|

| HAEMOLYTIC STREPTOCOCCUS (Gr. A):             |    |       |
| Smear and culture positive.....               | 3  |       |
| HAEMOPHILUS INFLUENZA:                        |    |       |
| Smear and culture positive.....               |    | 13    |
| HAEMOLYTIC STAPHYLOCOCCUS AUREUS:             |    |       |
| Smear and culture positive.....               |    | 1     |
| TUBERCLE BACILLI:                             |    |       |
| Direct smear positive.....                    | 12 |       |
| Animal inoculation positive.....              | 14 |       |
|   |    | 26    |
| SUSPECTED POLIOMYELITIS.....                  |    | 165   |
| CELLS INCREASED, CULTURE NO GROWTH.....       |    | 289   |
| CELLS NOT INCREASED.....                      |    | 1,272 |
| Total Examinations.....                       |    | 1,775 |

Bacteriological examination of spinal fluids is noted in Table 17. A total of 1,775 examinations were carried out at the Central Laboratory, of which 165 were suspected cases of Poliomyelitis showing an increase in cell count.

*Blood Cultures:*

TABLE 18

## ORGANISMS ISOLATED FROM BLOOD CULTURES

|                                       |       |
|---------------------------------------|-------|
| Haemolytic streptococcus (Gr. A)..... | 12    |
| Streptococcus viridans.....           | 70    |
| Non-haemolytic streptococcus.....     | 4     |
| Haemolytic staphylococcus aureus..... | 125   |
| Salmonella typhi.....                 | 16    |
| Salmonella paratyphi B.....           | 5     |
| Salmonella oranienburg.....           | 1     |
| Brucella abortus.....                 | 6     |
| Pneumococcus.....                     | 4     |
| Total Positive Examinations.....      | 244   |
| Total Negative Examinations.....      | 3,485 |
| Total Examinations.....               | 3,729 |

Blood cultural examinations totalled 3,729, of which 244 showed pathogenic organisms. It is interesting to note that six cultures showed the presence of *B. abortus*. These organisms have been cultured from six blood cultures submitted since the time that 10 per cent carbon dioxide was placed in the bottle containing the medium. Before this procedure was adopted specimens submitted for the isolation of *B. abortus* invariably produced negative results.

*Penicillin Sensitivity:*

| less<br>.003                 | ..                            | ..                                    | 6                               | ..                                      | 5                  | 1                 | ..                 |
| Total..                      | 448                           | 27                                    | 95                              | 3                                       | 52                 | 27                | 5                  |

Grand Total: 657.

Penicillin sensitivity tests have been carried out throughout the year, 657 examinations being performed. It is interesting to note that during 1945 the highest resistance of any organism to penicillin was 5 standard units. As indicated in Table 19 resistance of some organisms isolated has increased to such an extent that 11 cultures of Haemolytic staphylococcus aureus and 2 cultures of Streptococcus haemolyticus were resistant to as much as 50 standard units of penicillin.

#### *Virus:*

TABLE 20  
VIRUS SPECIMENS

|                                   |     |
|-----------------------------------|-----|
| Lymphocytic choriomeningitis..... | 9   |
| Encephalitis.....                 | 5   |
| Poliomyelitis.....                | 9   |
| Virus pneumonia.....              | 13  |
| Psittacosis.....                  | 14  |
| Lymphogranuloma venereum.....     | 12  |
| Acrodynia.....                    | 1   |
| Foot-and-Mouth disease.....       | 1   |
| Infantile diarrhoea.....          | 16  |
| Psittacosis (Birds).....          | 84  |
| Rabies (Dog Heads).....           | 6   |
| Total.....                        | 170 |

Under the able direction of Dr. N. A. Labzoffsky 170 examinations were carried out for virus diseases. Considerable research is being carried out on virus diseases and the rapid agglutination test which was devised by Dr. Labzoffsky shows considerable promise as a laboratory aid in the diagnosis of psittacosis and ornithosis. Of the 12 specimens examined for Lymphogranuloma venerum, 3 were found positive, one being from a civilian patient and two from patients in the Armed Services. Only two specimens submitted for complement fixation test for psittacosis showed a reaction and these were not of sufficient intensity to be regarded as positive. Table 20 indicates the type of examinations carried out in the virus laboratory.

#### *Media and Stains:*

TABLE 21

##### MEDIA AND STAINS

|                                   |               |
|-----------------------------------|---------------|
| Liquid media.....                 | 3,426 litres  |
| Solid media.....                  | 2,884 "       |
| Stains.....                       | 657 "         |
| Saline.....                       | 229 "         |
| Poured plates.....                | 77,781 plates |
| Egg media.....                    | 114,893 tubes |
| Laked blood for G.C.....          | 12,000 "      |
| Wax ampoules for dark fields..... | 2,850 "       |
| Bottles for feces outfits.....    | 8,374 bottles |
| Bottles for blood cultures.....   | 3,634 "       |
| N/1 NaOH used.....                | 1,096 ounces  |
| Distilled water used.....         | 1,007 gallons |

Table 21 indicates the volume of work which has been performed by our Media Section at the Central Laboratory, during 1946.

#### *Outfit Preparation:*

The preparation of outfits for distribution to physicians and hospitals is indicated at the foot of Table 1.

## CHEMISTRY SECTION

A. R. BONHAM, B.A.Sc., F.C.I.C., *Chief Provincial Analyst*

There were 3,358 more blood samples submitted for test in the Chemical Section of the Central Laboratory during 1946 than in the preceding year. Likewise there were 1,435 more liquor analyses made for the Liquor Control Board. The increase in the blood specimens amounted to 11.8 per cent and consisted almost solely of blood sugars, while the increase in liquor analyses was more pronounced at 46.2 per cent.

Concerning medicinal and laboratory products produced in the Section, there was 40.6 per cent more colloidal gold solution prepared over the previous year, and 762 more one-half ounce bottles of one per cent Silver Nitrate solution manufactured for distribution. There was also a reasonable increase in the amount of ordinary distilled water produced, but an appreciable drop in the number of 20 cc. ampoules of sterile distilled water. There was no manufacture of suspension of either bismuth or mercury since its discontinuance late in 1945.

Following is a summary of medicinal and laboratory products prepared during the year 1946:

|                               |  |
|-------------------------------|--|
| Ordinary Distilled Water..... | 2,492 gallons                            |
| Sterile Distilled Water.....  | 4,760 20 cc. ampoules                    |
| Normal Sodium Hydroxide.....  | 1,096 ounces                             |
| Silver Nitrate.....           | 2,638 $\frac{1}{2}$ -oz. dropper bottles |
| Colloidal Gold.....           | 270.95 litres                            |

## DIVISION OF PATHOLOGY

M. C. DINBERG, B.Sc., M.D., *Provincial Pathologist*

Herewith is submitted the annual report of the Division of Pathology for the year 1946.

The number of specimens submitted and examined was greater than in any previous year. A second automatic tissue dehydrator was installed to cope with this increase, but the small amount of floor space assigned to this section, due to general over-crowding in the Central Laboratory, continues to preclude any work other than that of a strictly routine nature. Even this suffers from the inadequate space for staff and equipment.

Dr. H. D. Howell and Dr. M. C. Dinberg were granted specialist certification in pathology by the Royal College of Physicians and Surgeons.

Dr. M. C. Dinberg was appointed regional pathologist to the Attorney-General's Department, for the northern Ontario area.

I am grateful to Professor W. L. Robinson for consultant advice and to Dr. E. L. Barton for kind-co-operation.

| TYPE OF SPECIMEN EXAMINED | Number of Specimens | Number Malignant |
|---------------------------|---------------------|------------------|
| Surgical.....             | 12,997              | 816              |
| Blood Smears.....         | 183                 | ...              |
| Autopsies.....            | 105                 | 8                |
| Total.....                | 13,285              | 824              |

## REGIONAL LABORATORY—FORT WILLIAM

A. E. ALLIN, B.A., M.D., D.P.H., *Director*

I have the honour to submit herewith the Annual Report of the Fort William Regional Laboratory for the year 1946.

Routine examinations numbered 56,903, an increase of 30.7 per cent during the year. This increase was generally distributed but principally in serology where 14,938 Presumptive Kahns were performed in contrast to 8,797 during 1945.

6,474 bottles of Biologicals; 1,841 vials of Insulin; 41 vials of Old Tuberculin; 65 vials of Silver Nitrate and 41,360 Outfits were distributed.

Despite the increased volume of work, it was found impossible to obtain additional trained technical help. Consequently no expansion was possible. Mr. Harold Jones joined the staff in February, replacing Mrs. C. Barnes. He resigned in July and was replaced by Miss Mary Pohorilec. Miss M. Weaver, serologist for the past two years, resigned in October. Mr. L. Heald, part-time worker, commenced full-time duties in July.

A minimum of time was found for research. This was limited to further investigation of the species of *Pasteurella* occurring in wounds following cat-bites. Anti-sera were prepared against *P. cuniculicida*, *P. pseudotuberculosis*, *P. aviseptica*, *P. bubalseptica* and against several strains of *Pasteurella* isolated locally in recent years.

Diphtheria was endemic throughout the area served by this laboratory, particularly among the Indian population. 1,473 swabs were submitted for *C. diphtheriae* and 137 from 39 patients were positive.

I wish to express my thanks to Dr. Barton, Dr. Dinberg and Dr. McClure and to the personnel of this laboratory for their co-operation throughout the year.

## REGIONAL LABORATORY—KINGSTON

J. H. ORR, M.D., *Director*

I have the honour to submit herewith the Report of the work done in this Laboratory during the year ending December 31st, 1946. The volume of work increased this past year by some 8,000 examinations over that done in 1945. This could be attributed to some extent to the work taken over on October 1st which had previously been carried out in the Richardson Laboratory under the direction of Dr. James Miller.

I should like to express my appreciation of the loyal work of the staff of this Laboratory who, during the past three months, have been working under considerable handicap due to the remodelling of the Laboratory. I wish also to express my appreciation of the hearty co-operation of Dr. Barton and the staff of the Central Laboratory throughout the past year.

## REGIONAL LABORATORY—LONDON

W. M. WILSON, M.D., *Director*

I have the honour to submit herewith our annual report for the year 1946.

The total number of examinations made during the year was 172,101, which is an increase of 23,599 examinations, or 15.8 percent over the previous year. The number of tests done for the Army, Navy and Air Force totalled 26,055,

which is a decrease of 13,442 examinations for the armed forces, as compared with the previous year. With the cessation of hostilities and the discharge of Army personnel the number of specimens received from this source for bacteriological, serological and chemical examination during the latter half of the year showed a marked decrease. In view of this decrease, the increase of 15.8 per cent in the grand total is very gratifying and indicates an increased demand for laboratory work for the civilian population. Tests for industries have more than doubled during the year; for the Red Cross the volume of work has remained constant, and for the Department of Veterans Affairs 4,470 examinations were made.

The serological division showed an increase of 20,373 examinations (21.6%) over the previous year. During this period the qualitative globulin test on spinal fluid specimens was discontinued as a routine procedure and apart from this no change was made. In the bacteriological, pathological and chemistry divisions there was some variation as normally found from year to year with slight increases being noted in many branches.

During the year 102,012 outfits were prepared for distribution and 104,489 outfits were distributed to physicians and hospitals for the collection of material for examination. There were 30,832 packages of biological products and 7,061 packages of insulin distributed from this laboratory.

Prior to October 1, 1946, this laboratory was subsidized by the Department of Health of Ontario, and was part of the University of Western Ontario, and was known as the Institute of Public Health. On the above date the Provincial Department of Health made this a Regional Laboratory, and the staff became full-time employees of the Department. With this change Friedman Tests for pregnancy and the preparation of vaccines were discontinued as routine tests. The University of Western Ontario maintains the building, the second and third floors being used for laboratory purposes.

I wish to express my sincere appreciation to our staff for their co-operation, to Dr. A. J. Slack and Mr. R. B. Willis and others of the University of Western Ontario for assistance given during this period of re-organization, and to Dr. J. E. Sharpe, Assistant Deputy Minister of Health, and Dr. E. L. Barton, Director of Laboratories, and staff of the Central Laboratory for their kind co-operation and advice during the past year.

## REGIONAL LABORATORY—NORTH BAY

A. D. McCLURE, B.A., *Director*

I have the honour to submit herewith the report of the number of examinations carried out in the North Bay Regional Laboratory during the calendar year of 1946.

The volume of work has increased by 28 percent over that of the previous year. This increase does not seem to be confined to any particular branch of the work. Marked increases are shown in examinations for tuberculosis, miscellaneous bacteriology, syphilis and blood chemistry. No marked change is shown on the number of examinations for enteric diseases.

Please accept the thanks of the staff and myself for the help which has been given us by the staff of the Central Laboratory on many occasions.

## REGIONAL LABORATORY—OTTAWA

S. F. PENNY, M.D., *Director*

I have the honour to submit herewith the 1946 report of this Regional Laboratory.

Total examinations for the year numbered 146,189 and their source is set out in the following table:

|                      | Number of<br>Examinations | Percentage of<br>Total<br>Examinations |
|----------------------|---------------------------|--|
| City of Ottawa.....  | 92,271                    | 63.1                                   |
| Ottawa District..... | 18,658                    | 12.7                                   |
| Army.....            | 17,589                    | 12.1                                   |
| Air Force.....       | 11,118                    | 7.6                                    |
| Navy.....            | 2,553                     | 1.7                                    |
| D. V. A.....         | 4,000                     | 2.7                                    |
|                      | 146,189                   |  |

The total of 146,189 examinations shows an increase of 5,677 over 1945. This increase was made up of diphtheria cultures, gonorrheal cultures, miscellaneous bacteriological and milk specimens. Specimens from the Services decreased in the latter part of the year, but the civilian work increased.

At the end of 1945 an epidemic of diphtheria began in Ottawa City and district and this has continued unabated to the end of 1946. During 1946 a total of 6,950 throat swabs were cultured and from these 1,016 specimens were subjected to further examination and yielded 180 confirmed positive cases. Virulence tests performed reached 209. Positive diphtheria cultures have been isolated and sent to the Central Laboratory for typing and epidemiological investigation. In addition, duplicate swabs of positive cases have been collected and sent to the Laboratory of Hygiene, Ottawa, in a co-operative investigation. The organisms isolated have proven to be predominately of Intermedius type (82.2%). A much smaller number of Gravis (7.3%), Atypical Gravis (6.2%) and Mitis (4%) types was found. The predominating organism appears to be of high virulence, and clinically this epidemic has shown a high mortality rate.

Large quantities of diphtheria anti-toxin and toxoid have been distributed to the local and district physicians.

An outbreak of epidemic diarrhoea of the new-born in a local hospital was investigated bacteriologically. No single causative organism was isolated from these cases, but virus studies are still in progress at the Central Laboratory. As a result of this epidemic, periodic bacteriological examinations of the personnel of the hospital are being carried on.

We have supplied from the Serology Section, large numbers of blood sera to the Laboratory of Hygiene for investigations and have conducted many comparative tests on antigens supplied by it.

Recently an epidemic of ringworm of the scalp has appeared in the city, and from numerous hair specimens cultural examinations have revealed the causative fungus to be of the *Microsporon lanosum* type. Experiments are being conducted toward the control of the spread of this fungus by antiseptics.

The staff of the laboratory has been depleted by sickness during the year and several changes in personnel have occurred, three members having resigned to be married and four to take other positions.

A part of the stockroom is being converted to laboratory space for pathological tissue service, but due to the difficulty in securing plumbing supplies, this change has not been completed. It was hoped that a new storage shed could be built at the rear of the property, but the tendered price of construction was so high that this project had to be deferred.

With greatly increased work and personnel, this laboratory has become badly cramped for space and facilities and it is hoped that new quarters may be found in the near future. This overcrowding is not to be explained by the work for the Armed Services and the diphtheria epidemic, but is due to the increasing demand for laboratory service in the city and district.

My appreciation is extended to the staff of this laboratory and to Dr. E. L. Barton, Dr. W. B. McClure and the staff of the Central Laboratory for their co-operation during 1946.

### REGIONAL LABORATORY—TIMMINS

G. MACPHERSON, B.A., M.A., *Acting Director*

I have the honour to submit herewith the Annual Report of this Branch Laboratory for 1946.

The total examinations for the year were 9,709, an increase of 4,074 over the previous year. There has been a marked increase in all departments. It varies from 30 percent in Haematology and Chemistry to 130 percent in Bacteriology. Unfortunately, restricted space has limited procedure additions to Rh factor studies.

It is hoped that adequate quarters will be available within the year. These are, indeed, almost imperative because of the steadily increasing population of the Porcupine. Part of this is due to the post-war re-expansion of the established mines and part to the opening up of many new properties with the attendant general opening up of the surrounding lands.

There have been some staff changes. Illness forced Miss N. Douglas to leave the service. She was replaced by Miss G. F. Stitt. Miss S. Malinosky resigned in October. As yet, no definite arrangement has been made for her replacement.

I wish to thank Dr. E. L. Barton and the staff of the Central Laboratories for their co-operation and help during the year.

### REGIONAL LABORATORY—WINDSOR

W. J. A. PERCY, M.A., *Acting Director*

I have the honour to submit herewith the Annual Report of the Windsor Regional Laboratory for the year 1946.

In January, 1946, the Department of Health took over the Windsor Board of Health's Laboratory and provided a limited service for the City of Windsor, pending the remodelling of a building to house the Regional Laboratory. This remodelling was finished just before Christmas and, on the 23rd of December, the move was made to the new quarters.

The new laboratory is one of which the Department might well be proud, being spacious, light and modern. It is, in fact, the best laboratory over which the Department has control. The official opening will take place early in 1947.

I wish to express my appreciation to Dr. Barton, and to the staff at the Central Laboratory for their advice and co-operation in the many problems which arose during the year.

### REGIONAL LABORATORY—SAULT STE. MARIE

N. F. W. GRAHAM, M.D., *Director*

During the past year an increase of 2,120 specimens examined was noted. The increase in sputums was due to the increased interest in tuberculosis in the community, 11,610 persons being examined at the X-ray Clinic held in this city in September, and closer follow-up work by the Public Health nurses.

More Serology was done, this being due to the regular weekly blood bank and pre-natal examinations being done by the doctors.

N. P. N.'s have increased 84 over the last year.

We are looking forward to increased accommodation by an addition being built to this laboratory which we hope will take place early this year

### SUBSIDIZED LABORATORY—BELLEVILLE

J. B. MCKAY, M.D., *Director*

A report of the work carried out during 1946 at this subsidized Branch Laboratory is herewith submitted.

The total number of tests performed exceed that of any previous year by approximately 3,000. There has been a definite increase in the number of all the various tests performed here, excepting agglutinations, blood culture, milk and water analysis. These have decreased slightly due to marked reduction in the concentration of the air force personnel in this district and to the fact that the Cobourg milks are now being done elsewhere.

The service has been expanded during 1946 as follows:

In August a department of Parenteral Therapy was formed under the Director of the Laboratory. This has effected a marked decrease in reactions resulting from administration of saline and blood. One full-time registered nurse is in charge of this work.

The services of one additional technologist have been procured.

An electrocardiograph has been purchased and has been in operation since October. The part-time services of a nurse-technologist are available for operating this equipment.

We wish to acknowledge with sincere appreciation the continued co-operation of the Central Laboratory staff and that of the Barrie Street Laboratory in Kingston. We are particularly indebted to Dr. W. L. Robinson, Consultant Pathologist, for invaluable aid given in the interpretation of problem slides.

### SUBSIDIZED LABORATORY—PETERBORO

C. B. WAITE, M.D., *Director*

I am submitting herewith my report of work performed in this laboratory for the year 1946.

The work remains almost at the same high level as the previous year. The continuance of the local Training Centre into the early part of the year entailed a small amount of additional work, as also did the presence of the Veterans'

Hospital. There were no epidemics to report but we are picking up sporadic cases of *Salmonella* infections, at least one of them fatal.

We are frequently asked now for chemical determination of blood constituents which we formerly were never asked for. We have not sufficient staff to do these, nor have we a skilled chemist. Making up of outfits, in addition to other work, is putting a serious strain on the present small staff. We should really have additional help.

I wish to thank the Director and his staff for assistance during the year.

All of which is respectfully submitted.

### SUBSIDIZED LABORATORY—WOODSTOCK

R. H. KARN, *Director*

I wish to submit herewith the Woodstock Laboratory Report for 1946, dating from September 1st.

On November 29th, 1946, the Laboratory extended its services to the medical practitioners in Oxford County. Prior to this time our work was confined to the Ontario Hospital, Woodstock, and the Medical Officer of Health, Woodstock. We are now receiving specimens from various parts of the County. We can but hope that the physicians will use our facilities to their fullest extent during the coming year.

May I express my gratitude to Dr. E. L. Barton and the staff of the Central Laboratories, to Dr. E. A. Clark, Medical Superintendent of the Ontario Hospital, Woodstock, for his advice on many problems, and our own staff members, without whose co-operation this Laboratory could not efficiently fulfill its purpose.

### SUBSIDIZED LABORATORY—KITCHENER

L. C. FISCHER, M.D., *Director*

I have the honour to submit a report of the work done in the Kitchener-Waterloo Laboratory for the year 1946.

We are both happy and proud on being approved and added to the list of Provincial Department of Health Branch Laboratories early in 1946. And we appreciate very much the fine help we have received from Dr. McClure, Dr. MacNabb and Dr. Barton.

During 1946 our work has been almost entirely for our Kitchener-Waterloo Hospital. It has been a year of organization, getting more staff and trying to get the necessary equipment. We added a trained technician to our staff December 1st, 1946, and have engaged a stenographer to begin January 2nd, 1947. We have received some very excellent equipment, including an auto-technicon, but are still short of some very essential equipment.

Mr. Uttley, Miss Eveleigh and myself wish to express our appreciation to Dr. Barton and his staff for their kind assistance while we were in Toronto receiving refresher courses at the Central Laboratory.

We hope to launch ourselves into Departmental work within the next three months, supplies and equipment permitting.

## SUBSIDIZED LABORATORY—STRATFORD

S. J. C. MILLER, M.D., *Director*

The statistics for the Stratford General Hospital Laboratory are herewith submitted for the year 1946.

Routine examinations numbered 14,204. As the laboratory proper was not completed until late June and much of the basic laboratory equipment extremely late in arriving, these two factors are mainly responsible for the relatively low total noted.

The staff has increased to five with the addition of three technicians and a part-time stenographer. Miss K. Brown, our most recent technician, has recently returned, following a month's refresher course in serology with Miss Hughes.

Routine hospital investigations have increased tremendously since laboratory facilities have been made available at this institution, as previously all procedures were carried out at London or Toronto. The addition of Tissue Section, both paraffin and frozen section, has created a new interest in staff meetings which hitherto were poorly attended.

The laboratory has been instrumental in obtaining a new blood bank to provide this hospital, and others in this area, with a steady supply of available blood and plasma for all needs. This has been a problem in the past on many occasions.

Recently the laboratory has taken over the distribution of outfits for this area from our own stock.

Routine Bacteriology for the past three months amounted to 222 specimens. Presumptive Kahns numbered 1,128 for a six month period. Routine Serology was relatively low with 66 investigations. Water Analysis for a two-month period numbered 65. All these latter investigations are bound to increase.

I wish to express my appreciation for the continued generous co-operation from Central Laboratory and Branch Laboratory at London. I am especially indebted to Dr. McClure, Dr. Barton and Dr. W. Wilson for advice and assistance in getting this laboratory established. The policy of decentralization advocated by Dr. MacNabb has many adherents in this area as shown by the tremendous interest shown in the new Health Centre which is to be established in Stratford, with the Laboratory as one of the main new units.

## REPORT OF THE LIBRARY

FREDITA HENLEY WRIGHT, *Librarian*

During the year 1946 the Central Library has continued to meet the many demands made upon it for literature and information on medical subjects. In addition to the requests received from the departmental staff, the number of non-departmental inquiries is steadily increasing. The Library has endeavoured to meet all demands and to keep abreast of the current medical literature by securing new reports and pamphlets.

Four meetings of the Library Committee were held during the year to assist in the administration of the Library and to approve the purchase of books.

### LOAN SERVICE

There were 5,038 loans made by the Central Library during 1946. Within the immediate department requests for literature reached a total of 3,933 while to the outside service the Library forwarded 1,105 references. The loan service from the Central Library is extended to: physicians, psychologists, nurses, occupational therapists and dietitians connected with the administration of the 15 Ontario Hospitals; the Directors and staffs of Mental Health Clinics and the Directors and staffs of Branch Laboratories and Tuberculosis Clinics.

### CIRCULATION OF JOURNALS

The regular circulation of journals was maintained during the year. Journals were circulated to the clinicians in charge of the Provincial Travelling Chest Clinics at Belleville, Ottawa and Timmins, and to the Tuberculosis Unit at the Ontario Hospital, Woodstock.

Journals containing articles dealing with "shock therapy" in the treatment of mental disease continued to be circulated, immediately upon receipt, to the Ontario Hospitals administering this treatment.

The Branch Laboratories at North Bay, Ottawa, Kingston, Belleville, Fort William, Kirkland Lake, Windsor and Mimico received regular circulation service of technical journals.

### PATIENTS LIBRARIES

Through the services of the Central Library the following reading material was procured for the Patients' Libraries in the Ontario Hospitals:

Books—The Central Library personally selected 555 library discards which were delivered to the Library where they were packed and re-shipped to the Hospitals.

Periodicals—The Central Library placed 154 annual subscriptions to periodicals for the exclusive use of the patients. There were also approximately 7,366 copies of unsold periodicals delivered by a Toronto News Agency. These were purchased by special arrangement made by the Central Library.

The Ontario Hospital at Fort William also was supplied with unsold copies of periodicals by a local News Company. This service was donated to the hospital and was very much appreciated.

Newspapers—The Central Library placed 101 subscriptions to various Provincial newspapers for the sole use of the patients.

### SPECIAL SERVICES

The Library was requested to assist in a book display at the conference of Medical Officers and Nursing Supervisors of County Health Units held early in the year. The exhibit proved to be of considerable interest.

The Central Library also compiled and distributed to all medical personnel in the Ontario Hospitals a list of Library accessions. This service was provided twice during the year. The response, by increased requests for books, was quite marked.

### ACCESSIONS

The accessions to the Library for the year 1946 were as follows:

|   |                 |
|---|-----------------|
| CENTRAL LIBRARY                             |                 |
| Books purchased.....                        | 175             |
| Journals (vols.).....                       | 156             |
| Reports.....                                | 65              |
| Pamphlets.....                              | 1,473           |
|   | <hr/>           |
|   | 1,869           |
|   |                 |
| ONTARIO HOSPITALS                           |                 |
| Books purchased:                            |                 |
| Medical.....                                | 263             |
| Fiction (library discards).....             | 555             |
| Journal subscriptions (med. and tech.)..... | 196             |
| Year Books.....                             | 9               |
| Periodicals:                                |                 |
| Subscriptions.....                          | 154             |
| Unsold copies.....                          | 7,366 (approx.) |
| Newspapers (subscriptions).....             | 101             |
|   | <hr/>           |
|   | 8,644           |

The compilation of bibliographies, together with cataloguing and other routine library procedure, has made the year a busy one. The Library has had pleasure in making the above contribution to the work of the Department.

## DIVISION OF MATERNAL AND CHILD HYGIENE

ELIZABETH L. KITELEY, M.B.

This Division concerns itself in the furthering of public and official interest in the care of mothers and children. Realizing the essential part played by pre-natal supervision in the health and well being of the pregnant woman, as well as that of her offspring, the 1946 Legislature, by amendment to The Public Health Act, made available one free, complete, medical examination during the period of pregnancy. This legislation, which became effective October 1st, 1946, is applicable to any expectant mother resident in the Province, the examination to be made by the physician of her choice, and to whom she makes direct application. In the three months, October 1st to December 31, 12,334 pregnant women made the required application to 665 physicians in 303 municipalities and received the resultant examination. It is hoped that the making of this service readily available to expectant mothers, together with education as to the importance of medical guidance throughout the entire pregnancy, should do much to decrease maternal and infant morbidity and mortality.

This special activity is under the direction of Dr. E. R. Westman, who joined the Division Staff October 1st, 1946.

The maternal death rate for the year 1945, the last year for which data are available, shows a slight but significant decline, the provincial rate being 2.2 per thousand living births (preliminary figure), the lowest ever recorded. Infection again takes precedence in the list of causes of death among these women, 46 cases or 27% of the total maternal deaths being attributed to this. In spite of the apparent increase in the group the rate is actually on the decline, as may be seen from the accompanying tables. While great hopes were held for chemotherapy and antibiotics in this field, experience has shown that the use of these does not constitute the entire solution for the prevention and treatment of infection. On the other hand, an increase in infection, which may have been anticipated because of wartime and postwar conditions, such as overcrowding, etc., has not materialized. Hemorrhage, which was responsible for the death of 33 women or 19% of all maternal deaths, is somewhat higher than it has been for several years. It would seem reasonable to expect that with the more readily accessible supply of whole blood and blood plasma, mortality from this cause should be further reduced. There has been a satisfactory decline in the rates of deaths from puerperal toxemia. This decline might be taken to indicate that to an increasing extent the expectant mother is being made to realize the value of adequate pre-natal care.

TABLE A

## MATERNAL MORTALITY RATES PER 1,000 LIVING BIRTHS

5-Year Averages, 1921-1945

| Years      | 1921-1925 | 1926-1930 | 1931-1935 | 1936-1940 | 1941-1945 |
|------------|-----------|-----------|-----------|-----------|-----------|
| Rates..... | 5.41      | 5.79      | 5.30      | 4.57      | 2.53      |

| Total.....   | 219               | 206  | 189  | 198  | 171  | 3.03                        | 2.63 | 2.33 | 2.54 | 2.17 |
| Infection.....                                     | 52                | 41   | 43   | 52   | 46   | .72                         | .52  | .53  | .67  | .58  |
| Hemorrhage.....                                    | 27                | 29   | 25   | 22   | 33   | .37                         | .37  | .31  | .28  | .42  |
| Accidents.....                                     | 27                | 23   | 22   | 27   | 26   | .37                         | .29  | .27  | .35  | .33  |
| Toxemias.....                                      | 54                | 52   | 41   | 31   | 24   | .75                         | .67  | .51  | .40  | .30  |
| Abortion with men-<br>tion of infection...         | 33                | 34   | 22   | 33   | 18   | .46                         | .43  | .27  | .42  | .23  |
| Abortion without<br>mention of infec-<br>tion..... | 8                 | 9    | 11   | 8    | 4    | .11                         | .12  | .14  | .10  | .05  |
| All other causes.....                              | 18                | 18   | 25   | 25   | 20   | .25                         | .23  | .31  | .32  | .25  |

In 1945 in Ontario there were 3,199 infant deaths (deaths under one year of age) or a rate of 41 per thousand living births (preliminary figure). Of this number 2,095 or 65% died under the age of one month. The principal causes of death for the entire group are shown in the accompanying tables.

TABLE D  
INFANT DEATH RATES PER 1,000 LIVE BIRTHS  
5-Year Averages, 1921-1945

| Years      | 1921-1925 | 1926-1930 | 1931-1935 | 1936-1940 | 1941-1945 |

| Infections.....              | 5.6  | 4.7  | 4.7  | 4.2  | 4.6  | 4.2  | 4.4  | 2.9  | 2.9  | 2.7  | 3.8  | 2.4  | 2.7  | 2.2  | 1.3  |
| Congenital Debility.....     | 4.6  | 3.4  | 3.5  | 3.0  | 2.7  | 2.1  | 1.6  | 1.7  | 1.4  | 1.1  | 1.5  | 0.9  | 0.8  | 1.0  | 0.9  |
| All other Causes.....        | 9.8  | 9.6  | 9.0  | 8.6  | 10.5 | 8.8  | 8.2  | 7.5  | 7.6  | 7.7  | 6.8  | 6.7  | 6.3  | 6.3  | 7.0  |

Approximately half the infants who died during the first year of life died as a result of prematurity or congenital malformation, and 85% of this number did not survive more than one month. It might be surmised that the apparent increase in the number of deaths reported as due to prematurity could be related to the decrease in those reported as stillbirths. Recent investigations in several countries appear to indicate the state of health of the mother, both prior to conception and throughout pregnancy; her nutritional state generally and the quality of the pre-natal care to be potent factors in the reduction of deaths from these two causes. In view of this it seems reasonable to hope that with a continued increase in the application of a high standard of pre-natal and obstetrical care, what may have been regarded as an irreducible minimum in maternal and infant deaths may not be so irreducible after all. To this end this Division has interested itself in the promotion of pre-natal care as previously described, also in the institution of an inspection service of new born nurseries and obstetrical units of Public Hospitals, 35 such inspections having been carried out during the past year.

Diarrhoea and enteritis continues to take its toll, 205 infants having died from this cause. It is also to be noted that accidents and violence accounted for 112 deaths under one year, in which 23 occurred under one month of age.

Epitomizing the reported findings, it is to be noted that the substantial decline in maternal deaths has been maintained, that the death rate among infants in the so-called preventable period (2-12 months) is now being unduly weighted by those due to accident and violence and that prematurity and congenital malformations are still the most significant contributors to a death rate in this age group which is still higher than it should be.

Continuing the practice established in the previous year with respect to war brides, the Division distributed 1,527 copies of "The Baby", with a message of welcome to Ontario from the Honourable the Minister of Health.

The Division for the twelfth consecutive year, co-operating with the Department of Education, gave direction to the medical examination of all applicants to the nine teacher training schools in the Province. Registration for these courses was particularly heavy probably because of inclusion of many ex-service personnel. The benefits of health teaching in the services were amply demonstrated in the attitude as well as in the physical condition of these applicants.

## DIVISION OF NURSES REGISTRATION

ALEXANDRA M. MUNN, Reg. N., *Director*

I have the honour to submit the following report for 1946:

### *Council of Nurse Education:*

The Council of Nurse Education held five meetings during the year. At the Annual Meeting on March 25th, 1946, Miss Constance Brewster, of Hamilton, was re-elected Chairman. The membership of the Council has been increased by two additional nurse members, making a total of eleven members.

The Executive of the Registered Nurses' Association of Ontario met jointly with the Council of Nurse Education on three occasions to discuss the preparation of a statement on nursing education for the Minister of Health. The statement was presented in May, 1946. The summary of the statement read as follows:

#### "RECOMMENDATIONS—

We present for your consideration the recommendation that the present situation in nursing in Ontario be studied to enable a study of

1. The cost of nursing the patient adequately and the cost of a hospital organization which can accept the responsibility of the care for its own patients.
2. The proper organization of a school of nursing and the cost of operating it.
3. An increase in qualified teaching staffs for schools of nursing."

### *Legislation:*

In February, 1946, an Order-in-Council was passed which allows applicants from other provinces to enter approved schools of nursing in Ontario if they qualify for entrance to a University in their own Province. Formerly, such applicants were being barred from Ontario schools owing to a difference in the number of high school credits required for Matriculation.

### *Revision of the Minimum Curriculum:*

Miss Eleanor Clark, Reg.N., was named Chairman of the Committee in March, 1946. The Committee consists of five members. The first draft was presented to Council on October 11th, 1946. Satisfaction was expressed. The Inspector of Training Schools is working closely with the Committee and is devoting much time to it.

### *Personnel:*

Since August, 1946, the Inspector of Training Schools has been spending the greater part of her time in the work of co-ordinating the new programme for training Nursing Assistants.

### *Division of the Registration Examinations:*

On the recommendation of the Council of Nurse Education notice was given to all schools of nursing in August, 1946, that two of the seven registration papers, viz., Anatomy and Physiology and Principles of Nursing, would be written at the end of the first year of training beginning May, 1948.

### *Minimum Age Requirement for Schools of Nursing:*

In October, 1946, the Council of Nurse Education re-endorsed the regulation which requires that a student shall be eighteen years of age before being admitted to a school of nursing.

### *Schools of Nursing in Newfoundland:*

On the invitation of the Director of Medical Services in Newfoundland, a member of this Division visited the Schools of Nursing in Newfoundland in June, 1946, with a view to arranging reciprocal registration without examination for registered nurses from Newfoundland.

### *Participation in Professional Activities:*

During the year members of this Division attended meetings of the following Committees: The Ontario Red Cross Advisory Nursing Committee; Registered Nurses' Association of Ontario Committee on Registries; R.N.A.O. Publicity Committee; R.N.A.O. Committee to study the status of the Public Health Nurse in Schools of Nursing; the Advisory Committee for the C.V.T. Course in Practical Nursing; the Advisory Council of the School of Nursing of the University of Toronto; the Canadian Nurses' Association Committee on Nursing Education; Committee to Revise the Minimum Curriculum for Schools of Nursing in Ontario.

### *Acknowledgement:*

Gratitude is expressed to Dr. A. H. Sellers, Director of Medical Statistics, for his able and helpful "Report on a Survey of Nursing Personnel in Hospitals in Ontario," published July, 1946. Much interest was shown in this report by other Provinces and Countries.

### *Registration Examinations for Nurses:*

Examinations were held in May and November for 1,489 candidates.

### *Applicants Registered from other Provinces, States and Countries:*

During the year 219 applicants were registered from other Provinces, States and Countries, as follows:

|                       |     |                    |    |

|                           | \$33,701 09 |

## REPORT OF THE INSPECTOR OF TRAINING SCHOOLS FOR NURSES

In Ontario there are sixty-three approved schools of nursing. This includes six Ontario Mental Hospital schools and the recently approved school of nursing, McMaster University, Hamilton.

The number of visits made by the Inspector of Training Schools in 1946 was as follows: Routine, 30; Brief, 4; Affiliations, 5.

Two surveys were made in June and October by the Medical Statistics Branch, Department of Health, about nursing personnel in hospitals in Ontario. The majority of figures in this report were taken from these surveys.

*Enrolment of Student Nurses:*

The number of student nurses in training on January 1st, 1946, was 4,235. This was 5.7% greater than the enrolment of January 1st, 1945. The intake of students in 1946 was 1,701. This was 15.8% greater than in 1945. The "wastage" rate during training was lower (4.7%) than in 1945 (6.3%). An effort was made to determine the enrolment objective of student nurses for 1946 and to what extent it was reached. The objective was set by the Superintendents of Nurses. Consideration of residence space, adequate teaching staff, and personnel needs such as graduate nurses, ward aides and domestics, should have been the basis for forming the objective. According to the returns the enrolment in all schools of nursing was 15.3% below the objective. The deficiency in the large schools of nursing was 1.2% in comparison to 27.3% of all other general hospital schools. The enrolment in the mental hospital schools was 68% below the objective. There are 91 student nurses in training in the Ontario Mental Hospitals.

In the majority of schools of nursing the residences are crowded and unsatisfactory. The October survey comparing residence capacity and enrolment objective for 56 schools of nursing shows that 17 schools attained their enrolment objective. The residence accommodation in these schools is utilized to 100% or more. The limited residence space curtailed the enrolment in the larger schools. Thirty-nine schools failed to reach their enrolment objective. In 22 of these schools the residence accommodation was 100% or more of its capacity. The remaining 17 schools which failed to reach their objective reported vacancies in their residences. This group of 17 schools represents less than 20% of the total student enrolment. A small number of hospitals are now building extensions to their residences. St. Joseph's Hospital, Peterborough, will complete a new residence in 1947. One very fine residence and teaching unit was opened this year at Hotel Dieu Hospital, Windsor.

*Teaching Staff and Classrooms:*

Although there is an increase in the number of qualified nurse instructors it is known that two thirds of the schools have two nurse instructors or less. This group of schools is responsible for teaching half the student nurses in the Province. In this group of schools there is a ratio of one instructor to 46 students.

Classrooms in half of the schools of nursing are located in basements and below the level of the ground. In more than one quarter of the schools of nursing there is no office for the Instructor. In schools where one nurse instructor is employed she may be required to teach as many as fourteen subjects. Too little time is provided for the preparation of lectures and marking of examination papers. Very often the Instructor is required to assist in the administration of the hospital on Sundays and holidays.

#### *Health Programme:*

It is a significant fact that the number of withdrawals of students in 1946 for medical reasons amount to less than 1.8%. This is one indication of the careful and consistent health programme which has been carried out in schools of nursing over a period of years.

#### *Affiliations:*

An affiliation centre was established at the Ontario Mental Hospital, New Toronto. The first class of 14 students enrolled on January 2nd, 1947. The following schools of nursing have an affiliation here:

Hamilton General Hospital  
St. Joseph's Hospital, Hamilton  
St. Joseph's Hospital, Sunnyside, Toronto  
Toronto Western Hospital  
St. Joseph's Hospital, North Bay.  
St. Joseph's Hospital, Sudbury.

It may now be said that every school of nursing in the Province has been offered an elective affiliation in psychiatry. However, the number of students who receive experience in psychiatric nursing annually is only 200.

The number of schools which have sought an affiliation with other hospitals has increased. In addition to the schools of nursing mentioned above, six others have commenced an affiliation in 1946 with the Ontario Mental Hospitals. Two more schools have an affiliation at Children's Hospital, Winnipeg. At a conference which was held recently in London, arrangements were made for student nurses to have an observation period with the Victorian Order and public health agencies of that city.

#### *School of Nursing Committee:*

During the inspection of the schools of nursing the Superintendents of Nurses were encouraged to develop a School of Nursing Committee which would act in an advisory capacity on matters concerning the welfare of the school. All schools of nursing were encouraged to assist nurses to take post-graduate courses. There is an increasing interest being shown by executives of schools of nursing and hospitals in providing scholarships.

#### *Monthly Report Forms:*

The Superintendents of Nurses in the schools of nursing have assisted this Branch greatly by providing up-to-date information on monthly report forms. The completed forms contain facts about admissions, withdrawals and illness of students. They indicate changes and vacancies which occur on the staff.

#### *The Course for Nursing Assistants:*

A nine-month course for the training of nursing assistants was started in September, 1946, under the joint direction of the Departments of Education and Health. This was the result of an inquiry made by the Minister of Health in June, 1946, concerning the shortage of nursing personnel in hospitals in Ontario.

Approval for such a course was given by the representatives of the Registered Nurses' Association of Ontario, Ontario Hospital Association and Ontario Medical Association.

An Advisory Committee of thirteen has been appointed; it consists of seven Superintendents of Nurses, two representatives from the Registered Nurses' Association and two from the Department of Health, one from the Ontario Hospital Association and one from the Department of Education. The co-ordination of the theory and practice in the three training centres—Hamilton, Kingston and Toronto—is the responsibility of the Nurses Registration Branch.

The course is based on the syllabus which was approved by the Registered Nurses' Association and the Department of Health, for use in the chronic and general hospitals in the Province. The trainees spend the first three months in one of the training centres and the last six months in selected chronic and general hospitals.

A monthly allowance is given by the Government for trainees who are residents of Ontario.

Qualified nurse instructors have been secured. At present there are six at the training centres and one at each of the hospitals selected as a practice field.

The original enrolment objective was sixty for each centre every three months. Because of the limited number of suitable applicants the educational requirement was changed in December from Grade X to Grade VIII. The enrolment at the beginning of 1947 was 130.

Reports received from the hospitals where the nursing assistants are training are encouraging. When the trainees have successfully completed their course and have passed examinations set by the Nurses Registration Branch, a certificate will be given by the Department of Health. It is hoped that they will then seek employment in hospitals and thereby help relieve the shortage of nursing personnel in Ontario.

The Department of Health has agreed to recognize similar courses which are conducted in hospitals in Ontario. The inspection and approval for such courses will be the responsibility of the Nurses Registration Branch.

## DIVISION OF PUBLIC HEALTH NURSING

EDNA L. MOORE, Reg.N., *Director*

Throughout the year the growing concern and interest of municipal authorities in the organization and extension of public health services recorded in the report for 1945 continued. Seven Health Units and one County School Health Service came into being, namely, the Counties of Brant, Bruce, Dufferin, Lambton (part of the county), Peel, Prescott and Russell, Prince Edward, and the Lennox and Addington County School Health Service. The following municipalities established generalized public health nursing services: Etobicoke Township, Markham Township and Village, Neening Township, Prescott and Smith's Falls. The Welland-Crowland Health Unit area was extended and the designation changed to "Welland and District."

The number of public health nurses available was not sufficient to fully staff the new services and meet the needs caused by enlarged programmes in existing services to which must be added a considerable number of vacancies resulting from resignations and retirements.

Of the thirty-two nurses who completed the Certificate Course in June thirty-one accepted positions throughout the Province. In September, under the Plan inaugurated two years ago, thirty-four registered nurses enrolled in the Certificate Course in Public Health Nursing at the Universities of Ottawa, Toronto and Western Ontario. One nurse withdrew from the Plan in December. The total registration in the Certificate Course numbered approximately two hundred.

In the 1944 Annual Report attention was drawn to the need of well prepared, experienced public health nurses for positions of leadership. In June four nurses successfully completed the Advanced Course in Administration and Supervision in Public Health Nursing at the University of Toronto under the Assistance Plan of the Department. Three of the group accepted the posts of Supervisor of Public Health Nursing in Health Units and the fourth is Senior Public Health Nurse in a large Health Unit. Seven nurses registered for the Advanced Course under our Plan in September. Two of them have been granted leave-of-absence and will return to their organizations to fill senior posts. The others, if successful, will accept positions anywhere in Ontario.

At the opening of the year the Public Health Nursing staff of the Division numbered twelve and the stenographic staff two. N. Edna Howey, senior member of the supervisory staff, retired because of illness September 1st. June 22nd the resignation of Margaret Wright, Assistant to the Director, was accepted, and in April Ora A. Lefler retired. July 1st Edna Squires was loaned to the Prescott and Russell Health Unit to fill the post of Supervisor of Public Health Nursing for one year. Marjorie Rutherford was granted leave-of-absence from September to June, 1947, to pursue the Advanced Course in Administration and Supervision under the Department of Veterans Affairs at the University of Toronto. Muriel Lowry returned to the staff September 1st after several years leave-of-absence during which she was Supervisor of Public Health Nursing in the Stormont, Dundas and Glengarry Health Unit. In May the third stenographer joined the staff.

In the cessation of Miss Howey's service, the supervisory programme has sustained a serious loss. She is well and favourably known throughout the Province and much of the development in public health nursing during the past

fifteen years has been due to her patient encouragement and tactful leadership. During the comparatively short period that Miss Wright was a member of the staff she made an outstanding contribution to the work of the Division. Miss Lefler, whose activities during a long service carried her over the greater part of the Province, was associated with Health Unit organization from its inception.

Miss Elizabeth L. Smellie, C.B.E., R.R.C., LL.D., Honourary Consultant in Public Health Nursing to the Department, has given generously of her time in the consideration of problems. Her wide knowledge of nursing matters throughout Canada and elsewhere, together with her sympathetic understanding, make her counselling invaluable.

Six members of the staff assisted with the Normal School and College of Education medical examinations of applicants, and arrangements were made for nursing staff at London, Peterborough and Stratford.

Alice G. Nicolle, the Educational Supervisor, visited ten Health Units and six of the larger municipalities throughout the Province. She attended a conference with the Director of Guidance, Department of Education, at Windsor, and carried on extensive correspondence regarding health programmes for secondary school students. The question of co-ordinating local health services and the teaching programmes in Schools of Nursing came to her attention frequently and was dealt with after consultation with the Division of Nurse Registration staff.

Misses Pennock and Nicolle assisted with the health service and teaching programmes of the Summer School on "Health and Physical Education" conducted by the Department of Education.

The Supervisors had a difficult year and their plans were interrupted often on very short notice. They visited ninety-eight centres, representing six hundred and nine days. Because of reduced staff the districts were changed in an effort to cover the Province; however, it was not possible for so few workers under such circumstances to give the quality of service they wish to render. Such a state of affairs is trying and the highest commendation is due the Supervisors for their cheerful acceptance of added duties.

Considerable time and effort was given to interviewing applicants for the Assistance Plan and securing information to aid in making selection. Consultations were held with the Faculty members of the Universities regarding field practice arrangements.

Thirty-five out-of-town trips were made by the Director, including a visit to the Red Lake-Kenora District and the Lakehead.

In response to an urgent request, Rose Hally went to Red Lake where she gave a generalized public health nursing service from February 16th to the end of June.

Katherine Osborne supplied for the Senior Nurse of the Peel County School Health Service during April, May and June, and carried out a survey of school health needs in Amherstburg and the townships of Anderdon and Malden during November and December.

An important development during the year was the opportunity for public health nurses to participate in the short course offered at the Psychiatric Hospital Out-Patient Department. The members of the Division's supervisory staff attended as well as seven nurses from municipal agencies.

The opening of Woodeden Camp near London by the Ontario Society for Crippled Children was a valuable addition to the facilities for children with orthopaedic conditions.

During the year three bulletins were prepared and sent out to the public health nurses of the Province.

The Canadian Public Health Association Annual Convention, the Biennial Convention of the Canadian Nurses Association and the Annual Meeting of the Registered Nurses Association of Ontario were held in Toronto. The Ontario Educational Association meetings were held as usual during Easter week; members of the staff contributed papers at two of these sessions.

A conference for the Senior Nurses in the County School Health Services was arranged in Easter week and was participated in by the supervisory staff. Assistance was given in arranging for and carrying through two conferences—the Health Unit Directors and Supervisors of Public Health Nursing.

The Division was honoured by visits from the following: Miss Borghild Kessell, Public Health Supervisor, Municipality of Oslo, Norway; Miss Agnes Rimestad, Director of Nursing Service, The Municipal Hospital, Oslo, Norway; Miss Aslaug Holmgren, Oslo, Norway; Miss Eli Magnussen, Copenhagen, Denmark; Miss Venny Snellman, Helsinki, Finland; Dr. W. G. Wickremesinghe, Department of Medical and Sanitary Services, Colombo, Ceylon; Dr. S. E. Ferreira, Assistant Director, Medical Services, Kingston, Jamaica; Miss Fernanda Alves Diniz, Lisbon, Portugal; Miss Esther M. Hirst, Nursing Representative, Rockefeller Foundation, Peru; Mrs. Jano Deen, Ceylon; Miss Rose B. Dolan, American Relief for France, Pennsylvania, U.S.A.; Dr. W. B. Turbott, New Zealand Department of Health; Miss D. M. Riches, Director of Nursing, Queen's University, Kingston, Ontario; Miss Ruby Tinkiss, Nursing Specialist, Division of Maternal and Child Hygiene, Department of National Health and Welfare, Ottawa; Miss Dorothy E. Tate, Director of Public Health Nursing, British Columbia Department of Health; Miss Jean S. Clark, Superintendent, Public Health Nursing, Alberta Department of Public Health; Miss Elizabeth Smith, Director of Nursing Services, Saskatchewan Department of Public Health; Miss Margaret E. Hart, Manitoba Department of Health.

## DIVISION OF SANITARY ENGINEERING

A. E. BERRY, M.A.Sc., C.E., Ph.D., *Director*

The annual report of the Division of Sanitary Engineering for the year 1946 records the first full year of post-war activity. The year has been distinguished by a great shortage in materials and labour, but in spite of this much planning and preliminary activities have proceeded for sanitary projects. The year has opened the way to what may be expected to bring greater environmental sanitation and the widespread use of public utilities to create better and more comfortable living conditions. It is anticipated that this work will be carried on with increased vigour in the next few years.

Water and sewage works programmes were active during the year and time has been spent in assisting municipalities to advance their projects and to secure votes of the ratepayers. Gratifying results were obtained, and in all instances where votes were held on either water works or sewerage, endorsement was given. The general activities of the Division were carried on in the same manner as previously, but with extension to other fields, particularly to food sanitation. These activities consisted of the supervision of public water supplies, sewage treatment plants, examination of plans and specifications for new works or extensions, supervision over all milk processing plants, inspection and licensing of summer camps, supervision over recreational facilities, licensing of frosted food locker plants, administration of the cemetery regulations, and, in general, supervision over and assistance in sanitation throughout the province.

*Water Works Programmes:*

There has been a great renewal of activity in the water works field and during the year 202 certificates of approval were issued for new water works or for extensions to existing plants. The total estimated cost of these works was \$5,516,258.32. This is in comparison with a total of \$3,229,829.55 for the year 1945. The marked rise in activities is well shown by these figures. It is to be noted that the cost of water works installations has increased sharply since the close of the war, and while this accounts to some extent for the greater expenditure it is not the major factor. It is apparent at this time that very small municipalities are desirous of installing water works. Previously, these installations have been made usually before the population reached 1,000. Now it is obvious that this figure will be materially lowered and will more likely approach 500. This is in spite of the increased cost for this utility over pre-war days. Fortunately, however, the interest rate has been quite low and most centres have been able to secure rates of 3% or less.

The amount of actual construction work carried on during the year in water works was not as great as might be desired, but the main point was the manner in which new systems were planned and extensions arranged for others. During this interval mandatory orders were issued by the Department for water works in the following places: Lucan, Chapleau Township, Sioux Lookout, Teck Township, Tilbury, Tisdale Township and Whitney Township. In addition to these, authorization was given either by vote or by other means for the construction of water works in the following places: Delhi, Hearst, Merrickville, Brigden, Madoc, Kemptville, Whitney Township, Teeswater, Paisley, Caledonia and Hagersville.

The construction of new water works systems and extension of old ones will continue rapidly. It is apparent that there is still a large number of places in

which these activities are necessary and in which there is a very considerable interest at this time. High contract prices, combined with scarcity of material and labour, have delayed this work, but it is anticipated that progress will go forward in the near future.

Supervision over the operation of water treatment plants has continued as in the past, with regular inspections being made by members of the staff. Laboratory examinations, both bacteriological and chemical, have been made in the laboratory of the Division at Richmond Street. An increasing number of routine samples has been submitted to the provincial laboratories from the Health Units where full-time personnel has made it possible to secure more frequent sampling than was feasible in the past. There is thus an increasing check over the quality of public water supplies in this province. Taste control has also been a feature, and every assistance has been given to the operators of plants where objectionable tastes have been experienced.

#### *Public Sewerage Systems:*

Progress of a like degree has been made in extensions to sewerage systems, and there is public interest to a greater extent in this even than in water works. Conditions were not conducive to a great deal of work on construction, but much planning has been carried out.

During the year certificates of approval were issued to the number of 248 and the estimated expenditure involved was \$6,198,446.96. This is in comparison with a total figure of \$4,346,003.30 for the year 1945. There is thus a sharp increase in the work going forward in this field. It is apparent that efforts are being made to meet two outstanding needs in this field, namely the provision of sewerage systems for the smaller centres, and secondly, the construction of sewage treatment plants where these have not been available in the past. These two requirements have been outstanding for a number of years but it was not possible during the depression and the war years to construct sewer systems or sewage treatment plants. Unfortunately many of the existing treatment plants built some years ago are overloaded because of increases in population and industrial wastes. It is anticipated that as supplies become available much of this work will be carried on and a very distinct improvement made in stream sanitation throughout the province.

During the year sewerage systems were initiated in Clinton, Picton, and Streetsville. At the same time systems were planned and endorsed in the following municipalities: Delhi, Hearst, Ingersoll, Kemptville, Madoc, Paris, Listowel, and Sioux Lookout. These works will be proceeded with at an early date. In this same period the Department issued mandatory orders for sewerage systems in the following places: Picton, Sioux Lookout, Teck Township, Tisdale Township and Whitney Township. Some centres have been unable to proceed with construction because of lack of interest by contractors, or by very high prices.

Further attention has been possible during the year to control the operation of sewage treatment plants. Difficulties have increased through overloading. It must be recognized that these plants should be operated to best efficiency if their construction and operation is to be justified. No attempt has been made as yet to give training to the operators other than that which takes place from field inspections. Direction, in the future, will continue towards the most effective operation of these units and protection of the streams receiving these effluents.

*Milk Sanitation:*

Supervision of milk pasteurization plants has continued as in previous years with certification and periodic inspections. At the end of 1946 there were 692 such plants in operation.

Conditions have improved somewhat in the field of milk sanitation in that more assistance is available for production and for operation of processing plants. There has been less tendency for staff turnover and many of the trained men that were away during the war have returned to their former posts. There is still a need for some definite programme of instruction for these operators.

Inspections of pasteurization plants made by officials of this Division during the year amounted to 886 as compared with 861 inspections for the year 1945. In this work 720 samples were collected, and 143 farm inspections were made as special requests in order to assist local municipalities. It has been all too apparent that the number of inspections of these plants has been much too low, and has resulted from an inadequate number on the staff. As more men become available it is hoped to exercise closer supervision.

The extension of the areas under total pasteurization was increased during the year by an Order-in-Council which took effect on July 23rd. It is now estimated that approximately 99% of all milk sold for fluid consumption in the province is pasteurized. The legislation in this regard came into effect in 1938 and the procedure has been to gradually increase the areas under the legislation as far as it was possible to make pasteurized milk available. The removal of restrictions on transportation has greatly assisted this programme, hampered during the war years. It is now obvious that practically all parts of the province that can at present be served by pasteurized milk have been brought within the scope of this legislation. No illness has been traceable to any milk supply during the year, and it must be recognized that pasteurization is playing a vital part in protection of the citizens of the province as well as visitors from without.

*Stream Sanitation:*

The year 1946 has brought renewed activity in stream sanitation throughout the province. Every effort is being made to reduce pollution in watercourses of the province. This will require time for completion, especially since it has not been feasible to build sewage treatment plants as rapidly as might be hoped.

At present, there are some watercourses which require special consideration. These include the Grand River, the Thames River, the Old Welland Canal Area, and others. All of these require large expenditures and considerable time for complete correction. Progress has been made during the year, and it is expected this work will be continued as rapidly as conditions permit.

*Refuse Collection and Disposal:*

Increasing interest has been manifested in the municipalities for public collection of refuse. This service can be carried on without undue expenditure and it is popular with the ratepayers. Incineration and refuse dumps continue to be the methods by which the refuse is disposed. There are now 30 municipalities with incinerators in operation in the province, these being located at Brockville, Chatham, Deloro, East York Township, Etobicoke Township, Flos Township, Forest Hill, Fort Frances, Fort William, Galt, Hamilton, Iroquois Falls, Kapuskasing, Kenora, Kingston, Kitchener, London, Niagara Falls, North York Township, Peterborough, Port Arthur, St. Catharines, St. Thomas, Sarnia, Sault Ste. Marie, Scarborough Township, Smooth Rock Falls, Toronto, Weston and Windsor. Other centres are expected to develop their programmes during the ensuing years. The method of disposal of these wastes will be either by

incineration or by a newer procedure using sanitary fill with regular covering by earth or other material. An amendment to The Municipal Act at the 1946 session of the Legislature has changed the conditions under which an urban municipality may dispose of its refuse in an adjacent community. Land for this purpose can now only be secured on the consent of the adjacent municipal council.

### *Food Sanitation:*

The programme of food sanitation initiated during the previous year has been continued and expanded in 1946. Dr. G. A. Edge has been appointed officer-in-charge of Food Sanitation for the Division and he has been assisted by Dr. F. Rushton. Surveys in this respect have been continued and assistance rendered to local Boards of Health. This activity has been directed towards restaurants, slaughter houses, canning factories, bakeries, and all places where food is handled or processed. A certain amount of assistance has been rendered to local municipalities in the supervision of milk production.

Regulations dealing with frosted food locker plants were passed under date of June 25th, 1946. These regulations require licensing, by the Department, of all locker plants throughout the province. Inspections have been made by personnel of the Division and at the end of 1946 320 licenses had been issued and 374 inspections made. These inspections revealed that practically all plants in the province were defective in some respects and many showed wide variations from the requirements of the new regulations. Shortage of material has interfered with the completion of these changes but very considerable progress has been made during the year. At present there is a widespread interest in the construction of locker plants, and it is apparent that before this demand is satisfied there will be a large number of plants in operation. It has become apparent to the people of the province that locker plants furnish a very good means of food preservation and one which can be utilized at a very moderate cost.

In addition to the regulations for frosted food locker plants, standards for eating establishments in the province have been completed. At present there is no authority to pass these as regulations, but they have been prepared for the purpose of suggesting a standard to be incorporated in municipal by-laws or to be accepted for the inspection of all eating establishments. In this way there is an attempt to secure a more uniform standard throughout the province.

Surveys have been continued in canning factories, and these involve chicken canning plants, as well as plants which are canning other products. It has become apparent that the majority of these are not under Dominion supervision and are subject to no special regulations or supervision. There is an obvious need for some regulatory authority with a definite standard of operation. When the problem is more widely studied it is hoped to draw up standards for these as well as for slaughter houses and other activities in the food control field.

### *Recreational Sanitation:*

The year's activity in recreational sanitation has been directed chiefly to the inspection and licensing of summer camps, to supervision over farm service force camps, and to supervision over recreation areas in Muskoka and Lake of Bays. The limited staff available has hampered the carrying on of inspections as rapidly as would be desired. There has been an increase in summer camps and other recreational activities and, at the same time, there has been an improvement in sanitation.

As in the previous year, a sanitary engineer was stationed at Gravenhurst during the summer season where he was available to deal with the supervision

of sanitation throughout the Muskoka and Lake-of-Bays regions. He has given special attention to water supplies, sewage disposal, food supplies, swimming, and all problems of sanitation in these resort areas. In this way it has been possible to deal with complaints and to take care of problems promptly as they arise.

Attention has been directed to farm service force camps in a manner similar to that of the preceding year and 43 inspections were made by officials of this Division. These camps are now better established than previously, and less difficulty has been experienced in their maintenance.

During the year the Department of Travel and Publicity was given legislation to supervise recreational facilities. They will thus take over the control of tourist camps and similar facilities offered to the travelling public, with the intention of licensing all these places. There will be co-operation between the two Departments in the maintenance of sanitary conditions in these places.

#### *Boundary Water Survey:*

During the year authorization was given to a survey of the boundary waters between United States and Canada, and involving the St. Clair River, Lake St. Clair, Detroit River and St. Marys River. A number of meetings have been held, both with the International Joint Commission and with members of the Board of Technical Advisors.

In the first meeting with the International Joint Commission held at Montreal, the Commission appointed a Board of Technical Advisors of eight persons, including two from the two Federal Governments, two from the State of Michigan and two from the Province of Ontario. The personnel selected for this Board were as follows:

For United States—J. K. Hoskins and M. LeBosquet.  
For Michigan—J. M. Hepler and L. F. Oeming.  
For Canada—G. H. Ferguson and W. R. Edmonds.  
For Ontario—A. E. Berry and A. V. DeLaporte.

Attention has been directed to a survey of the waters from Sarnia to the outlet of the Detroit River. A large number of samples have been taken, and while this project will involve considerable time for completion, the work was well under way at the end of 1946. Special emphasis has been given in this survey to industrial wastes and their effect on the use of the water for domestic purposes and for recreation. The first survey authorized was from Sarnia to the outlet of the Detroit River, but later, authorization was given for a survey of the St. Mary's River. Only a small amount of work was possible on the latter during 1946.

In this project the Province of Ontario is responsible for the laboratory investigations and analyses, both at the Experimental Station and field laboratories at the site. This work is a major problem and will require a good deal of effort.

#### *Nuisances and Complaints:*

As in previous years, the staff of the Division has been called upon to deal with many complaints regarding nuisances and annoyances. These requests number about 200 a year. Many of them come from local Boards of Health and Health Units, while others are made by persons who have grievances. They involve a wide variety of conditions, and while a portion of them are related to public health, many of them are inconveniences only, and might well be handled by other than public health agencies. Unfortunately, it is not feasible to deter-

mine this until investigations have been completed. Every effort is made by the Division to give assistance in the solution of these problems and to assist the public in general in overcoming conditions which are in the field of nuisances.

#### *Typhoid Fever Statistics:*

The typhoid fever statistics of the province for the year 1946 were 84 cases and 5 deaths, giving a death rate of 0.1 for the entire province. This figure continues to be exceedingly low and indicates effective control measures in the field of sanitation.

#### *Cemeteries:*

The supervision over cemeteries has continued as in the previous year. This work involves examination of plans submitted for extensions of existing cemeteries or the establishment of new burying grounds. It also requires the examination of plans, rules, charges, etc., for cemeteries that are in operation. A large number of plans are received each year, and while the number of cemeteries in the province is not yet known it is apparent that they reach a very high figure. The suggested set of rules of the Department have been used as a guidance for preparation of local rules.

Difficulties have been experienced during the year in the operation of cemeteries in that increased costs have resulted from higher labour charges, and the difficulty of securing adequate personnel for this work. The Department has seen fit to grant approval for increased charges at a number of cemeteries throughout the province.

#### *Laboratory Examinations:*

During the year the laboratory at Richmond Street examined 2,039 bacteriological water samples and 565 chemical samples, as well as 502 such samples for Boundary Water Survey. The analyses for sewage included 78 bacterial tests and 976 chemical tests, together with 893 tests for Boundary Water Survey. The figures for bacteriological examinations on milk were 899 and 790 phosphatase tests. Sanitary surveys were made in two centres and the number of field inspections for the year included 344 for water, 217 for sewage, 528 for camps, 1,041 for milk, and 946 for general activities, making a total of 3,076.

During the year it has been possible to increase the staff slightly, and facilities have been made available for giving post-graduate training for new members of the staff. An attempt is now being made to provide these training facilities for all new members of the staff. There is a need for a substantial increase in personnel, following which it will be possible to reorganize the activities of the Division and to provide more effective service.

Appended is a summary of the certificates issued during the year in respect to waterworks and sewerage systems.

CERTIFICATES ISSUED RE: WATERMAIN EXTENSIONS,  
PURIFICATION, ETC., FOR THE YEAR 1946

| MUNICIPALITY   | Number of<br>Certificates | Watermain<br>Extensions | Supply and<br>Purification | New<br>Systems |
|--|---------------------------|-------------------------|----------------------------|----------------|
| Amherstburg.....   | 1                         | \$ 1,180.00             |                            |                |
| Ancaster Township.....                                     | 1                         | 5,452.84                |                            |                |
| Arnprior.....  | 3                         | 4,358.72                |                            |                |

## DIVISION OF TUBERCULOSIS PREVENTION

G. C. BRINK, M.B., *Director*

This report, the first for a full year since the close of the war, is gratifying in some respects and disappointing in others. The diagnostic facilities have been markedly increased, but the acute shortage of sanatorium beds and trained personnel is handicapping progress.

It is being recognized more and more that tuberculosis is both a social and an economic problem and that its control must include the combined efforts of all strata of society. In order that anti-tuberculosis work be co-ordinated and directed into the proper channels, leadership by official and voluntary agencies is essential. Given proper guidance the public will co-operate exceedingly well. This is demonstrated by the interest and willingness of all classes to assist in a planned programme, and by the fact that the funds from the sale of Christmas Seals, raised with the definite object of providing a more adequate diagnostic programme, have shown a marked increase throughout the province. Many local anti-tuberculosis committees doubled their previous revenues from this source. The citizens of the communities where surveys have already been held have given unstintingly of their time and effort; in some of the largest centres the house to house canvassers being numbered in the hundreds. The Press and Radio have also been most generous in their support. In addition to mass survey work sponsored by local committees, some thirty-five periodic chest clinics have been organized by the staff of the Division and have already proven their worth by providing diagnostic facilities, never before available, to residents and physicians. The charge for the X-Ray films taken at these clinics is also met from the Seal Sale funds.

It is gratifying to report that in 1946 over twice as many people were given X-Ray films of the lungs as in any previous year. Approximately 450,000 people were examined by mass surveys, either of the community type or those covering special groups in industry. The sanatorium extension clinics examined some 70,000 and the travelling departmental clinics, 14,000. Well over half a million persons were screened for tuberculosis of the lungs in Ontario in 1946.

The tuberculosis mortality rate has steadily decreased in Ontario during the past twenty years in spite of the fact that the population in recent years has increased to a greater extent than that of any other province.

The increased diagnostic programme has resulted in a shortage of sanatorium beds, made more acute by the fact that no new sanatorium construction has taken place since 1938, with the exception of forty-seven additional beds at Niagara Peninsula Sanatorium, which will be opened when staff is obtained. Approximately 200 beds in other sanatoria were unoccupied at the end of the year because of lack of staff. The loss by fire of the Department of Veterans Affairs 250 bed sanatorium at Peterborough in December has further accentuated the shortage.

During 1946 reciprocal agreements, similar to those already in effect with the provinces of Quebec and Saskatchewan, were signed with the provinces of British Columbia, Manitoba and Alberta, for the payment of sanatorium maintenance of their respective patients who have not established residence in the province in which treatment is being given. This is a forward step and obviates

delay in bringing patients under treatment and eliminates controversy as to responsibility for treatment.

Our records show that tuberculous infection is still a hazard among hospital personnel. In 1946, forth-three nurses developed tuberculosis—a larger number than in any year since 1936, when such records were first compiled. It is hoped that tuberculosis among hospital and sanatorium employees will be classified as a compensable disease in 1947. Legislation which provides compensation for those contracting tuberculosis in the course of their duties is both progressive and just, but does not in itself lessen the danger of infection to hospital employees. This can only be done by the screening of all patients entering hospitals by photofluorography or ordinary X-Ray methods, and applying necessary precautions when it is discovered that a patient has pulmonary tuberculosis. This procedure, now utilized in many hospitals in the United States, reduces the danger to personnel by uncovering many previously unknown cases of active pulmonary tuberculosis. Statistics show that the incidence of active tuberculosis is higher among hospital patients than in the population as a whole.

Rehabilitation of the tuberculous patient in Ontario has lagged behind that in some of the other provinces. A committee has been appointed by the Ontario Tuberculosis Association to make a study of the situation and it is expected a comprehensive report will be available in 1947. In some of the sanatoria educational facilities have been well organized, but there has remained a lack of guidance and supervision after the patient leaves the sanatorium. The necessity of returning to unsuitable work often results in a re-activation of the disease and a return to sanatorium for further treatment. There is some doubt as to whether a rehabilitation programme should be under the jurisdiction of the Department of Health, Welfare, or Education. It would seem that all three Departments should be represented in a concerted effort to further the lot of the discharged patient.

The need for some form of financial assistance (apart from relief) for families represented by tuberculosis, is very evident. Mothers' Allowances are a great help to many families, but are not in themselves sufficient for all necessities of life. Families in which there are no children under 16 years of age experience many hardships.

There are still many defects and weaknesses in the tuberculosis control programme in Ontario. One is the difficulty experienced in securing adequate X-Ray facilities in some clinics operated under the auspices of the local Departments of Health. The same holds true for obtaining chest films on some patients examined by private physicians. Until free X-Ray films are made available to all patients attending hospital clinics the effort to prevent tuberculosis will be seriously hampered.

It is difficult to defend the policy of insisting on contacts presenting themselves for examination and then demanding that they pay a fee for the necessary X-Ray service. Some supposedly free clinics still require an admission fee. Until this abuse is corrected hospitals cannot fulfil their function as an integral part of an adequate control programme.

The Division wishes to acknowledge the co-operation of the officials of the Ontario Tuberculosis Association and the many Seal Sale Committees throughout the province, the assistance given by the various health units and local Departments of Health, the Mothers' Allowance Commission, the staffs and directors of sanatoria, and of the other Divisions in the Department.

Doctors J. S. Hazen, F. J. Milner and A. Forsberg were demobilized from the Armed Services, but only Dr. Forsberg rejoined the staff of the Division.

## PART I

## A

REPORT OF THE WORK DONE BY THE DEPARTMENT'S  
TRAVELLING CHEST CLINICS

With the expansion of the Ontario Tuberculosis Association it has been found possible to set up periodic chest clinics in various centres within the areas served by the Travelling Chest Clinics. Relatively small but frequent clinics are held under the auspices of the Seal Sale Committees, in the local hospitals, the films being sent for reading to the nearest Travelling Clinic headquarters, or to the nearest sanatorium.

This has not affected the volume of work handled by the clinics as yet, but will lead to a considerable increase in the number of clinic examinations in the future.

*Toronto Unit*—2 clinics in 2 centres.

Only two clinics were held, viz., Oshawa and Brampton, the latter conducted under the auspices of the local Seal Sale Committee.

*Ottawa Unit*—43 clinics in 16 centres.

This unit was normally staffed and conducted its regular clinics as well as assisting in the follow-up clinics for mass surveys in that area.

Ottawa, 12 clinics; Pembroke, 10 clinics (under local auspices); Almonte (2); Arnprior, Bourget, Carleton Place (2); Casselman, Eganville, Hawkesbury (2); Kemptville, Perth, Plantagenet (2); Prescott, Renfrew (3); Rockland, Smiths Falls (2).

*Belleville Unit*—31 clinics in 14 centres.

This unit was normally staffed and conducted its regular clinics as well as assisting in nine-follow-up clinics for mass surveys in that area.

Belleville, 12 clinics; Bancroft, Bowmanville (3); Campbellford, Cobourg (3); Haliburton, Havelock, Lakefield, Marmora, Napanee, Peterborough (3); Picton, Stirling, Tweed.

*Timmins Unit*—20 clinics in 8 centres.

This unit was normally staffed but its visits to outside centres were curtailed by the fact that the staff was engaged for several weeks on a mass survey of Timmins.

Timmins, 12 clinics; Cochrane, Englehart, Hearst, Iroquois Falls, Kapuskasing, Smooth Rock Falls.

*Fort William Unit*

This unit was closed due to lack of staff, no clinics being held in North-western Ontario.

An arrangement was made, however, to have chest films taken at the local hospitals, as indicated, and forwarded to Fort William Sanatorium for interpretation. This has resulted in many persons receiving chest films who would otherwise have had to wait until the clinic was re-opened.

*North Bay Unit*—39 clinics in 20 centres.

This unit has continued to operate, staffed by our X-Ray technician only, the films being interpreted in the Central Office. The volume of work done by the clinic itself fell off somewhat in 1946 due to the fact that the technician assisted in the survey held in North Bay as well as taking the films for the follow-up clinics for all surveys in his area.

North Bay, 12 clinics; Batchawana, Blind River, Burk's Falls, Chapleau (2); Espanola, Gore Bay, Goulais Mission, Huntsville, Little Current, Massey,

Mattawa (3); Manitowaning, Manitoulin Island (follow-up from mass survey), Mindemoya, Richard's Landing, Sault Ste. Marie (3); Spanish, Sturgeon Falls (2); Sudbury (2); Thessalon.

The Division wishes to acknowledge assistance given by the Division of Public Health Nursing in supplying nurses to assist in several of these clinics.

TABLE I  
SUMMARY OF THE WORK OF THE DEPARTMENT'S  
TRAVELLING CHEST CLINICS

|                                     | Examina-<br>tions | Toronto | Ottawa | Belle-<br>ville | Timmins | Fort<br>William | North<br>Bay | Totals      |

### SUMMARY OF NEWLY DISCOVERED CASES—TOTAL 224

1. 224 new cases of tuberculosis were found.
2. 178, or 79.4%, were found on first examination and 46, or 20.6%, on repeat examination.
3. 81, or 36.1%, gave a history of contact with tuberculosis; 143, or 63.9%, gave no history of contact.
4. 100, or 44.6%, were males; 124, or 55.4%, were females.
5. 139, or 62.0%, were classed as active; 85, or 38.0%, were classed as inactive.
6. Of the 81 giving a history of contact, 36, or 44.4%, were referred because of contact only and with no symptoms referable to the chest.
- \*7. 105, or 46.8%, were recommended for sanatorium; of these 30, or 28.5%, did not realize they were ill and were classified as follows:

|                             |       |
|-----------------------------|-------|
| Minimal.....                | 20    |
| Moderately Advanced.....    | 5     |
| Far Advanced.....           | 4     |
| Pleurisy with Effusion..... | 1     |
|                             | <hr/> |
|                             | 30    |

\*Not all the 139 active cases were recommended for sanatorium, some being of the primary type far advanced terminal cases, or under adequate care at home.

NUMBER OF CONTACTS EXAMINED FOR THE FIRST TIME

| Age Groups  | Number Contacts Examined for First Time | Number Cases of Tuberculosis Discovered (Primary Infection Type not included) | Percentage of Contacts Examined Showing Disease % | Number cases of Active Tuberculosis Discovered (Primary Infection Type not included) | Percentage Contacts Examined Showing Active Disease |
|-------------|---|---|---|--|---|
| 0 to 4      | 216                                     | 0   | ...   | 0  | ...   |
| 5 to 9      | 262                                     | 1   | .4  | 1  | .4  |
| 10 to 14    | 222                                     | 0   | ...   | 0  | ...   |
| 15 to 19    | 294                                     | 6   | 2.0   | 5  | 1.7   |
| 20 to 24    | 362                                     | 4   | 1.1   | 3  | .8  |
| 25 to 29    | 343                                     | 6   | 1.7   | 5  | 1.4   |
| 30 to 39    | 474                                     | 8   | 1.7   | 4  | .8  |
| 40 to 49    | 280                                     | 5   | 1.8   | 2  | .7  |
| 50 to 59    | 153                                     | 10  | 6.5   | 5  | 3.2   |
| 60 to 69    | 98                                      | 3   | 3.0   | 1  | .1  |
| 70 and over | 27                                      | 1   | .4  | 1  | .4  |
| Totals      | 2,731                                   | 44  | 1.6   | 27   | 1.0   |

It is interesting to note the 50-59 age group gave the highest percentage of active cases among contacts examined for the first time.

TABLE IV

COMPARISON OF NUMBER OF NEW CASES OF TUBERCULOSIS FOUND IN  
RELATION TO NUMBER OF CONTACTS EXAMINED FOR FIRST TIME  
1942-1946

| Year      | Number Contacts Examined | Number Cases Tuberculosis Disease Discovered | Percentage of Number Contacts Examined | Number Cases of Active Tuberculosis Disease | Percentage % |
|-----------|--------------------------|--|--|---|--------------|
| 1942..... | 2,503                    | 102  | 4.0                                    | 68  | 2.7          |
| 1943..... | 4,007                    | 144  | 3.6                                    | 63  | 1.5          |
| 1944..... | 2,832                    | 52   | 1.8                                    | 23  | .8           |
| 1945..... | 3,103                    | 43   | 1.3                                    | 27  | .8           |
| 1946..... | 2,731                    | 44   | 1.6                                    | 27  | 1.0          |

TABLE V  
CLASSIFICATION OF NEWLY DISCOVERED CASES  
(Active and Inactive)

| Classification                     | Number | Percentage of Total % | Percentage of Number with Reinfection (Adult) Type of Disease % |
|------------------------------------|--------|-----------------------|---|
| Pulmonary Tuberculosis—            |        |                       |   |
| Childhood (Primary Infection)..... | 18     | 8.0                   | .....   |
| Minimal.....                       | 117    | 52.2                  | 60.3  |
| Moderately Advanced.....           | 44     | 19.7                  | 22.7  |
| Far Advanced.....                  | 33     | 14.8                  | 17.0  |
| Pleurisy with Effusion.....        | 10     | 4.4                   | .....   |
| Extra Pulmonary.....               | 2      | .9                    | .....   |
| TOTALS.....                        | 224    | 100.0                 | 100.0   |

Although the percentage of newly discovered cases in the minimal group is high, it would not appear so large if only active cases were included.

TABLE VI  
SUMMARY OF NEWLY DISCOVERED CASES  
1942-1946

|                               | Number of Newly Discovered Cases of Tuberculosis | Percentage of Total % | Average Percentage % |
|-------------------------------|--|-----------------------|----------------------|
| Minimal—1942.....             | 217  | 63                    | 61                   |
| 1943.....                     | 222  | 64                    |                      |
| 1944.....                     | 127  | 55                    |                      |
| 1945.....                     | 124  | 62                    |                      |
| 1946.....                     | 117  | 60                    |                      |
| Moderately Advanced—1942..... | 71   | 20                    | 24                   |
| 1943.....                     | 84   | 24                    |                      |
| 1944.....                     | 71   | 30                    |                      |
| 1945.....                     | 50   | 25                    |                      |
| 1946.....                     | 44   | 23                    |                      |
| Far Advanced—1942.....        | 55   | 17                    | 15                   |
| 1943.....                     | 41   | 12                    |                      |
| 1944.....                     | 36   | 15                    |                      |
| 1945.....                     | 26   | 13                    |                      |
| 1946.....                     | 33   | 17                    |                      |

#### SUMMARY OF CASES RECOMMENDED FOR SANATORIUM TOTAL 192

1. 192 persons were recommended for sanatorium.
2. 87, or 45.3%, were males; 105, or 54.7%, were females.
3. 97, or 50.5%, were recommended on first examination; 95, or 49.5%, on repeat examination.

4. 74, or 38.5%, did not realize they were ill, as follows:

|                                    |          |
|------------------------------------|----------|
| Childhood (Primary Infection)..... | 0        |
| Minimal.....                       | 36       |
| Moderately Advanced.....           | 26       |
| Far Advanced.....                  | 11       |
| Pleurisy with Effusion.....        | 1        |
|                                    | <hr/> 74 |

The number recommended for sanatorium on first and repeat examinations was practically the same, indicating the need for repeated check-up of contacts and of those persons with known disease.

There were 235 patients with active disease but 43 were not advised sanatorium treatment because of various factors:

- (1) The involvement was primary.
- (2) The case was terminal.
- (3) Adequate care being given at home and no sanatorium beds available.

TABLE VII  
CLASSIFICATION OF CASES RECOMMENDED FOR SANATORIUM

| Classification                     | Number | Percentage of Total % | Percentage of Number with Re-infection (Adult) Type of Disease % |
|------------------------------------|--------|-----------------------|--|
| Pulmonary Tuberculosis:            |        |                       |  |
| Childhood (Primary Infection)..... | 2      | 1.0                   | .....  |
| Minimal.....                       | 57     | 29.7                  | 32.4   |
| Moderately Advanced.....           | 62     | 32.3                  | 35.2   |
| Far Advanced.....                  | 57     | 29.7                  | 32.4   |
| Extra Pulmonary Tuberculosis.....  | 3      | 1.6                   | .....  |
| Pleurisy with Effusion.....        | 10     | 5.2                   | .....  |
| Suspects.....                      | 1      | .5                    | .....  |
| Totals.....                        | 192    | 100.0                 | 100.0  |

TABLE VIII

## COMMENTS ON TABLE X

- 1,088 persons who had received treatment in sanatorium attended the clinics.
- 501, or 46.0%, were males; 587, or 54.0%, were females.
- In 77, or 7.1%, the disease by X-Ray had cleared or become so well healed that it was not considered a factor at the time of examination.
- In the 993 with pulmonary tuberculous disease still evident, 58, or 5.8%, were considered to be active and in need of further treatment; 935, or 94.2%, were considered to have inactive disease.
- This Table illustrates the value of follow-up examinations of ex-patients of sanatoria.

TABLE XI

## CLASSIFICATION OF NON-TUBERCULOUS CHEST CONDITIONS

(Excluding Pleurisy)

| Classification                          | First Examination | Repeat Examination | Total Examinations |
|---|-------------------|--------------------|--------------------|
| Pneumonia.....                          | 101               | 43                 | 144                |
| Abnormal Heart or Aortic Shadows.....   | 56                | 20                 | 76                 |
| Silicosis or Dust Inhalation.....       | 12                | 37                 | 49                 |
| Bronchiectasis.....                     | 8                 | 27                 | 35                 |
| New Growth (provisional diagnosis)..... | 11                | 19                 | 30                 |
| Chronic Bronchitis.....                 | 9                 | 15                 | 24                 |

TABLE XV  
THE AVERAGE COST OF DISCOVERING A CASE OF TUBERCULOUS  
DISEASE ON FIRST EXAMINATION

(Based on an average cost of 3.65 per clinic examination)

| Age Groups | Number of First Examinations | Total Cost of Examinations | Number of Cases Tuberculous Disease Discovered | Average Cost per Case | Number of Cases Discovered Requiring Sanatorium Treatment | Average Cost of Discovering a Case Requiring Sanatorium Treatment |
|------------|------------------------------|----------------------------|--|-----------------------|---|---|
| 0 to 4     | 344                          | 1,255.60                   | 3  | 418.53                | 3   | 418.53  |
| 5 to 9     | 665                          | 2,427.25                   | 7  | 346.75                | 5   | 485.45  |
| 10 to 14   | 640                          | 2,336.00                   | 3  | 778.66                | 3   | 778.66  |
| 15 to 19   | 858                          | 3,131.70                   | 13   | 240.90                | 13  | 240.90  |
| 20 to 24   | 961                          | 3,507.65                   | 15   | 233.84                | 14  | 250.54  |
| 25 to 29   | 898                          | 3,277.70                   | 19   | 172.51                | 12  | 273.14  |
| 30 to 39   | 1,352                        | 4,934.80                   | 31   | 159.18                | 18  | 274.15  |
| 40 to 49   | 924                          | 3,372.60                   | 25   | 134.90                | 14  | 240.90  |
| 50 to 59   | 604                          | 2,204.60                   | 36   | 61.23                 | 14  | 157.47  |
| 60 to 69   | 349                          | 1,273.85                   | 18   | 70.76                 | 4   | 318.46  |
| 70 & over  | 127                          | 463.55                     | 9  | 51.50                 | 6   | 77.25   |
| Totals     | 7,732                        | 28,221.80                  | 179  | 157.60                | 106   | 266.24  |

This table does not give the true picture of the value of the service given, in that the discovery of cases with inactive disease is of real value and many other significant non-tuberculous conditions are discovered. This also applies to Table XVI.

TABLE XVI  
THE AVERAGE COST OF DISCOVERING A CASE OF TUBERCULOUS  
DISEASE ON REPEAT EXAMINATION

(Based on an average cost of 3.65 per clinic examination)

|   |             |
|---|-------------|
| Number of repeat examinations.....                  | 5,879       |
| Cost of this service.....                           | \$21,458.35 |
| Number of new cases of tuberculosis discovered..... | 46          |
| Average cost per case.....                          | 466.48      |
| *Number cases recommended for sanatorium.....       | 95          |
| Average cost per case.....                          | \$225.85    |

\*Some of these were known cases who had become reactivated.

### MISCELLANEOUS

1. 4,200 chest films were interpreted in the Central Office for various agencies—the Civil Service Health Centre, public hospitals and private physicians.
2. 1,075 films were taken in the Central Office—492 on provincial civil servants; 208 on persons referred by private physicians; 168 on persons referred by staff physicians; 92 on employees in industry; 60 on teachers or teachers-in-training; 39 on ex-patients of sanatoria receiving post-sanatorium care; 7 on students of the University of Toronto; 4 on employees of hospitals having no X-Ray facilities; 4 on school students and one on a person in receipt of Mothers' Allowances for tuberculosis.

## B

REPORT OF MASS X-RAY SURVEYS CONDUCTED BY THE  
DIVISION OF TUBERCULOSIS PREVENTION  
ONTARIO DEPARTMENT OF HEALTH  
1946

Mass survey operations of the Division of Tuberculosis Prevention were greatly expanded during 1946 as compared to previous years; 301,324 individuals received miniature X-Ray films of the lungs, over three times as many as in 1945. A total of 86 surveys was conducted, 77 of these being along community lines. In the latter, 289,540 persons of grade or primary school age and over were examined.

The balance consisted of the following:

- (1) Students of the Universities of Western Ontario, McMaster and Queens, the Ontario Agricultural College and the Normal School, Toronto.
- (2) Staff and prisoners of the Ontario Reformatory, Guelph.
- (3) Treaty Indians. In co-operation with the Indian Medical Services, Department of National Health and Welfare, surveys were held at two Reserves. In addition Indians were included in nine other community surveys.

Credit must be given to the various local tuberculosis committees for their valuable contribution in making their community surveys a success. They assumed not only the responsibility for the local organization of the surveys but also the community financial obligation which was paid for out of Christmas Seal funds. Many hundreds of volunteer workers also gave unstintingly of their time as canvassers and clerical assistants.

A total of 1,004 cases of tuberculosis (active and inactive), including pleurisy with effusion or .33 per cent of the number examined, was reported, 211 or .07 per cent being active and in need of treatment. These figures are lower than those for previous years and can be attributed to the negligible findings among some 80,000 primary or grade school children examined. In view of this, the Division has decided to exclude school children up to the 8th grade unless a specific reason is present. This does not apply to Indian children.

An analysis of the active cases of tuberculosis shows that 160 or 76 per cent were newly discovered. Of these 79 or 49.4 per cent occurred in the minimal stage. It is of interest to note the considerable number of active cases found in individuals over 40 years of age, viz., 81 or 38.4 per cent. In this group the males predominated in the ratio of two to one.

## GRADUATE NURSES

### 1. NEWLY DISCOVERED TUBERCULOUS DISEASE:

- 7 Minimal, active..... (a) Five entered sanatorium  
(b) Two treated in hospital  
1. Moderately advanced, active..... Entered sanatorium  
All of the 8 newly discovered cases of tuberculosis required treatment.

## 2. PREVIOUSLY KNOWN:

- |  |                  |
|--|------------------|
| 16 Minimal, inactive.....  | Remained on duty |
| 8 Moderately advanced, inactive.....                                   | Remained on duty |
| 9 Far advanced, inactive.....  | Remained on duty |
| None of the previously known cases of tuberculosis became reactivated. |                  |

## NON-GRADUATE NURSES

### 1. NEWLY DISCOVERED TUBERCULOUS DISEASE:

- |                                    |                                 |
|------------------------------------|---------------------------------|
| 6 Pleurisy with effusion.....      | (a) Two entered sanatorium      |
|                                    | (b) Two treated in hospital     |
|                                    | (c) Two treated at home         |
| 3 Primary infection.....           | (a) Two entered sanatorium      |
|                                    | (b) One treated at home         |
| 19 Minimal, active.....            | (a) Eleven entered sanatorium   |
|                                    | (b) One treated in hospital     |
|                                    | (c) Seven treated at home       |
| 3 Moderately advanced, active..... | (a) Three entered sanatorium    |
| 3 Far advanced, active.....        | (a) Two entered sanatorium      |
|                                    | (b) One died of T.B. Meningitis |
| 1 Tuberculous Peritonitis.....     | (a) Treated in hospital         |
- All of the 35 newly discovered cases of tuberculosis required treatment.

## 2. PREVIOUSLY KNOWN:

- |  |                  |
|--|------------------|
| 2 Pleurisy with effusion, inactive                                     | Remained on duty |
| 1 Primary infection, inactive  | Remained on duty |
| 22 Minimal, inactive   | Remained on duty |
| 14 Moderately advanced, inactive                                       | Remained on duty |
| 9 Far advanced, inactive   | Remained on duty |
| None of the previously known cases of tuberculosis became reactivated. |                  |

NOTE: With one exception, all of the previously known cases of tuberculosis were among non-graduate nurses employed in sanatoria.

## PART III

HISTORY OF SANATORIUM TREATMENT WITHIN FIVE YEARS OF  
DEATH IN PERSONS DYING OF TUBERCULOSIS IN ONTARIO  
1945

The record was obtained of persons dying of tuberculosis in Ontario in 1945 who had received sanatorium treatment within five years of death.

Table XXVIII gives the summary of the findings for deaths of all forms of tuberculosis, as well as pulmonary only; a separate tabulation being made for Indians, whites, and whites and Indians combined.

It will be noted that 72.1% of all persons dying of tuberculosis (all forms) had been in sanatorium, while 80.9% of those dying of pulmonary tuberculosis had received sanatorium treatment. (If the white population only is counted the percentages are 75% and 84% respectively.)

Tables XXIX, XXX and XXXI give the details re the deaths from pulmonary tuberculosis in counties, districts, cities and towns.

Table XXXII shows the analysis of those persons (excluding Treaty Indians) who died of pulmonary tuberculosis in 1945 who had not been in sanatorium within five years of death. It will be noted that 60.5% of these were over 50 years of age, and 41.1% were over 60 years of age.

## 3. Analysis According to Reason for not Entering Sanatorium

|   |    |
|---|----|
| (a) Refused Sanatorium treatment.....   | 20 |
| (b) Diagnosed shortly before death or at autopsy.....                         | 70 |
| (c) Sanatorium treatment not considered necessary by physician or clinic..... | 22 |
| (d) No answer to questionnaire.....   | 7  |

\*119

\*Seventeen of these had been treated in sanatorium previous to the five year period preceding death.

58.8% of white persons dying of pulmonary tuberculosis who did not have the benefit of sanatorium treatment were discovered shortly before death or at autopsy.

## PART IV

### REPORT UPON POST-SANATORIUM CARE OF EX-PATIENTS OF SANATORIA

The Department accepts responsibility for the care of those persons who, prior to admission to sanatoria, resided in unorganized territory or who had failed to establish residence in any municipality in Ontario within the meaning of the Sanatoria for Consumptives Act. Post-sanatorium care provides for treatment outside of sanatorium, including food, lodging necessities of life and transportation.

Sixty-two such persons were discharged from sanatoria in 1946. Twenty-five of this group were in a position to assume immediate responsibility for their own welfare, or were sufficiently recovered to return to employment at once, and five required only some initial assistance (clothing, transportation). The remaining thirty-two required assistance with board and lodging, and sixteen of these also required further help (clothing, transportation).

As of December 31st, 1946, a total of forty-three patients were receiving board and lodging, eleven of these having been carried over from 1945.

Although not classed directly as part of its post-sanatorium care programme, the Government pays physicians approved to give pneumothorax refills for work done on ex-patients who cannot pay for their treatments. Approximately 1,600 persons who received in excess of 30,000 refills were cared for in this way.

## DIVISION OF VENEREAL DISEASE CONTROL

W. G. BROWN, M.D., D.P.H., *Acting Director*

The year 1946 was one of transition, with the programme of the Division passing through a period of adjustment due to the demobilization of the armed forces and the reduction of the part played by the armed forces medical services in venereal disease control. The early months of 1946 continued to show the rather significant part played by the armed forces in case and contact reporting but, as the year progressed, this participation decreased until, by the closing months of the year, it had become a minor contribution. Demobilization also made available greatly needed medical staff and this permitted an extension of activities, which heretofore had not been possible.

It was expected that the cessation of hostilities, demobilization, and the return of large numbers of our male population in the most significant age groups, would have had an adverse effect on reported venereal disease incidence. The expected increase, however, did not materialize; on the contrary, a decrease was recorded.

The programme of the Division has been subjected to a critical appraisal with the intention of evaluating all procedures as to their contribution to more effective prevention and control of venereal diseases. This appraisal will be continued and it is anticipated that significant changes may be indicated in the programme. Initially an effort has been made to eliminate unproductive activities and routines. However, it is apparent that no single plan of control can be effectively applied to both syphilis and gonorrhoea, but rather each should have its respective series of procedures.

### A. STATISTICAL SUMMARY

A statistical summary of venereal disease infection as reported to our Division for the first time is presented in the following tables and text. This information concerns only that portion, of all venereal disease, which is brought to the attention of the Division by reporting; and, although it may be representative of all venereal disease which prevails, it is not a measure of total incidence. The continuance of a high reported incidence of venereal disease is sufficient proof that there continues to exist in our population large numbers of communicable infections which are not located and brought under medical care. This contention is further supported by the evidence provided by contact investigation procedures, which result in the location of numerous infections which would not otherwise be brought under control.

It will be noted in Table I that there was a decrease in the reported incidence of syphilis and gonorrhoea during the year. The decrease in reported syphilis was insignificant, amounting to only 85 cases less than the total for the year 1945. The decrease in reported gonorrhoea amounted to 871 cases less than the total for the previous year. The trend of reporting during the year is expressed in Figure I. This graph depicts the gradual decrease in the monthly reported incidence of both syphilis and gonorrhoea.

Showing the Number of Cases of Venereal Disease Reported by Months  
January to December, 1946

## B. REPORTED INCIDENCE OF SYPHILIS

In presenting the statistical data on reported syphilis, the infections have been divided into three groups based on the classification of diagnosis. These groups comprise prenatal (congenital) syphilis, acquired syphilis and syphilis which was not classified. The cases of prenatal syphilis represent 120 infections which are presumed to have been spread to the persons concerned before birth. Had the diagnosis been established in the mother, early in pregnancy, and had appropriate treatment been given, these infections almost certainly could have been prevented.

The cases of acquired syphilis represent those infections which were acquired by the persons concerned through exposure to infections which were in a communicable form. The occurrence of these cases is direct proof of the existence of communicable syphilis which was not located and rendered non-communicable by treatment. The cases of acquired syphilis have been divided into two groups, early and late, in accordance with the stage of disease at the time of diagnosis. Early acquired syphilis includes infections in the primary and secondary stages. They were all communicable and were infections which offered the best opportunity for control through treatment.

The cases of late acquired syphilis include those infections which have advanced beyond the early stages and have reached a latent or asymptomatic stage. Late acquired syphilis also includes those infections advanced even farther than latency to the stage when chronic manifestations become evident. All the cases in this group are liabilities in that they probably were, in their early stages, the unknown source of many cases of syphilis, and now their treatment will be difficult, prolonged and uncertain in its benefits. These cases include cardiovascular syphilis, neurosyphilis and other cases of syphilis with late manifestations present at the time of diagnosis.

The group of cases classified as syphilis, type not stated, represents cases concerning which all detailed information is lacking. Every effort is being made to reduce this group to the point of elimination by seeking supplementary data and distributing information respecting the basis for classification of diagnosis.

| U Late.....                   | 1,208             | 39.4                | 679               | 38.4                | 1,887             | 39.0                |
| I Latent.....                 | 846               | 27.6                | 528               | 29.9                | 1,374             | 28.4                |
| R Other.....                  | 362               | 11.8                | 151               | 8.5                 | 513               | 10.6                |
| E Type Not Stated...          | 306               | 10.0                | 180               | 10.2                | 486               | 10.1                |
| D Total Syphilis.....         | 3,065             | 100.0               | 1,769             | 100.0               | 4,834             | 100.0               |

It may be noted in Table 3 that, in so far as the distribution of reported syphilis in the three main classification groups is concerned, the factor of sex is of no apparent significance. The only exception is in prenatal syphilis, where the percentage of reported cases among females exceeded that among males.

| 30 plus   | 1                 | 4  | 404               | 90    | 161       | 106   | 534    | 245   | 305   | 109   | 135             | 67    | 1,540 | 621   |
| N.S.      | ...               | 1  | 93                | 37    | 25        | 39    | 65     | 50    | 37    | 23    | 74              | 49    | 294   | 199   |
| Total..   | 54                | 66 | 1,146             | 429   | 351       | 415   | 846    | 528   | 362   | 151   | 306             | 180   | 3,065 | 1,769 |
|           | 120               |    | 1,575             |       | 766       |       | 1,374  |       | 513   |       | 486             |       | 4,834 |       |

The factor of age, however, is of some significance and a large proportion of reported incidence continues to be reported among the 17-29 year age groups. It is apparent that there is a need to extend the age group breakdown in order to provide more detailed information regarding the infections now included as 30 years of age and over.

Moreover, when discussing the factor of age, in relation to reported venereal disease incidence, it would appear reasonable that the age distribution of the population should be taken into consideration. Table IV presents case reporting of syphilis by sex and age group. In Table V these data have been presented as the percentage of reported cases in age groups by sex, together with the annual reported rate per thousand of population in each age group.

TABLE V  
THE REPORTED INCIDENCE OF SYPHILIS IN ONTARIO

Showing the Percentage Distribution and Annual Rate per Thousand Population of  
Reported Syphilis by Age Group and Sex  
January to December, 1946

| Age Group    | SYPHILIS             |              |                      |              |
|--------------|----------------------|--------------|----------------------|--------------|
|              | Male                 |              | Female               |              |
|              | Percent Distribution | Rate Per M.* | Percent Distribution | Rate Per M.* |
| 0-4.....     | 1.0                  |              | 2.0                  |              |
| 5-9.....     | 0.2                  | 0.09         | 0.3                  | 0.10         |
| 10-14.....   | 0.3                  |              | 0.5                  |              |
| 15-19.....   | 3.3                  | 0.61         | 11.7                 | 1.26         |
| 20-24.....   | 17.7                 | 3.16         | 22.4                 | 2.26         |
| 25-29.....   | 17.7                 | 3.38         | 16.7                 | 1.81         |
| 30 plus..... | 50.2                 | 1.51         | 35.1                 | 0.62         |
| N.S.....     | 9.6                  | 0.14         | 11.3                 | 0.10         |
| Total.....   | 100.0                | 1.52         | 100.0                | 0.89         |

\*Reported rate per thousand per annum estimated on basis of 1945 population figures.

It will be noted how the additional factor of age distribution of population somewhat alters the impression of distribution of reported case incidence which might otherwise be gained from Table IV. For example, in Table IV, reported cases of syphilis among males in the 20-24 and 25-29 year age groups are almost identical in number. However, Table V indicates that the reported incidence among males in the 25-29 year age group is somewhat greater than among males in the 20-24 year age group.

### C. REPORTED INCIDENCE OF GONORRHOEA

The reports received respecting gonorrhoea offer only two classifications, ophthalmia neonatorum (infection in the eyes of the new born) and all other forms of gonorrhoea combined. Although it is known that this latter group includes urethritis, arthritis, vulvovaginitis and other clinical entities, this detail is not requested on the official notification form. There is obvious need for a more detailed classification of reported gonorrhoea, and any programme of prevention and control will be handicapped until such detail is provided.

As in the case of syphilis, the continued high reported incidence of gonorrhoea is expressive of the existence of large numbers of cases of gonorrhoea which were not located and rendered non-communicable. Significant advances have been made in methods of therapy but these advances cannot benefit programmes of control as long as these conditions persist.

TABLE VI  
THE REPORTED INCIDENCE OF GONORRHOEA IN ONTARIO

Showing the Annual Number of Gonorrhoea Infections Reported  
1937 to 1946

| YEAR      | GONORRHOEA | YEAR      | GONORRHOEA |
|-----------|------------|-----------|------------|
| 1937..... | 3,481      | 1942..... | 6,220      |
| 1938..... | 4,188      | 1943..... | 6,390      |
| 1939..... | 4,125      | 1944..... | 7,908      |
| 1940..... | 4,218      | 1945..... | 8,225      |
| 1941..... | 5,293      | 1946..... | 7,354      |

TABLE VII  
THE REPORTED INCIDENCE OF GONORRHOEA IN ONTARIO

Showing an Analysis of Gonorrhoea Reports Received by Reporting Agency and Sex  
1945 and 1946

| Reporting Agency     | GONORRHOEA |       |        |       |       |       |
|----------------------|------------|-------|--------|-------|-------|-------|
|                      | Male       |       | Female |       | Total |       |
|                      | 1945       | 1946  | 1945   | 1946  | 1945  | 1946  |
| Private Physicians.. | 1,835      | 2,337 | 713    | 652   | 2,548 | 2,989 |
| Clinics.....         | 1,732      | 2,384 | 1,101  | 880   | 2,833 | 3,264 |
| Armed Forces.....    | 2,555      | 860   | 45     | 5     | 2,600 | 865   |
| Other.....           | 154        | 156   | 90     | 80    | 244   | 236   |
| Total.....           | 6,276      | 5,737 | 1,949  | 1,617 | 8,225 | 7,354 |

The number of cases of gonorrhoea reported during the year is given in Table VI and this table shows that there was a decrease of 871 reported cases as compared with the previous year. Table VII gives a comparison of sources of case reports of gonorrhoea for the years 1945 and 1946. It will be noted that there was an increase in the number of cases reported by physicians and clinics and a decrease in the number of cases reported by the armed forces.

The reported incidence of gonorrhoea by sex and age group is expressed in Table VIII. A larger number of cases were reported among males except in the age groups under 17 years, when of course, vulvovaginitis is encountered in the female. The lower reported incidence in females is probably due in part to the difficulty of establishing a confirmed diagnosis even by the best laboratory methods and also in part to the fact that symptoms in the female are not as likely to lead to medical attention.

TABLE VIII

## THE REPORTED INCIDENCE OF GONORRHOEA IN ONTARIO

Showing the Distribution of Reported Gonorrhoea by Age Group and Sex  
January to December, 1946

| Age Group    | GONORRHOEA |        |       |
|--------------|------------|--------|-------|
|              | Male       | Female | Total |
| 0-4.....     | 3          | 33     | 36    |
| 5-9.....     | 2          | 20     | 22    |
| 10-14.....   | 4          | 21     | 25    |
| 15-16.....   | 30         | 63     | 93    |
| 17-19.....   | 425        | 331    | 756   |
| 20-24.....   | 2,227      | 540    | 2,767 |
| 25-29.....   | 1,462      | 270    | 1,732 |
| 30 plus..... | 1,229      | 220    | 1,449 |
| N.S.....     | 355        | 119    | 474   |
| Total.....   | 5,737      | 1,617  | 7,354 |

TABLE IX

## THE REPORTED INCIDENCE OF GONORRHOEA IN ONTARIO

Showing the Percentage Distribution and Annual Rate per Thousand Population of  
Reported Gonorrhoea by Age Group and Sex  
January to December, 1946

| Age Group    | GONORRHOEA           |              |                      |              |
|--------------|----------------------|--------------|----------------------|--------------|
|              | Male                 |              | Female               |              |
|              | Percent Distribution | Rate Per M.* | Percent Distribution | Rate Per M.* |
| 0-4.....     | 0.2                  | 0.02         | 2.0                  | 0.15         |
| 5-9.....     |                      |              | 1.2                  |              |
| 10-14.....   |                      |              | 1.3                  |              |
| 15-19.....   | 7.9                  | 2.74         | 24.4                 | 2.41         |
| 20-24.....   | 38.8                 | 13.02        | 33.4                 | 3.08         |
| 25-29.....   | 25.5                 | 9.11         | 16.7                 | 1.65         |
| 30 plus..... | 21.4                 | 1.20         | 13.6                 | 0.22         |
| N.S.....     | 6.2                  | 0.18         | 7.4                  | 0.06         |
| Total.....   | 100.0                | 2.84         | 100.0                | 0.81         |

\*Reported rate per thousand per annum estimated on basis of 1945 population figures

As stated previously, when discussing syphilis, there is an indicated need for an extension of age group breakdown beyond the age of 29 years. Moreover, when the factor of age distribution of population is considered, a somewhat different impression is given of reported incidence in the various age groups.

TABLE X  
THE REPORTED INCIDENCE OF VENEREAL DISEASE IN ONTARIO

Showing the Distribution of Reported Male Infections by Age Group  
January to December, 1946

| AGE GROUP        | GONORRHOEA | SYPHILIS | RATIO OF<br>G. TO S. |
|------------------|------------|----------|----------------------|
| Under 15.....    | 9          | 46       | 0.2:1                |
| 16-19.....       | 455        | 101      | 4.5:1                |
| 20-24.....       | 2,227      | 541      | 4.1:1                |
| 25-29.....       | 1,462      | 543      | 2.7:1                |
| 30 and over..... | 1,229      | 1,540    | 0.8:1                |
| Not stated.....  | 355        | 294      | 1.2:1                |
| Total.....       | 5,737      | 3,065    | 1.9:1                |

It has been stated that the ratio of gonorrhoea to syphilis, as reported, is indicative of the completeness of case reporting. In view of many variables involved, it is difficult to see how any such ratio could be significant. The variation in the ratio of reported gonorrhoea to reported syphilis among males in various age groups is shown in Table X.

#### D. EPIDEMIOLOGY

The need for epidemiology in venereal disease control is fully justified by the fact that every person infected with venereal disease was infected by a pre-existing communicable case and can spread this newly acquired infection to other persons. From the standpoint of epidemiology every diagnosed infection of venereal disease is a public health asset, in so far as the infected person is a potential source of valuable information, which may lead to the discovery of infections not yet diagnosed.

The procedures of epidemiologic investigation depend fundamentally upon the notification of venereal disease infections. The value of interviewing the newly diagnosed case will depend upon the skill of the interviewer and the intelligent use of the information which is obtained. Interviewing under any circumstances is an art which, however, must be at its best when venereal diseases are concerned. The techniques employed often may be already known to practicing physicians or public health personnel, but the skill with which these techniques are applied can only be developed through experience.

TABLE XI  
EPIDEMIOLOGIC INVESTIGATION OF CONTACT INFORMATION IN ONTARIO

Showing Cases Reported and Contact Informations Received  
1943 to 1946

| Year      | Venereal Disease<br>Cases Reported | Contact Informations<br>Received |
|-----------|------------------------------------|----------------------------------|
| 1943..... | 13,239                             | 2,047                            |
| 1944..... | 13,273                             | 6,820                            |
| 1945..... | 13,144                             | 10,360                           |
| 1946..... | 12,188                             | 9,006                            |

TABLE XII

## EPIDEMIOLOGIC INVESTIGATION OF CONTACT INFORMATION IN ONTARIO

Showing the Relation between Cases Reported and Contact Informations Received, by Sex  
January to December, 1946

|                 | Reported Cases | Contact Informations Received | Ratio of Cases to Contacts |
|-----------------|----------------|-------------------------------|----------------------------|
| Male:           |                |                               |                            |
| Syphilis.....   | 3,065          | 1,617                         | 1:0.53                     |
| Gonorrhoea..... | 5,737          | 4,604                         | 1:0.80                     |
| Total.....      | 8,802          | 6,221                         | 1:0.71                     |
| Female:         |                |                               |                            |
| Syphilis.....   | 1,769          | 1,353                         | 1:0.76                     |
| Gonorrhoea..... | 1,617          | 1,432                         | 1:0.89                     |
| Total.....      | 3,386          | 2,785                         | 1:0.82                     |
| Total:          |                |                               |                            |
| Syphilis.....   | 4,834          | 2,970                         | 1:0.61                     |
| Gonorrhoea..... | 7,354          | 6,036                         | 1:0.82                     |
| Total.....      | 12,188         | 9,006                         | 1:0.74                     |

The trend of reporting of information concerning alleged contacts is given in Tables XI and XII. No great significance should be placed upon the ratio of new cases reported to contact informations received since it is known that all cases are not interviewed and all contact informations are not relevant.

TABLE XIII

## EPIDEMIOLOGIC INVESTIGATION OF CONTACT INFORMATION IN ONTARIO

Showing the Number of Venereal Disease Contact Informations Received from  
Armed Forces and Civilian Agencies  
1943 to 1946

| Year      | REPORTING AGENCY |         |          |         |
|-----------|------------------|---------|----------|---------|
|           | Armed Forces     |         | Civilian |         |
|           | Number           | Percent | Number   | Percent |
| 1943..... | 1,542            | 75.3    | 505      | 24.7    |
| 1944..... | 3,448            | 50.6    | 3,372    | 49.4    |
| 1945..... | 3,537            | 34.1    | 6,823    | 65.9    |
| 1946..... | 1,183            | 13.1    | 7,823    | 86.9    |

In previous years the contribution of the medical services of the armed forces to the epidemiological phase of the programme was considerable. The part played by this reporting agency, however, has been decreasing and, by the end of the year, had reached a level of minor importance. There was an upward trend of reporting of contact information by civilian agencies and this trend can be expected to continue.

TABLE XIV

## EPIDEMIOLOGIC INVESTIGATION OF CONTACT INFORMATION IN ONTARIO

Showing Relation between Cases Reported and Contact Informations Received  
from Armed Forces and Civilian Agencies  
1945 and 1946

| Year |   | Armed Forces | Civilian | Total  |
|------|---|--------------|----------|--------|
| 1945 | Reported Cases of Venereal Disease..... | 3,408        | 9,736    | 13,144 |
|      | Contact Informations Received.....      | 3,537        | 6,823    | 10,360 |
|      | Ratio of Cases to Contacts.....         | 1.03         | 0.70     | 0.78   |
| 1946 | Reported Cases of Venereal Disease..... | 1,244        | 10,944   | 12,188 |
|      | Contact Informations Received.....      | 1,183        | 7,823    | 9,006  |
|      | Ratio of Cases to Contacts.....         | 0.95         | 0.72     | 0.74   |

Showing the Ratio between Cases Reported and Contact Informations Received by  
Reporting Agency

January to December, 1946

| Reporting Agency  | Reported Cases<br>of Venereal<br>Disease | Number of<br>Contact<br>Informations | Ratio of<br>Cases to<br>Contacts |
|-------------------|--|--------------------------------------|----------------------------------|
| Clinics.....      | 5,152                                    | 4,980                                | 1:0.97                           |
| Physicians.....   | 5,116                                    | 2,457                                | 1:0.48                           |
| Armed Forces..... | 1,244                                    | 1,183                                | 1:0.95                           |
| Other.....        | 676                                      | 386                                  | 1:0.57                           |
| Total.....        | 12,188                                   | 9,006                                | 1:0.74                           |

The distribution by agency of reported venereal disease cases and contact informations received, together with the ratio of cases to contacts, is shown in Table XV. The greater number of contact informations was provided by clinics.

TABLE XVI

| Armed Forces..            | 7                     | 159                     | 166                    | 15                    | 1,002                   | 1,017                  | 22                    | 1,161                   | 1,183                  |
| Total.....                | 1,353                 | 1,617                   | 2,970                  | 1,432                 | 4,604                   | 6,036                  | 2,785                 | 6,221                   | 9,006                  |

The distribution of contact informations by reporting agency and sex, and by disease of the persons interviewed, is given in Table XVI. Since the total reports of newly diagnosed cases forwarded by physicians and clinics were quite comparable in numbers, Table XVI gives some indication of the relative success of these two reporting agencies in obtaining contact information.

TABLE XVII

## EPIDEMIOLOGIC INVESTIGATION OF CONTACTIN FORMATION IN ONTARIO

Showing Contacts Reported by Age Group, Sex and Disease  
January to December, 1946

| Age Group       | SYPHILIS |        |       | GONORRHOEA |        |       | TOTAL<br>VENEREAL DISEASE |        |       |
|-----------------|----------|--------|-------|------------|--------|-------|---------------------------|--------|-------|
|                 | Male     | Female | Total | Male       | Female | Total | Male                      | Female | Total |
| Under 15.....   | 76       | 82     | 158   | 6          | 10     | 16    | 82                        | 92     | 174   |
| 16-19.....      | 55       | 176    | 231   | 68         | 774    | 842   | 123                       | 950    | 1,073 |
| 20-24.....      | 239      | 383    | 622   | 434        | 1,792  | 2,226 | 673                       | 2,175  | 2,848 |
| 25-29.....      | 210      | 209    | 419   | 271        | 715    | 986   | 481                       | 924    | 1,405 |
| 30 and over.... | 390      | 314    | 704   | 282        | 437    | 719   | 672                       | 751    | 1,423 |
| Not Stated....  | 383      | 453    | 836   | 371        | 876    | 1,247 | 754                       | 1,329  | 2,083 |
| Total.....      | 1,353    | 1,617  | 2,970 | 1,432      | 4,604  | 6,036 | 2,785                     | 6,221  | 9,006 |

The age group distribution of persons named as alleged contacts is given in Table XVII. If this table is considered in conjunction with Tables IV and VIII it will be noted that the age distribution of persons named in contact informations is comparable to the age distribution of reported cases.

TABLE XVIII

## EPIDEMIOLOGIC INVESTIGATION OF CONTACT INFORMATION IN ONTARIO

Showing the Number of Contacts Located and the Number of Contacts Found Infected  
1944 to 1946

|------------|-------------------------------|-----------------------|-----------------|-------------------------|-----------------|-----------------|
|            |                               | Number                | Percent<br>of A | Number                  | Percent<br>of B | Percent<br>of A |
|            |                               |                       |                 |                         |                 |                 |
| 1944.....  | 6,820                         | 2,518                 | 36.9            | 1,380                   | 55.1            | 20.2            |
| 1945.....  | 10,360                        | 3,840                 | 37.1            | 2,122                   | 55.3            | 20.5            |
| 1946*..... | 9,006                         | 3,761                 | 41.8            | 1,856                   | 49.4            | 20.6            |

\*Thirty percent of the contacts reported during 1946 were still under investigation at the end of the year.

An evaluation of the results of epidemiology is difficult since the data available for analysis are incomplete. The information provided in Tables XVIII and XIX should be considered to be no more than an indication of the effectiveness of contact investigation procedures. According to Table XVIII, the success attained over the past three years has been more or less uniform, irrespective of

the number of contact investigations carried out. In Table XIX is indicated, in greater detail, the results of investigations carried out during the year 1946, based upon the reports received up to the end of the year.

TABLE XX

## EPIDEMIOLOGIC INVESTIGATION OF CONTACT INFORMATION IN ONTARIO

Showing New Cases of Venereal Disease Brought Under Diagnosis through Contact Investigation

January to December, 1946

|  | SYPHILIS |        | GONORRHOEA |        | TOTAL |        |
|--|----------|--------|------------|--------|-------|--------|
|  | Male     | Female | Male       | Female | Male  | Female |
| Cases of Venereal Disease Reported During Period.....                                      | 3,065    | 1,769  | 5,737      | 1,617  | 8,802 | 3,386  |
| Contacts Located and Found Positive During Period.....                                     | 294      | 416    | 295        | 851    | 589   | 1,267  |
| Percent of Reported Venereal Disease Brought Under Diagnosis Through Contact Investigation | 9.6      | 23.5   | 5.2        | 52.6   | 6.7   | 37.5   |

The number of new cases of venereal disease which can be presumed to have been brought under diagnosis through contact investigation, and the percentage which they constitute of the total cases of venereal disease reported during the year is given in Table XX. Since the data concerned are incomplete, the information presented in this table should only be accepted as a limited expression of the results which were obtained.

A detailed appraisal of present methods of case interviewing and contact investigation is being carried out with the intention of improving the quality and adequacy of identifying information and assuring more efficient and effective tracing of the chain of infection, of which each newly diagnosed case is but a single link.

## E. ADMINISTRATION

*Staff:*

The medical personnel of the Division was augmented, in the early months of the year, by the appointment of Dr. A. A. Baker and Dr. A. J. Denne. These appointments have made possible an extension of all services offered by the Division. Reference is made particularly to the improvement in services rendered to physicians, municipalities and hospitals. Intensive study of epidemiology was also possible. This study has resulted in an improvement in the assistance rendered by the Division and in the quality of epidemiology as it is applied at the local level.

Opportunity was afforded to permit the supervisor of nurses in the Division to proceed on leave of absence for one year for advanced studies in public health nursing. This additional qualification will be of great value as a preparation toward meeting the demands of the growing participation of the public health nurse in venereal disease control procedures. Through the short course in venereal disease epidemiology, offered by the Division, and through opportunities provided for demonstration of epidemiologic techniques the recommendations of the Division that venereal disease control procedures be included in generalized public health nursing practice is receiving wider acceptance.

*Clinic Services:*

The services rendered by the nineteen clinics established throughout the Province have shown considerable expansion during the year.

\*Clinic closed on October 31, 1945.

The attendances at these clinics for the years 1944, 1945 and 1946 are given in Table XXI. It will be noted that a considerable increase occurred in attendances during 1946, the total attendance being the greatest yet recorded.

| 1946..... | 1,917    | 979    | 2,896 | 2,551      | 955    | 3,506 | 4,468                     | 1,934  | 6,402 |

The increased activity of clinics is also expressed in Table XXII which gives the total new admissions to clinics by disease and sex for the years 1941 to 1946, inclusive. It will be noted that there has been a progressive increase in new admissions to clinics for this six year period with a significant rise occurring during the year 1946.

This increase in new admissions for the past year occurred in both diseases and both sexes, with the major portion of the increase occurring among males.

| Total.....                               | 2,121 | 2,254 | 2,419 | 2,422 | 4,619 | 6,402 |

\*Clinic closed on October 31, 1945.

The new admissions to the various clinics are given in Table XXIII for the years 1941 to 1946, inclusive. It will be noted that an increase was recorded for all clinics with one exception. This clinic is one in which the services are confined to the examination and treatment of children. It would be hoped that the slight decrease in new admissions to this clinic over the past three years is indicative of better control of prenatal syphilis, ophthalmia neonatorum and vulvovaginitis.

| 1946 | Syphilis .....   | 2,896                        | 699   | 24.1    |
|      | Gonorrhoea ..... | 3,506                        | 543   | 15.5    |
|      | Total .....      | 6,402                        | 1,242   | 19.4    |

The information forwarded to the Division respecting clinic patients who discontinued treatment or were lost is given in Table XXIV. It will be noted that although the new admissions to clinics increased during the year, the relative number of patients discontinuing treatment or recorded as lost has been slightly reduced.

Plans for improving and extending clinic services are being carried forward and financial assistance in carrying out alterations to improve clinic quarters was continued. The newer therapeutic methods have been included in available medical services and study is being made of therapeutic preparations which give promise of providing earlier cure.

Grants to clinics for medical services were increased in many instances in accordance with improvement in services and increased clinic attendance. Grants for clerical assistance have now been offered and the majority of clinics have qualified for this further assistance toward the cost of clinic operation.

#### *Fever Therapy Centres:*

The Division continues to subsidize nine fever therapy centres. These centres have rendered valuable specialized service which cannot be replaced by other forms of therapy. Although one centre was forced to close temporarily due to lack of trained staff, all other centres have been active with four centres operating to capacity throughout the year. It is intended that a suitable summary of the activities of these centres will be included in the report for the coming year.

#### *Drug Distribution:*

The Division supplies to physicians and clinics a variety of therapeutic preparations used in standard therapy of syphilis. Sulphonamides and peni-

cillin are distributed to clinics only. It is required that therapeutic preparations be requisitioned on a form provided for the purpose and that the registration numbers of the cases to be treated be supplied.

TABLE XXV

MEDICATIONS DISTRIBUTED BY THE DEPARTMENT OF HEALTH  
FOR ONTARIO

1945 and 1946

| MEDICATION                   | AMOUNT DISTRIBUTED |         |         |         |        |        |

The quantities of the various preparations distributed during the year, together with the distribution for 1945, is given in Table XXV.

## F. EDUCATION

### *Public Education:*

The educational activities of the Division continued to occupy a prominent place in the programme during the year 1946. The introduction of instruction about venereal diseases into the curriculum of secondary schools was of particular importance, although the demand for literature and other materials continued to be significant and requests for loans of films and displays approximated those for the year 1945. The new 'teen-age booklet on venereal disease, entitled "Take Care of Yourself", has been well received and continues to be in great demand. Although specifically prepared for the 'teen-age group it is also having a wide distribution among adults.

An attempt has been made to ensure that the loan of films is based upon preparations to present suitable education in conjunction with film projections. Table XXVIII gives an analysis of the 422 projections of public educational films in relation to the nature of educational activities which were associated with these projections.

During the year 1946 members of our staff gave 74 public addresses on venereal diseases to an average audience attendance of 41. The audiences addressed included business, young people's, educational, church, welfare and professional groups.

*Professional Education:*

The efforts of the Division to promote increased professional education received strong support in the recommendation of the Dominion Council of Health, that the instruction given to undergraduate and post-graduate students in medical and nursing schools be extended. Opportunity was afforded the staff of the Division to give lectures on the public health aspects of venereal disease control to the senior year medical students, post-graduate-students in public health nursing, and post-graduate students for the diploma in public health. The script of a manual on venereal diseases, for undergraduate nurses, was completed and has been forwarded to the Council of Nurse Education for consideration.

TABLE XXIX  
 VENEREAL DISEASE EDUCATION IN ONTARIO

Showing Professional Addresses and Lectures\*

January to December, 1946

| Total.....                | 80                     | 29                          |

\*In conjunction with twenty of the above lectures and addresses the medical film "Syphilis" was shown.

The Bulletin of Venereal Disease Control, prepared for physicians, was published five times during the year with the following leading articles being presented:

- (i) A Psychiatric Contribution to Venereal Disease Control.
- (ii) Examination of the Spinal Fluid in Syphilis.
- (iii) Serodiagnosis of Syphilis (Part One).
- (iv) Serodiagnosis of Syphilis (Part Two).
- (v) Skin Lesions in Syphilis.

The Bulletin on Venereal Disease Control, prepared for public health personnel, was distributed periodically with the purpose of bringing to those working in the field of public health, useful information to assist them in the application of their venereal disease programme.

## MEDICAL STATISTICS BRANCH

A. H. SELLERS, M.D., D.P.H., *Director*

The Medical Statistics Branch was instituted on September 15th, 1936, with the two-fold primary objective of "enabling the Department to more adequately assess the value of the programme for cancer treatment, so heavily subsidized by the Government", and to render assistance in ensuring "a better type of approach to the problems resulting from increased hospitalization". During the pre-war years 1936 to 1939, inclusive, and through 1940 as well, it was to these questions that the attention of the Branch was primarily directed. The essential accomplishments in these two fields are set out in the annual reports for the years 1937 to 1940, inclusive.

From the outset, however, it was evident that the sphere of usefulness of the Branch could be broadened to the advantage of all Divisions and the Department as a whole. To this end, the Medical Statistics Branch assumed responsibility for the routine collection and analysis of statistical data covering the work of all Ontario (Mental) Hospitals, for the preparation of such monthly and periodic reports and studies as are required for administrative purposes, and for preparation of the Annual Report of Ontario Hospitals for Mentally Ill, Mentally Defective, Epileptic and Habituate Patients. The opportunities for useful service in the field of mental health and hospital statistics are most extensive and it cannot be said that anything more than a modest beginning has been made.

The further development of the Branch to provide a consulting service to all Divisions in the Department, covering all phases of public health statistics was visualized in 1937, and although interrupted by the War, is still the most constructive opportunity for the future. In this field the activities of the Branch have been and would be "of a co-ordinating character and the time spent in this way is most effective in assuring the best approach to a problem or the securing of the maximum out of any available data". The numerous requests for information and assistance are ample testimony of this fact.

### THE ACTIVITIES OF THE BRANCH DURING THE YEAR

The activities of the Branch were reduced to the minimum during the War period, 1940 to 1945, and with few exceptions, only the necessary routine statistical work was maintained. Development of the functions of the Branch and its personnel was completely suspended and much of what had been accomplished in these directions was lost.

During 1946, the fundamental consideration has been the re-establishment of the Branch on a reasonable basic minimum peace-time footing and a large measure of the efforts of the staff have been directed to this end. While considerably more intensive work will be required to complete the rehabilitation and re-organization of the work of this Branch, a substantial part of the ground-work has been completed, including plans for the collection and binding of official statistical reports, the handling and filing of returns, the collection and maintenance of statistical reference material, etc.

For convenience, the most important phases of the work undertaken by the Branch during the year are summarized briefly, *seriatim*, in the sections which follow.

## 1. CANCER RECORDS, REPORTS AND STATISTICS

Since its inception in 1936, responsibility for the collection, tabulation and analysis of data on the incidence and prevalence of cancer and the assessment of treatment results in Ontario Cancer Centres, has rested with the Medical Statistics Branch. To this end, this Branch devised and inaugurated in August, 1937, a complete recording and follow-up system in the seven Ontario Cancer Centres located in Windsor, London, Hamilton, Toronto, Kingston and Ottawa (2). The development of this plan was made possible in its present form only through the full co-operation and active assistance of the Directors of the Cancer Centres. The statistical phases of the plan, including the "follow-up cards" employed, were based in large measure on the National Radium Commission (Great Britain) plan. The history, examination, and treatment records, although evolved after studying the forms of cancer centres all over the world, are unique in many respects.

### *Annual Reports on Cancer Centres*

Through an arrangement between the Department and the Directors of the seven Ontario Cancer Centres, the "follow-up" record cards of all new patients applying for treatment each year are regularly forwarded to the Medical Statistics Branch for review, tabulation, and analysis. From these cards a statistical summary comprising twelve tables is prepared for each Centre. In addition, a consolidated summary covering all seven clinics is also prepared. Upon completion of this work the cards are returned to the respective Centres, for adjustment, where necessary, and for the recording of further data on follow-up and treatment. The Director of each Centre is in due course provided with a copy of the statistical summary for his Centre together with a copy of the consolidated report covering the work of all Centres combined.

This plan was continued throughout the War period and during 1946 reports on the new case experience during 1945 were prepared.

Statistical investigation is established as one of the essential lines of approach in the scientific fight against cancer. To this end, the preparation by this Branch for the Department of an "Annual Statistical Review on Cancer in Ontario" was initiated in 1937 and arrangements were made for the conduct of such special studies on cancer as were desirable or practicable. Included under this latter heading are the "Middlesex Cancer Survey" undertaken in co-operation with the Ontario Medical Association, which covered all known or diagnosed cases of cancer in that county during the calendar year 1939; and a special study of all cases of cancer treated in any public hospital in Ontario during 1937. In addition, pre-war plans also called for regular statistical analysis of the results of treatment commencing in 1942. Three of these were made in collaboration with Directors of the Ontario Cancer Centres during the war years. These studies covered respectively: cervix uteri, 1940; breast, 1941; and oral cavity, 1942. The findings of these studies were prepared and presented in some detail at special conferences but were, with one exception, not published\*.

### *Recording and Reporting Procedures*

Visits were made to four of the seven Cancer Centres during the year for the purpose of reviewing the record system and assisting in the solution of any difficulties which presented. In future, it is hoped that closer and more frequent contact with the cancer record and statistical work in all Centres can be achieved in order to ensure the maximum degree of uniformity and reliability of the

\*McCormick, N. A., *Canad. Med. Assoc. J.*, 1944, 50: 556.

recorded data for the purpose of such subsequent general statistical analysis and clinical cancer research as may be undertaken.

During 1946, a preliminary review of the present cancer recording and reporting procedure was undertaken with a view to possible amendments during 1947. Minor changes were made in some of the history and examination forms and the practice of printing of a supply of forms on special stock for "manuscript" purposes was discontinued. During 1947, a thorough review of the cancer recording system will be undertaken with a view to planning, in collaboration with the competent authorities of the Ontario Cancer Treatment and Research Foundation, a broader and more intensive utilization of the vast fund of cancer data which has been accumulated in a standardized fashion during the ten-year period 1937 (August) to 1946.

### *Cancer Morbidity Studies*

Work on both the Middlesex Cancer Survey (1939) and the Public Hospital Cancer Case Study (1937) was suspended of necessity during the years 1941 to 1945, inclusive. Much of the clerical work involved has been completed, however, and plans were made during the year to finalize the Middlesex Cancer Survey Study, for presentation and publication during 1947. The Hospital Case Study will await the earliest opportunity for similar action.

### *The Annual Statistical Reports on Cancer*

During 1946, the regular annual statistical report on cancer was re-introduced as part of the Annual Report of the Department for the first time since 1941. This Report—The Tenth Annual Statistical Report on Cancer in Ontario—covering data for the calendar year 1945, was published in the Twenty-first Annual Report of the Department for 1945, pages 87 to 102, inclusive. Two hundred copies of this Report were subsequently reprinted and distribution was made to a selected list of authorities engaged in cancer control activities throughout the world.

Plans have been drafted for the development and extension of this Report during succeeding years and a beginning is made this year by the inclusion of further data on hospitalization, duration of symptoms, and delay in treatment in the Eleventh Annual Statistical Report in Cancer for the calendar year 1946, which is presented on pages 174 to 199, inclusive, of this Report.

### *Reporting of Cancer Cases*

In November, 1946, a plan was inaugurated for the voluntary reporting of cases of *cancer or suspected cancer* in the districts of Northern Ontario served by Cancer Diagnostic Centres located at Port Arthur, Sudbury, Timmins, and Kirkland Lake. This activity is carried on jointly by the Department of Health and the Ontario Cancer Treatment and Research Foundation. Under this plan, case reports are made by physicians to the appropriate Diagnostic Centre on a special notification form designed for the purpose.

Following receipt of the notification of a case, an appropriate cancer case history form is returned to the physician by the Diagnostic Centre. When the completed history is received, the Foundation pays the physician a fee of two dollars. Provision is also made under the plan for the payment of a follow-up fee of one dollar for each annual examination.

The objectives in cancer reporting include the procurement of accurate data on the incidence of cancer, and the facilitating of early and adequate treatment and follow-up. The data secured under this reporting plan, if successful, will serve to throw some light on the incidence of diagnosed cancer (as reported) and on the need for treatment facilities for cancer in Northern Ontario.

### *Cancer Case Follow-Up*

During the year, services of the Branch were again extended to the seven Cancer Centres in the follow-up of patients after treatment. Arrangements were made for the checking of cancer deaths and for the conduct of cancer death searches.

## 2. ONTARIO MENTAL HOSPITALS STATISTICS

The Medical Statistics Branch continued to discharge its responsibility for the collection, tabulation and analysis of mental hospital statistics during the year and to further develop its programme toward making the most effective use of all recorded data.

### *Monthly Statements and Special Reports*

Regular monthly statements of movement of patient population were prepared during the year. These statements set out the changes in case load for each hospital and serve as an administrative guide for the Hospitals Division. Periodic analyses of admissions, discharges and population trends were also carried out to meet special problems as they presented. Data for these purposes were secured either from the regular monthly reports on forms 182 submitted to this Branch or from the official Annual Reports of Ontario Hospitals.

### *Annual Report of Ontario Hospitals*

During 1946, the Branch completed the preparation of the Seventy-eighth Annual Report of Ontario Hospitals for Mentally Ill, Mentally Defective, Epileptic and Habituate Patients, covering the fiscal year ending March 31st, 1945. Responsibility for supervising the printing of this Report was also assumed by this Branch. Distribution of copies was made to a mailing list of two hundred and sixty-five individuals or agencies.

In 1939, for the first time, an Annual Statistical Review of Ontario Hospital Statistics was inaugurated as part of the Annual Report of Ontario Hospitals. The objective of this Review was to present and discuss the significant highlights embodied in the numerous detailed tables included in the official report so that salient points would not be overlooked. During the War period, the scope of this Review was curtailed. During 1946, a beginning was made toward the further development and extension of this phase of the Mental Hospital statistical work with the intention of pursuing the programme originally scheduled for the previous quinquennium.

Work on the Seventy-ninth Annual Report of Ontario Hospitals, covering the fiscal year ending March 31st, 1946, was almost completed during the year, including the addition of several new features and extension of the Annual Statistical Review.

The Annual Report of Ontario Hospitals is the only one of the three annual reports for which the Department is responsible, which is still compiled on a fiscal year basis. During 1946, the possibility of placing this Report on a calendar year basis was thoroughly canvassed. Such conversion would stabilize the reporting period, facilitate comparisons of Ontario data with those for other provinces and for Canada as a whole, eliminate certain special separate returns to the Dominion Bureau of Statistics which are required to be made on a calendar year basis and, most important of all, make possible the preparation, tabulation, and publication of Ontario Hospital statistics some nine months closer to the effective date of the figures than has ever been possible heretofore.

### *Records and Reporting Procedures*

Preliminary steps were taken during the year toward revision of the statistical case cards which are completed in duplicate by Ontario Hospitals for each admission, readmission, discharge, transfer, and death. One copy of each card is sent to the Dominion Bureau of Statistics quarterly, and the other is retained by the hospital\*. This work was done in collaboration with the competent authorities of the Dominion Bureau of Statistics and the Department of National Health and Welfare. It is anticipated that revision of the statistical cards and reporting procedures will be finalized during 1947, and that the new records and report forms will be placed in the field effective January 1st, 1948.

Arrangements were completed during 1946 for the transfer to ledgers of all statistical data contained in the monthly statistical reports of Ontario Hospitals on forms 182 for the years 1932 to 1946, inclusive. When this work is completed, it will greatly facilitate the satisfaction of requests which are made for information on the patient movement in individual hospitals for selected periods. It will likewise render unnecessary the retention in active files of all monthly reports except those for the current year.

### *Mental Health Clinics*

Prior to 1942 the preparation of all Mental Health Clinic statistics was carried out by this Branch. Since 1942, each clinic has been submitting regular monthly reports on current activities and case load together with a case index card for each new patient seen. The reports serve necessary administrative requirements. The case cards are routinely filed alphabetically for reference.

Each Mental Health Clinic also submits to this Branch an Annual Statistical Report comprising eight tables, covering the essential data for administrative purposes. This plan is much the same as that followed by the Ontario Hospitals.

During 1946, the Branch prepared an annual summary covering the work of the four Mental Health Clinics for the fiscal year ending March 31st, 1946. These data will be included in the Annual Report of the Ontario Hospitals for that year.

In order to provide the basic material for a follow-up study of persons examined at a Mental Health Clinic and who were subsequently admitted to an Ontario Hospital, the checking of all first admissions and readmissions to Ontario Hospitals recorded on the Monthly Return of Movement of Population (form 182) during the period July, 1930, to December, 1942, against the alphabetic index of persons examined by Ontario Mental Health Clinics maintained by this Branch was begun in 1941. This work was completed during 1946 and the necessary data on 3,222 cases are now recorded on special index cards, including name, clinic number, date of birth, date of examination and date of first admission to hospital. Sex, interval from date of examination to date of admission (months), and age at the time of examination were also recorded on each card.

## 3. PUBLIC HOSPITAL STUDIES

During the year, initial steps were taken to bring up to date the statistics on hospitalization trends which were accumulated during the pre-war period. These data will be valuable in assessing the significance of current trends and in planning for the future. General statistics on case load, facilities and bed

\*These cards serve the dual purpose of providing the Dominion Bureau of Statistics with data necessary to prepare annual national statistics, and also afford the means by which the Ontario Hospitals prepare their own annual statistical returns to the Department.

occupancy, as well as certain financial and morbidity data are being included in the scope of this work.

The collection and interpretation of population structure statistics was also begun during 1946. Such data have a very direct bearing on the hospitalization problem even now, but will become progressively more important during the next ten-year period. A series of tables and charts depicting salient points in hospitalization trends were also prepared during the year. This material proved valuable to the Hospitals Division of the Department in assessing the current situation in respect of hospital facilities.

#### 4. SPECIAL PROBLEMS

In addition to the routine and special work in connection with mental hospitals, cancer control and public hospitals, a number of special studies were initiated and/or completed during the year. These are dealt with briefly in this section.

##### *Surveys of Nursing Personnel in Hospitals in Ontario*

During 1946, the Medical Statistics Branch assisted the Division of Nurse Registration in the conduct of three specific enquiries into the problems associated with the supply of nursing personnel in hospitals in Ontario. These enquiries were conducted largely by the questionnaire method. Tabulation and analysis of the recorded data and preparation of reports thereon were carried out by the Medical Statistics Branch.

The major investigation was launched by the Minister of Health on 24th June, 1946, and covered all public hospitals, mental hospitals and sanatoria in the Province. Its objective was to collect some basic facts regarding the supply of and demand for nurses, and to secure considered opinions and suggestions toward a solution of the nursing personnel problem.

A thirty-five page Report entitled "A Statistical Report on Nursing Personnel in Hospitals in Ontario", was released in August, 1946, and a limited distribution of two hundred copies made. This Report presented the findings of the Province-wide survey of June-July and incorporated, as well, relevant data on nurse intake and output, and nurse employment generally, derived from official sources including the Annual Reports of Schools of Nursing in Ontario, the Annual Report covering all types of hospitals in Ontario, the National Health Survey of 1943, and the decennial censuses of Canada.

The widespread interest expressed in this Report was gratifying and it is noteworthy that national figures compiled by the Canadian Nurses Association have been set up in a comparable fashion.

##### *Arthritis and Rheumatism*

In order to throw some light on the problem presented by arthritis in Public General Hospitals and in Hospitals for Incurables, all data on patients treated in such hospitals during the calendar year 1944 were transferred from records prepared by the Hospitals Division, to specially designed statistical cards for analysis. The total number of cases included in the study for the Public General Hospitals is 3,183, and for the Hospitals for Incurables—278.

When completed, this study will reflect the extent to which "arthritis", as recorded on forms 226, contributes to the total hospital case load, as well as providing useful data on the volume of cases hospitalized in the Province by age, sex, diagnosis and place of residence.

### *Industrial Morbidity*

Further studies on industrial morbidity were undertaken in co-operation with the Division of Industrial Hygiene, covering recorded experience in a moderate sized plant during a three-year peak war period. Findings of this study will be of assistance in considering a standard plan for recording, tabulating, and presenting industrial morbidity experience.

## 5. MISCELLANEOUS ACTIVITIES

Since 1938, the Branch has prepared each year a review of the chief causes of death by age. Two bulletins were formerly prepared (10A and 10B), one based on the preliminary figures published by the Dominion Bureau of Statistics, and one based on the final tabulations prepared and supplied by the Dominion Bureau of Statistics and secured through the Registrar-General of Ontario. During the War years only the final figures were used and only one report was prepared.

During 1946, copies of the Review based on final figures for 1944 were supplied to medical officers of health throughout the Province. Copies were also used in the preparation of material for health teaching which is distributed to teachers and nurses.

During December, 1946, a Report was prepared on "The Distribution of Physicians in Ontario as at July, 1946". Data contained in this Report were derived from the National Health Survey (1943) and from the "Survey of Physicians in Canada", published by the Department of National Health and Welfare earlier in the year. Copies of this Report—in effect a digest of the material contained in the parent sources—were distributed within the Department.

In collaboration with the Division of Maternal and Child Hygiene, a form was designed for the recording of the reports on medical examinations of expectant mothers conducted under Section 74 (a) of The Public Health Act.

Assistance was rendered during the year to the Hospitals Division and the Nurse Registration Branch in the designing of a comprehensive Health Record for Nursing Assistants for use in the conduct and recording of medical examinations and immunization procedures and in the recording of illness experience during the training of these personnel. An individual immunization record card (3 x 5), to be retained by the student as evidence of inoculation state, was also prepared. As a guide to the physician responsible for the immunization programme, a brief on "Immunization Procedures", incorporating all necessary instructions regarding the technique and administration of immunization procedures and the interpretation of test and inoculation results was also prepared.

Assistance was also rendered the Department of Clinical Preventive Medicine, University of Western Ontario, in connection with a study of trends in hospitalization in the fourteen counties of Western Ontario with specific reference to "the relation between the extension of hospital care plans to the present demand for and overcrowding of available hospital facilities throughout the Province".

During 1946, considerable attention was directed, in collaboration with the office of the Chief Medical Officer of Health, toward the revision of the Annual Report of the Medical Officers of Health with a view to its simplification and closer adaptation to the requirements of the local health agency and the Department alike. Consideration was also given to the routine utilization of data recorded in such reports as a basis for the development of health practice indices

for use in local health work. The problems associated with the revision and development of the Annual Report of the Medical Officer of Health are to be pursued further during 1947 with the object of introducing a new form for that year.

The Medical Statistics Branch also rendered assistance during 1946 in consideration of the problems associated with the recording of local health work. A special committee appointed to study this problem is to present a report and recommendations thereon at a conference of full-time health officers on January 3, 1947.

Preliminary action was taken during the year with a view to setting up a case recording and reporting system for consultant psychiatrists serving various "health areas" throughout the Province. An experimental trial will be given to an interim plan during 1947.

Numerous specific requests for statistical information and advice on a wide variety of topics were received and dealt with during the year. It is worthy of emphasis that a significant proportion of the service rendered by this Branch takes the form of preparing prompt and accurate replies to such enquiries. Lack of personnel still restricts the possible scope of this sort of statistical service, the value of which is recognized by all Divisions in the Department.

### ACKNOWLEDGEMENT

During the War period, the work of this Branch of necessity was seriously curtailed and only the most urgent problems could be dealt with. An effort was made, however, to preserve the basic essential interests and responsibilities as far as it was possible to do so. Much credit for success in maintaining continuity of service during those years must go to Miss Agnes Clarke, who has given ten years of valuable clerical and secretarial service to this Branch, and to Dr. C. R. Myers and to Dr. L. S. Penrose who successively served as Acting Director of the Branch (part-time) during the extended leave of absence of the Director for service with the Medical Branch of the Royal Canadian Air Force.

### THE CHIEF CAUSES OF DEATH IN ONTARIO DURING 1945

This section of the Report is devoted to a presentation of the highlights of recorded mortality experience in Ontario during 1945. The tables which are included were derived from the official tabulations of causes of death, by age and sex, prepared by the Vital Statistics Branch of the Dominion Bureau of Statistics and secured through arrangement with the Registrar-General of Ontario. The list of causes of death follows the Fifth Revision of the International List of 1938 and the figures in the tables are comparable with those of the last four years. All tables refer to deaths among residents of the Province.

#### *The Crude Mortality Picture*

The crude death rate for 1945 was 9.86 per 1,000 population. This is the lowest recorded figure to date, despite the increasing proportion of population at older ages.

In Table I are presented the twenty "chief causes"\* of death during 1945. The specific death rate per 100,000 population (all ages) and the percentage of all deaths attributed to each cause are also indicated.

\*"Chief Causes" has the force of "most frequent causes" without any other implication.

TABLE I  
CHIEF CAUSES OF DEATH—ALL AGES  
ONTARIO, 1945

| Rank                  | CAUSE OF DEATH                               | Int'l List Numbers | Number of Deaths | Specific* Death Rate | Per cent of Total Deaths |
|-----------------------|--|--------------------|------------------|----------------------|--------------------------|
| 1                     | Diseases of the heart.....                   | 90-95              | 12,669           | 316.4                | 32.1                     |
| 2                     | Cancer (all forms).....                      | 45-55              | 5,294            | 132.2                | 13.4                     |
| 3                     | Intracranial lesions of vascular origin..... | 83                 | 4,234            | 105.7                | 10.7                     |
| 4                     | Accidental causes.....                       | 169-195            | 2,608            | 65.1                 | 6.6                      |
| 5                     | Nephritis.....                               | 130-132            | 1,826            | 45.6                 | 4.6                      |
| 6                     | Pneumonia and bronchitis.....                | 106-109            | 1,769            | 44.2                 | 4.5                      |
| 7                     | Tuberculosis (all forms).....                | 13-22              | 1,015            | 25.3                 | 2.6                      |
| 8                     | Prematurity.....                             | 159                | 980              | 24.5                 | 2.5                      |
| 9                     | Diabetes mellitus.....                       | 61                 | 954              | 23.8                 | 2.4                      |
| 10                    | Diseases of the arteries.....                | 96-99              | 855              | 21.4                 | 2.2                      |
| 11                    | Congenital malformations.....                | 157                | 696              | 17.4                 | 1.8                      |
| 12                    | Senility.....                                | 162                | 361              | 9.0                  | 0.9                      |
| 13                    | Injury at birth.....                         | 160                | 325              | 8.1                  | 0.8                      |
| 14                    | Hernia and intestinal obstruction.....       | 122                | 324              | 8.1                  | 0.8                      |
| 15                    | Diarrhoea, enteritis and dysentery.....      | 27, 119, 120       | 320              | 8.0                  | 0.8                      |
| 16                    | Suicides.....                                | 163, 164           | 307              | 7.7                  | 0.8                      |
| 17                    | Diseases of the prostate.....                | 137                | 305              | 7.6                  | 0.8                      |
| 18                    | Ulcer of the stomach and duodenum.....       | 117                | 282              | 7.0                  | 0.7                      |
| 19                    | Influenza.....                               | 33                 | 260              | 6.5                  | 0.7                      |
| 20                    | Syphilis.....                                | 30                 | 217              | 5.4                  | 0.6                      |
| TOTAL.....            |  |                    | 35,601           | 8.89†                | 90.1                     |
| ALL OTHER CAUSES..... |  |                    | 3,898            | 0.97†                | 9.9                      |

\*Rates per 100,000 estimated population (4,004,000).

†Rates per 1,000 population.

The twenty causes listed were responsible for 35,601 deaths or 90.1 per cent of all deaths recorded during the year. There were no changes in rank of the the first six causes. The number of deaths classed to "prematurity" declined by almost ten per cent and the number of deaths attributed to diarrhoea, enteritis and dysentery was lower by 25 per cent than in 1944. The number of deaths attributed to "influenza" dropped from 434 in 1944 to 260 in 1945.

*Diseases of the Heart, Arteries and Kidneys (C.V.R.)* together contributed 19,584 deaths or 49.6 per cent of all deaths recorded during 1945. Most of these deaths occurred at ages over 70 years (Tables II and III). The striking increase in recorded deaths from these causes in the last thirty years is largely, if not entirely, spurious. Older age structure of the population, transfer of many deaths from senility and ill-defined causes, and changes in certification have all contributed to the *apparent* increase.

*Cancer (all forms)* ranked second among the chief causes with 5,294 deaths or 13.4 per cent of total deaths during the year. The specific death rate (132 per 100,000 population) remained the same as in 1944. Further discussion of some aspects of the current cancer mortality picture is included in the Eleventh Annual Statistical Report on Cancer which appears on pages 174 to 197 of this Report.

*Accidental Causes* again ranked fourth among the chief causes of death. A total of 2,608 deaths or 6.6 per cent of all deaths were attributed to "accidental causes" during 1945, compared with 2,530 or 6.3 per cent of all deaths in 1944.

*Tuberculosis* mortality reached a new low point in 1945 with 1,015 deaths—a rate of 25.3 per 100,000 population compared with a rate of 26.9 in 1944. This rate is half of what it was in 1931 and almost 30 per cent below the rate for 1937. It is noteworthy, however, that three-fifths of all deaths attributed to tuberculosis still fall at ages under 50 years (Table III).

It is important to regard Table I as presenting merely the *crude* mortality picture for the year. The public health significance of any cause in this table requires a more detailed examination of the individual diseases and conditions which are included in certain of the cause-groups (e.g. accidental causes) and also a careful consideration of the age distribution of the deaths so classified.

### *Causes of Death by Age*

Tables II and III afforded an opportunity of making a practical appraisal of the significance of each of the principal causes of death listed in Table I.

Table II provides a summary of the distribution by age of the twenty principal causes of death in Ontario during 1945. The age-groups included in this table were selected deliberately for the purpose of reflecting the mortality experience in age-bands which are of particular general interest.

Table III shows, for each of the twenty principal causes of death included in Table I, the proportion of all deaths from each cause which had occurred by a given age. For instance 0.7 per cent of all cancer deaths recorded during the year occurred in children under 15 years of age, 14.3 per cent among persons under 50 years of age, etc.

### *Chief Causes of Death in Selected Age-groups*

In Tables IV and V are presented the eight leading causes of death in each of eight age groups—infancy, 1-4 years, 5-14 years, 15-19 years, 20-49 years, 50-59 years, 60-69 years, and 70 years and over. These tables supplement the data included in Tables II and III and focus attention on those individual causes or groups of causes which are important in each of the selected age-bands. For each age-group, the actual number of recorded deaths attributed to each cause, and the percentage of all deaths contributed to the total by each cause, are shown.

*Infancy*—The eight chief causes of death during the first year of life for 1945 are presented in Table IV. In this table, the number of deaths is given for each cause, together with the percentage of all infant deaths which were attributed to each cause, and the infant mortality rate per 1,000 live births for 1945 and for 1944.

TABLE II  
CHIEF CAUSES OF DEATH BY AGE GROUPS  
ONTARIO, 1945

| Rank                  | CAUSE OF DEATH                               | Age Groups (years) |     |      |       |       |       |       |           | ALL<br>AGES |        |
|-----------------------|--|--------------------|-----|------|-------|-------|-------|-------|-----------|-------------|--------|
|                       |  | Under 1            | 1-4 | 5-14 | 15-19 | 20-49 | 50-59 | 60-69 | 70 & over |             | N.S.   |
| 1                     | Diseases of the heart.....                   | —                  | 6   | 18   | 18    | 900   | 1,637 | 3,010 | 7,064     | 16          | 12,669 |
| 2                     | Cancer (all forms).....                      | 3                  | 13  | 22   | 12    | 707   | 968   | 1,507 | 2,060     | 2           | 5,294  |

| 8          | Congenital debility.....                      | 70                  | 2.2   | 89  | 103   |
|            | Other causes.....                             | 284                 | 8.9   | 360   | 450   |
| TOTAL..... |   | 3,209               | 100.0   | 4,064                                       | 4,268 |

\*First year of life.

During 1945, a total of 3,209 deaths occurred among infants under one year of age. This is a rate of 40.6 per 1,000 live births compared with 42.7 per 1,000 live births in 1944.

Prematurity, congenital malformations, and pneumonia were the three leading causes of death. A total of 980 infant deaths or 30.5 per cent of the total deaths under one year of age, were attributed to prematurity during 1945. These figures are both slightly lower than those for 1944. On the contrary, deaths classed to congenital malformations and to pneumonia and bronchitis both showed a slight increase. Deaths attributed to diarrhoea enteritis and dysentery decreased in number from 326 to 218. A total of 105 deaths among infants under one year were classified to accidental causes.

Data on the eight chief causes in selected age-groups at ages one year and over are presented in Table V. For each age-group, the actual number of recorded deaths attributed to each cause, and the percentage of all deaths contributed by each cause are shown.

| 8                       | Diabetes mellitus.....                       | 415                  | 2.4   |
|                         | Other causes.....                            | 2,007                | 11.5  |
|                         | TOTAL.....                                   | 17,486               | 100.0   |

An examination of the data included in Table III affords a useful picture of the principal causes responsible for death in the age-groups shown.

*Pre-School Ages*—At pre-school ages, 1-4 years, accidental causes continued to rank first as a cause of death, being responsible for 28.8 per cent of the 573 deaths at these ages during 1945. Pneumonia and bronchitis ranked second with 16.2 per cent of all deaths. These two groups thus contributed 45 per cent of all deaths among pre-school children. Tuberculosis was responsible for 31 deaths, diarrhoea, enteritis and dysentery for 28, and appendicitis for 15.

*School Ages*—In the school-age period, 5-14 years, accidental causes was by far the most important group. In 1945, 224 deaths or 41.0 per cent of the 546 deaths at these ages, were classified to accidental causes. This is a substantial increase in the contribution of accidents to childhood mortality compared with the record for 1944 and 1943 when 39.4 per cent and 33.7 per cent respectively of all deaths at ages 5-14 years were attributed to accidental causes. Tuberculosis contributed 39 deaths, pneumonia 27, cancer 22, and diseases of the heart 18 deaths. It is noted that 18 deaths were attributed to diphtheria at these ages during 1945.

*Adolescence*—At ages 15-19 years, accidental causes still ranks first. In 1945, a total of 131 deaths or 33.5 per cent of all deaths in this group were attributed to accidental causes. Tuberculosis ranked second with 60 deaths. Together these two causes accounted for 48.9 per cent of all deaths at ages 15-19 years.

*Ages 20-49 Years*—The volume of mortality from heart disease and cancer at ages 20-49 years commands interest. These two causes contributed 1,607 or 33.7 per cent of the 4,763 deaths recorded at these ages during the year. Accidental causes were responsible for 689 deaths or 14.5 per cent of the total. The relative importance of tuberculosis as a cause of death among persons age 20-49 years continues to decline, but 501 deaths or 10.5 per cent of all deaths were so classified during 1945. It is noteworthy that 49.4 per cent of all deaths attributed to tuberculosis during the year, occurred among persons in this age-group (Table III).

*Ages 50 Years and Over*—Among persons at ages 50-69 years, diseases of the heart, arteries and kidneys top the list with cancer in second position. At these ages one death in every five in 1945 was attributed to cancer. Accidental causes, diabetes mellitus, pneumonia and bronchitis, and tuberculosis follow in order. In the age-group 70 years and over, two-thirds of all deaths were classed to C.V.R. disease followed in importance by cancer, pneumonia, accidents, and diabetes mellitus.

#### *New Records Established in 1945*

The vital records of Ontario for 1945 indicate further gains of significance for the public health. These include the following:

- (a) A new low in the crude death rate—9.9 per 1,000 population.
- (b) A new low in the maternal mortality rate—2.2 per 1,000 live births.
- (c) A new low in the tuberculosis death rate—25.3 per 100,000 population.
- (d) An infant mortality rate within half a point of the all-time low of 1942.

This resume of the recorded mortality experience in Ontario during 1945 is designed merely to provide a few highlights. The observations made can be supplemented by perusal of the data included in the statistical tables, or by reference to the original data contained in the Registrar-General's Annual Report for Ontario for 1945.

## THE ELEVENTH ANNUAL STATISTICAL REPORT ON CANCER CALENDAR YEAR—1946

Prepared by the Medical Statistics Branch

This Report, The Eleventh Annual Statistical Report on Cancer in Ontario, includes a brief review of important developments during the year, a discussion of the highlights presented by the recorded cancer mortality data and a statistical summary of the work of the Ontario Cancer Centres during 1946.

During the years 1940 to 1945, statistical analysis of cancer clinic experience was seriously restricted and the original statistical programme suspended. Annual reports were regularly prepared during this period but those for the years 1941 to 1944, inclusive, were not published and they were all limited almost entirely to a summary of new cases treated during the year and provided a bare minimum of data. The plan to conduct detailed analyses of survival following treatment, commencing in 1942, was likewise deferred, although special studies of three groups of cases were made in 1940, 1942 and 1943 covering cases of cervix uteri, breast, and oral cavity, respectively. These studies have never been formally published.

On this occasion a beginning has been made toward extending the scope of the section of the Report devoted to the Ontario Cancer Centres by the inclusion of some information on hospitalization, duration of symptoms and delay in treatment. In future, considerably more data of this nature will be forthcoming along the lines originally intended with a view to making effective use of the great wealth of information on some 20,000 cases of cancer which has, to date, been accumulated in the seven Cancer Centres.

### SECTION I—CANCER MORBIDITY STUDIES

Still the greatest need in the field of cancer control is a reasonably accurate estimate of the incidence or prevalence of cancer in any community. Mortality data, however accurate, can never meet this need. The studies of cancer morbidity which were initiated in 1938 and 1939 (see earlier reports) were deferred indefinitely in 1940. This work was revived during 1946 with a view to the preparation of reports thereon during 1947. When finalized, these reports will afford useful information on cancer which is not yet available in Ontario and provide a basis from which further extended studies can be pursued.

In October, 1946, the reporting of cancer or suspected cancer was initiated on a voluntary basis in certain sections of Northern Ontario. Reporting is effected through the practising physicians in areas served by Diagnostic Centres sponsored by the Ontario Cancer Treatment and Research Foundation. All case reports are transmitted through the five Diagnostic Centres to the Medical Statistics Branch. Upon completion of the necessary case records the reporting physician is paid a fee of two dollars by the Foundation. The Medical Statistics Branch is responsible for the tabulation of statistical data on reported cases and for the indexing of the cases for future follow-up reference. A tentative simple plan, subject to revision with experience, was placed in operation during November, 1946.

This reporting plan is in the nature of an experiment. If it succeeds it will provide a valuable source of information on the incidence of known or diagnosed cancer and afford a measure of the cancer problem in the districts served by the

Diagnostic Centres and the extent to which facilities for diagnosis, treatment and hospitalization are required. Cancer is not as yet a reportable disease in Ontario.

## SECTION II—CANCER MORTALITY IN ONTARIO

Considerable attention continues to be focussed on the part played by cancer as a cause of death. The recorded volume of deaths attributed to cancer in Ontario during the twenty-year period 1926-1945 is presented in Table A. The relationship between total deaths from all causes and cancer deaths is also indicated.

TABLE A  
RECORDED CANCER MORTALITY  
ONTARIO, 1926-1945

| YEAR      | Total Deaths<br>All Causes | Cancer Deaths | Per Cent<br>of Total<br>Deaths | Crude*<br>Death<br>Rate |
|-----------|----------------------------|---------------|--------------------------------|-------------------------|
| 1926..... | 35,909                     | 3,116         | 8.7                            | 99                      |
| 1927..... | 34,775                     | 3,117         | 9.1                            | 100                     |
| 1928..... | 37,128                     | 3,441         | 9.3                            | 107                     |
| 1929..... | 38,123                     | 3,402         | 8.9                            | 104                     |
| 1930..... | 37,313                     | 3,635         | 9.7                            | 110                     |
| 1931..... | 35,705                     | 3,726         | 10.4                           | 109                     |
| 1932..... | 36,436                     | 3,825         | 10.5                           | 110                     |
| 1933..... | 35,301                     | 4,044         | 11.5                           | 115                     |
| 1934..... | 35,105                     | 4,034         | 11.5                           | 113                     |
| 1935..... | 36,317                     | 4,214         | 11.6                           | 117                     |
| 1936..... | 37,571                     | 4,441         | 11.3                           | 120                     |
| 1937..... | 38,475                     | 4,547         | 11.8                           | 122                     |
| 1938..... | 36,890                     | 4,472         | 12.1                           | 120                     |
| 1939..... | 37,530                     | 4,567         | 12.2                           | 121                     |
| 1940..... | 38,503                     | 4,847         | 12.6                           | 128                     |
| 1941..... | 39,226                     | 4,931         | 12.6                           | 130                     |
| 1942..... | 39,119                     | 5,005         | 12.8                           | 131                     |
| 1943..... | 41,063                     | 5,193         | 12.6                           | 133                     |
| 1944..... | 39,781                     | 5,236         | 13.2                           | 132                     |
| 1945..... | 39,499                     | 5,294         | 13.4                           | 132                     |

\*Rate per 100,000 estimated population, all ages.

The absolute number of cancer deaths has nearly doubled since 1926. The proportion of all deaths attributed to this cause has risen from 8.7 per cent in 1926 to 13.4 per cent in 1945. The crude cancer death rate has shown a steady increase from 99 deaths per 100,000 population in 1926 to 132 deaths per 100,000 population in 1945. It is noteworthy that there has been little change in the recorded crude cancer death rate in the last five years.

It is important that the limitations of these crude data as an index in the trend in cancer mortality should be realized. The recorded increase in the volume of cancer deaths and in the crude cancer death rate do not necessarily reflect a true increase in the incidence, prevalence or mortality from cancer. In fact, correction for changes in the age distribution of the population by sex, alone eliminates a large part of the observed increase. Improvement in the quality of medical certification and the increasing attention given to cancer may account for much of the increase which remains.

### *Site of Disease*

Substantial variations in "organ incidence" by sex, exist in cancer mortality. An appreciation of these variations is important in interpreting the problem and

in assessing the degree of control which can be exercised with available methods and facilities.

The distribution of cancer deaths in Ontario, by site and sex, for the five year period 1941-1945, is presented in Table B.

TABLE B  
CANCER DEATHS BY SEX AND SITE OF DISEASE  
ONTARIO, 1941-1945

| SITE OF DISEASE                  | Males  |                   | Females |                   | Both Sexes |                   |
|----------------------------------|--------|-------------------|---------|-------------------|------------|-------------------|
|                                  | Deaths | Per Cent of Total | Deaths  | Per Cent of Total | Deaths     | Per Cent of Total |
| Stomach and duodenum.....        | 2,714  | 22.0              | 1,579   | 11.9              | 4,293      | 16.7              |
| Other digestive tract.....       | 4,050  | 32.8              | 4,116   | 30.9              | 8,166      | 31.8              |
| Genital organs.....              | 1,422  | 11.5              | 2,737   | 20.6              | 4,159      | 16.2              |
| Breast.....                      | 31     | 0.3               | 2,735   | 20.5              | 2,766      | 10.8              |
| Buccal cavity and pharynx.....   | 676    | 5.5               | 175     | 1.3               | 851        | 3.3               |
| Urinary organs.....              | 950    | 7.7               | 492     | 3.7               | 1,442      | 5.6               |
| Respiratory organs.....          | 1,165  | 9.4               | 411     | 3.1               | 1,576      | 6.2               |
| Skin.....                        | 275    | 2.2               | 134     | 1.0               | 409        | 1.6               |
| Other and unspecified sites..... | 1,064  | 8.6               | 933     | 7.0               | 1,997      | 7.8               |
| TOTAL.....                       | 12,347 | 100.0             | 13,312  | 100.0             | 25,659     | 100.0             |

Cancer of the digestive tract (including oesophagus, stomach, intestines, rectum, liver and pancreas, etc.) accounted for 12,459 or 48.5 per cent of the 25,659 deaths attributed to cancer during this five-year period. Among men, the principal single site of importance is stomach and duodenum, accounting for 22.0 per cent of all male cancer deaths during the period. Among women, the individual site of leading importance is breast, accounting for 20.5 per cent of all the female deaths attributed to cancer. The ratios of male to female mortality show striking differences. Male excesses for stomach, buccal cavity, urinary organs, respiratory system and skin are of note.

Cancer cases which are particularly amenable to treatment, including cancer of the genital organs, breast, buccal cavity and skin, comprise 31.9 per cent of all cancer deaths. This group contributed 43.4 per cent of the cancer deaths among women during the period.

#### *Cancer as a Cause of Death at Selected Ages*

The recorded mortality from cancer in selected age groups is set out in Table C. These data are of interest in interpreting the cancer problem.

TABLE C  
CANCER AS A CAUSE OF DEATH BY AGE  
ONTARIO, 1945

| AGE GROUP        | Cancer Deaths | Per Cent of All Deaths | Rank as a Cause of Death | Specific* Death Rate | Per Cent of All Deaths from Cancer |
|------------------|---------------|------------------------|--------------------------|----------------------|------------------------------------|
| 0-19.....        | 50            | 1.1                    | .....                    | 3.8                  | 0.9                                |
| 20-49.....       | 707           | 14.8                   | Second                   | 39.8                 | 13.4                               |
| 50-59.....       | 968           | 20.6                   | Second                   | 227.9                | 18.3                               |
| 60-69.....       | 1,507         | 19.3                   | Second                   | 514.5                | 28.5                               |
| 70 and over..... | 2,062         | 11.8                   | Third                    | 1,026.4              | 38.9                               |
| TOTAL.....       | 5,294         | 13.4†                  | Second                   | 132.2                | 100.0                              |

\*Per 100,000 estimated population (4,004,000).

†Total deaths in 1945 were 39,499.

Of the 39,499 recorded deaths in Ontario during 1945, 5,294 or 13.4 per cent were attributed to cancer. This disease ranked second as a cause of death in the age groups 20-49, 50-59 and 60-69 years, being exceeded only by deaths attributed to heart disease. At ages 50-69 years, one death in every five was attributed to cancer.

It is noteworthy that 85.7 per cent of all recorded cancer deaths during the year, occurred among persons 50 years of age or over. On the other hand, nearly 15 per cent of the deaths occurred among persons under the age of 50 years and about one-third among persons under the age of 60 years.

#### *Deaths from Cancer of Accessible Sites at Ages under 70 Years*

The deaths attributed to cancer of the so-called "accessible" sites at ages under 70 years in Ontario during 1945, are set out, by sex, in Table D.

TABLE D  
"ACCESSIBLE" CANCER MORTALITY AT AGES UNDER 70 YEARS  
ONTARIO, 1945

| SITE             | Males  |          | Females |          |
|------------------|--------|----------|---------|----------|
|                  | Deaths | Per Cent | Deaths  | Per Cent |
| Oral cavity..... | 59     | 4.1      | 19      | 1.1      |
| Breast.....      | 4      | 0.3      | 410     | 23.0     |
| Uterus.....      | —      | 0        | 340     | 19.0     |
| Skin.....        | 19     | 1.3      | 12      | 0.7      |
| SUB-TOTAL.....   | 82     | 5.7      | 781     | 43.8     |
| OTHER SITES..... | 1,365  | 94.3     | 1,004   | 56.2     |
| TOTAL.....       | 1,447  | 100.0    | 1,785   | 100.0    |

In 1945, a total of 1,240 deaths were attributed to cancer of breast, uterus, oral cavity and skin. This is 23 per cent of all cancer deaths during that year. Of these 1,240 deaths, 863 or 70 per cent were among persons under the age of 70 years, and of these 863 deaths, 90 per cent were among women.

The data in Table D show that of the 1,447 recorded cancer deaths among males under the age of 70 years in 1945, only 82 or 5.7 per cent were due to cancer of the specified sites. In contrast, of the 1,785 recorded cancer deaths among women at ages under 70 years, 781 or 43.8 per cent were in the "accessible" group—breast contributing 23.0 per cent and uterus 19.0 per cent.

#### SECTION III—THE WORK OF THE ONTARIO CANCER CENTRES DURING 1946

In the following sections there is presented an analysis of the work of the seven Ontario Cancer Centres during the calendar year 1946, together with certain supplementary data derived from the case records. The tabulations throughout were made by the Medical Statistics Branch from data recorded on the individual "follow-up" cards for all new cases admitted to the Ontario Cancer Centres during the year 1946. This year, in addition to the usual tables by age, sex, site of disease and method of treatment, supplementary tables dealing with special features not regularly reported upon have been added.

The volume of new cases on record and new cases treated in each of the seven Centres during 1946 is shown in Table 1.

TABLE 1  
NEW CASES ADMITTED—BY CENTRE

| CENTRE        | Cancer Cases |        |       |          |        |       | Non-Cancer Cases† | Total New Patients Treated |
|---------------|--------------|--------|-------|----------|--------|-------|-------------------|----------------------------|
|               | On Record    |        |       | Treated* |        |       |                   |                            |

\*Treated by any method or combination. Includes cases treated by surgery alone, but excludes palliative surgery.

†Non-malignant tumours and non-neoplastic diseases.

A total of 3,572 new cases of cancer\* were recorded during the year. This is an increase of 502 cases or 16.4 per cent over 1945. Of the 3,572 cases admitted, 3,335 cases or 93.4 per cent received treatment; the remainder (237) were not treated for one or another reason. In addition, 3,576 patients were treated for benign tumours and non-neoplastic diseases. The total number of patients treated in the seven Centres amounted to 6,911 patients, an increase of 601 patients over the previous year.

As in past years, the number of private patients exceeded the number of public patients, the ratio being 2.2 to 1. The variations in this ratio among the Centres are probably accounted for largely by differences in the definition of a "public" patient. Public patients, as designated, comprised 31 per cent of the new cases treated during the year.

The distribution of the 3,572 new cases during the year, by site of disease, in broad groups, is given in Table 2.

Comparison of the total number of cases for each site, with those in the 1945 report, shows an increase for each site group in the number of cases admitted. Cases of cancer of the rectum show the largest percentage increase over 1945 (36 per cent). Cancer of the air passages was second with an increase of 29 per cent, and cancer of oral cavity third with an increase of 22 per cent. Other increases were: breast—11 per cent, and uterus—20 per cent. Cases of cancer of breast, uterus and oral cavity accounted for 43.9 per cent of all new cases recorded during the year.

A comparison of the volume of new cases treated by radiotherapy (alone or in combination with other methods) in each Centre, during the five-year period 1942-1946 inclusive, is given in Table 3.

\*Cancer includes leukaemia and Hodgkin's disease.

\*Alone or in combination with surgery or other methods.  
Cases treated by surgery alone, cases not treated and recurrences are excluded.

The total number of new cases treated by radiotherapy in 1946 (excluding recurrences) was 3,013. This is an increase of 355 cases or 13 per cent over 1945. All Centres showed an increase except Toronto, in which there was a slight reduction. The recorded increases for each Centre were: Hamilton, 29 per cent; Kingston, 12 per cent; London, 14 per cent; Ottawa Civic, 31 per cent; Ottawa General, 67 per cent and Windsor, 32 per cent.

A summary of the number of cases treated during the year, by site of disease and status, is given in Table 4, the number of patients who were reported alive at December 31, 1946, being indicated in each case.

| TOTAL.....              | 2,136   | 179  | 866    | 154  | 3,002  | 333  | 3,335       | 100.0    |

\*As of December 31st. 1946 (reported).

†Including buccal surface of cheek, tonsil, etc.

‡Comprising leukaemia, Hodgkin's disease, etc.

These data indicate that 71.2 per cent of the new cases treated by radiotherapy or surgery or both (including recurrences) had cancer of the so-called "accessible" sites (breast, uterus, oral cavity and skin). This figure is much the same as it has been in previous years. Skin cases comprised 26.4 per cent of all cases treated during the year, breast cases comprised 18.0 per cent and cervix uteri, 10.5 per cent.

Among males, "accessible" cancer contributed 64 per cent of new cases treated, while among females, these sites (breast, uterus, oral cavity and skin) were responsible for 77 per cent of the total number of new treated cases.

#### *New Cases Treated—By Site and Centre of Treatment*

The distribution of new treated cancer cases by Centre, by site of disease and by status, is given in Table 5.

\*By radium, x-ray or surgery, or any combination of these three.

†Including buccal surface of cheek, tonsil, etc.

‡Including air sinuses, larynx, pharynx, and nasal fossae.

§Including leukaemia, Hodgkin's disease, etc.

It is noted that there has been an increase in the volume of treated cases for each site, except for body of uterus in which there is a slight reduction. The "accessible" sites show the greatest increases. There were 67 more cases of breast cancer treated in 1946 than in 1945. In cervix uteri cases there was an increase of 74 cases, for oral cavity the increase amounted to 80 cases, and for skin, 49 cases.

\*Excluding recurrences.

NOTE—Included in the "Not Stated" group are cases treated at the Toronto Centre which were staged as post-operative and post-treated.

*Stage of Disease at the Beginning of Treatment*

In view of the marked differences in "survival" rates in early and late cases, considerable interest attaches to data on the stage of disease at the time when treatment is sought, and to any trends toward earlier treatment such as might be reflected by a shortening of the interval between first recognized symptom or sign and diagnosis as well as between diagnosis and treatment, and by the proportion of cases reaching treatment centres in the earlier stages of disease.

In assessing the recorded data on these points, it must be kept in mind that with improvement in methods, treatment may be undertaken now in cases which formerly might have been considered too far advanced for treatment.

In Table 6 data are presented on the recorded stage of disease at the time the patient first presented himself for treatment. Data for the two periods, 1938-1940 and 1941-1945, are given for comparison with the 1946 experience. Recurrences are excluded from these data.

The improvement in the proportion of new cases in the early stages remains, on the whole, quite small. The figures for breast are limited by the size of the group for which information on stage of disease was not recorded. The improvement in cervix uteri is the most significant of all with 20.8 per cent classed as Stage I in 1946, compared with 15.4 per cent in the five-year period 1941-1945. If we exclude the "not stated" group, 37 per cent of patients with cancer of breast, cervix uteri, and oral cavity presented themselves for treatment during 1946 before local spread, extension or metastasis had occurred.

There continues to be evidence of greater delay in seeking treatment (in terms of stage of disease when treatment is begun) in public patients as compared with private patients. In Table 7, data on stages of disease for certain sites, for public and private cases separately, illustrate this point.

TABLE 7  
STAGE OF DISEASE—PRIVATE AND PUBLIC CASES—CERTAIN SITES\*  
CASES TREATED ONLY

| STAGE OF DISEASE | Breast  |       |        |       | Cervix uteri |       |        |       | Oral Cavity |       |        |       |

| Not stated       | 73      | 18.0  | 54     | 41.5  | 7            | 4.1   | 11     | 6.7   | 17          | 6.1   | 16     | 10.7  |
| TOTAL            | 405     | 100.0 | 130    | 100.0 | 172          | 100.0 | 165    | 100.0 | 281         | 100.0 | 149    | 100.0 |

\*Excluding recurrences.

NOTE—Included in the "Not Stated" group are cases treated at the Toronto Centre which were staged as post-operative and post-treated.

The recorded data on the breast cases are of limited significance because the stage of disease was not recorded in over forty per cent of the public cases. The picture for cervix uteri and oral cavity cases is quite striking. In cancer of the cervix uteri, 28.5 per cent of the "private" cases were Stage I compared with

only 12.7 per cent in "public" cases. In cases of oral cancer, 62.3 per cent of the private patients presented themselves for treatment in the early stage, compared with only 28.2 per cent of public cases.

#### *Classification of New Cases Recorded During 1946*

A summary of the 3,572 new patients recorded by the seven Cancer Centres during 1946, indicating the number with recurrences and the number not treated (for any reason), is presented in Table 8.

TABLE 8  
CLASSIFICATION OF NEW CASES ADMITTED BY SITE OF DISEASE

| SITE OF DISEASE      | Classification |          |           |             | TOTAL |
|----------------------|----------------|----------|-----------|-------------|-------|
|                      | Primary        | Previous | Recurrent | Not Treated |       |
| Breast.....          | 185            | 350      | 64        | 32          | 631   |
| Cervix uteri.....    | 318            | 19       | 12        | 17          | 366   |
| Body of uterus.....  | 61             | 30       | 7         | 6           | 104   |
| Oral cavity.....     | 418            | 12       | 14        | 22          | 466   |
| Air passages.....    | 64             | 4        | 6         | 2           | 76    |
| Rectum and anus..... | 64             | 10       | 11        | 14          | 99    |
| Skin.....            | 805            | 51       | 24        | 21          | 901   |
| Other sites.....     | 542            | 206      | 58        | 123         | 929   |
| TOTAL.....           | 2,457          | 682      | 196       | 237         | 3,572 |
| PER CENT.....        | 68.8           | 19.1     | 5.5       | 6.6         | 100.0 |

The substantial increase in the total number of new patients treated is largely concentrated in the "accessible" sites. There was a slight increase compared with 1945, in the number of cases not treated, but this increase is largely accounted for by cancers of "non-accessible" sites. Further details in these cases are presented in Table 15. There is little change in the absolute number of recurrences, one-third of which were cases of breast cancer.

#### *Histological Confirmation of Clinical Diagnosis*

A pathological report was available in 2,866 or 86 per cent of the total of 3,335 new treated cases during the year. The frequency of histological examination, by site of disease, is given in Table 9.

TABLE 9  
HISTOLOGICAL EXAMINATION OF NEW CASES TREATED  
BY SITE OF DISEASE

| SITE OF DISEASE      | Path. Done |        | No Path. Done |        | No Data |        | TOTAL   |        |

| TOTAL.....           | 1,979      | 887    | 185           | 103    | 151     | 30     | 2,315   | 1,020  |
| PER CENT.....        | 85.5       | 87.0   | 8.0           | 10.1   | 6.5     | 2.9    | 100.0   | 100.0  |

Histological confirmation of the clinical diagnosis was available in 87.6 per cent of the breast cases, in 95.1 per cent of the cervix uteri cases, in 90.5 per cent of the oral cases and in 86.7 per cent of the skin cases.

The proportion of new treated cases of cancer of the breast, uterus, oral cavity, air passages, and rectum, in which a pathological report was obtained, is shown for each Cancer Centre, in Table 10.

| TOTAL.....          | 978                 | 89.4     | 1,094 | 512                 | 92.3     | 555   |

\*Includes breast, uterus, oral cavity, air passages and rectum.

A pathological report was available in 90 per cent of all breast, uterus, oral cavity, air passage and rectum cases. This figure has shown considerable improvement over the past ten years. In 1939, for example, the proportion of new treated cases of these sites in which a pathological report was available was 77.4 per cent.

### *Prognosis*

Each follow-up card provides for a statement of whether the patient is regarded at the outset as treatable for cure, or for palliation only. A summary of the data given for all new cases recorded during 1946 is set out in Table 11.

In 2,267 cases, or 63.5 per cent of the total, the patient was recorded as treatable for cure. Patients classified as treatable for palliation only, numbered 988 or 27.7 per cent of the total. The ratio of cases treatable for cure to those treatable for palliation only reflects, among other things, the stage of disease when treatment was begun and the susceptibility to treatment in general. These data are useful in subsequent clinical appraisal of results of treatment.

### *Method of Treatment*

A general summary of the methods of treatment of new cases during the year (excluding recurrences) is given in Table 12.

Of all cases, 802 or 23.8 per cent were treated by radium alone. Radium, alone or in combination with x-ray, surgery, or both, was employed in 39.2 per cent of the cases. X-ray, in combination with radium, surgery, or both, was employed in 63.7 per cent of the cases. Cases treated by radiotherapy alone comprised 66.7 per cent of all cases. Surgery, alone or in combination with other forms of treatment, was used in 26.3 per cent of all the cases.

TABLE 11

\*Excludes recurrences.

†Percentages calculated only where 5 or more cases.

In order to assess the changes in treatment methods from year to year, comparison should be made for individual sites because of the change in site distribution over the years. Radium is used less extensively in the Centres now than it was five to ten years ago.

The distribution of treated cases (excluding recurrences) by method of treatment, for each Centre, is presented in Table 13.

The variations among the Centres are so great as to suggest real differences in treatment procedure. Radium alone was used in only 5.6 per cent of cases in one Centre compared with 35.2 per cent in another. Radium, alone or in combination with other methods, was used in 18.3 per cent of cases in one Centre and in 54.5 per cent of cases in another Centre. X-ray alone was employed in 64.2 per cent of cases in one Centre compared with 20.9 per cent in another.

These data must not be used alone as a basis for comparing treatment practice among the seven Cancer Centres. While the wide variations shown in Table 13 are so great as to suggest real differences in treatment procedure, data for individual sites alone are useful for this purpose.

The proportions of cases treated by radium alone, and by radium alone or in combination with other methods of treatment, for cervix uteri, oral cavity and skin cases, for each Centre, are given in Table 14.

TABLE 14  
PROPORTION OF CASES TREATED WITH RADIUM BY CENTRE\*

\*Excludes recurrences.

†With x-ray, surgery or both.

These data provide a better basis for comparison between the Centres in respect of treatment procedure. Most striking in this table are the differences in the proportions of cases of cancer of the skin which are treated by radium alone, and by radium alone or in combination with other methods. Hamilton and London stand in sharp contrast to the Ottawa Civic and Toronto Centres in this respect.

#### *Untreated Cases*

Of the 3,572 cases admitted to the seven Centres during 1946, 237 or 6.6 per cent were not treated. This group includes those patients who were given palliative treatment only. The number of untreated cases reported by each Centre was as follows: Hamilton, 6; Kingston, 27; London, 5; Ottawa Civic, 17; Ottawa General, 66; Toronto, 75; and Windsor, 41.

The reasons recorded for non-treatment are summarized in Table 15.

TABLE 15  
UNTREATED CASES BY REASON FOR NON-TREATMENT

| REASON FOR NON-TREATMENT      | SITE OF DISEASE |        |             |              |                 |             | TOTAL |
|-------------------------------|-----------------|--------|-------------|--------------|-----------------|-------------|-------|
|                               | Breast          | Uterus | Oral Cavity | Air Passages | Rectum and Anus | Other Sites |       |

| TOTAL.....                    | 32              | 23     | 22          | 2            | 14              | 144         | 237   |
| TOTAL TREATED.....            | 599             | 447    | 444         | 74           | 85              | 1,686       | 3,335 |

In 103 or 43 per cent of the cases, treatment was not given because of the advanced stage of disease. This number is equivalent to 3.1 per cent of total new cases recorded during the year.

#### *Age and Sex Distribution of New Treated Cases*

The distribution of the new *treated* cases by age and sex, and by site, is given in Table 16.

Of the 3,335 new treated cases, 1,506 were males and 1,829 were females. This is equivalent to a ratio of 82 male cases to each 100 female cases. Female cases substantially exceed male cases at all ages under 60 years. At ages 60-69 years the sexes are equally represented. At ages 70 and over there is a substantial male excess.

It is noteworthy, that 55.6 per cent of all female cases were under the age of 60 years, compared with 39.6 per cent of male cases. The sharp sex differences in recorded frequencies of cancer of breast, lip, larynx and skin are striking.

#### *Geographic Distribution of New Treated Cases*

The new treated cases are distributed by county or district of residence in Table 17. Data for 1945 are included for comparison. The 1946 case distribution is illustrated by Figure I.

TABLE 16  
NEW CASES TREATED BY AGE, SEX AND SITE OF DISEASE

| SITE OF DISEASE                | Under 40 |      | 40-49 |      | 50-59 |      | 60-69 |      | 70-79 |      | 80 and over |     | Not stated |     | Total |       |

| ONTARIO TOTAL.....        | 2,820                 | 3,212 | 70.4  | 78.2 | 2,039                  | 2,291 |

\*Per 100,000 estimated population (1945—4,004,000, 1946—4,107,000).

†Including breast, uterus, oral cavity and skin.

‡Including District of Patricia. §Rate not computed.

The Ontario case rate for 1946 was 78.2 per 100,000 population compared with 70.4 in 1945 and 60.5 in 1941. The case rate varied from 148 per 100,000 population in Leeds and 136 in Carleton to 25 per 100,000 population in Thunder Bay. The recorded case rate in the counties in which the Cancer Centres are located substantially exceeds the rate for the Province as a whole in all instances except York County.

The reliability of many of the crude rates shown in Table 17 is limited by the smallness of the recorded experience. For this reason, sizable fluctuations from year to year are to be expected. Accumulation of data for a five-year period will be required before effective comparison can be made and age-adjusted rates prepared. It is noteworthy, however, that for the most part the rates for the various counties and districts for 1946 are of the same general order (high, "average" or low) as they were in 1945, as well as in 1938 and 1939. This fact makes it reasonable to refer to the recorded rates as being high (100 or over), average (60-100), or low (under 60).

It is emphasized that the individual county and district rates in Table 17 merely reflect the extent to which various parts of the Province contribute to the total recorded case load. *They do not reflect the comparative incidence or prevalence of cancer* for at least two very good reasons. In the first place, by no means all of the new cases of cancer—even cancer of the "accessible" sites—reach the seven Ontario Cancer Centres. Many cases are treated elsewhere even in those cities where the Centres are located. In the second place, the age distribution of the population in any area is an important factor in determining the number of cases requiring treatment and the annual number of recorded deaths. In future, therefore, it is planned to prepare age-adjusted case and death rates for counties and districts so that more direct and useful comparison of recorded experience between various parts of the Province can be made.

#### *Scope of Service—Professional Interest*

A summary of the number of physicians referring cases of cancer to each of the Cancer Centres for treatment during 1946 is given in Table 18.

TABLE 18  
REFERRING PHYSICIANS BY CENTRE

| CENTRE              | New Cases on Record | No. of Different Referring Physicians | Different Physicians per New Case |
|---------------------|---------------------|---------------------------------------|-----------------------------------|
| Hamilton.....       | 493                 | 242                                   | 0.49                              |
| Kingston.....       | 287                 | 105                                   | 0.37                              |
| London.....         | 469                 | 205                                   | 0.41                              |
| Ottawa Civic.....   | 407                 | 163                                   | 0.40                              |
| Ottawa General..... | 215                 | 51                                    | 0.24                              |
| Toronto.....        | 1,380               | 707                                   | 0.51                              |
| Windsor.....        | 321                 | 124                                   | 0.39                              |
| TOTAL.....          | 3,572               | 1,597                                 | 0.45                              |

A total of 1,597 physicians, or about one-third of the number in practice in Ontario, each referred one or more new cases of cancer during 1946. This fact, and the widespread distribution of cases throughout the Province (Table 17), serve to indicate the scope and recognition of the service available.

*Non-Cancer Cases*

During 1946 a total of 3,576 patients with non-malignant tumours or non-neoplastic diseases, were treated in the seven Cancer Centres. A summary of the main diagnosis groups is presented in Table 19.

TABLE 19  
NON-CANCER CASES

| Non-malignant Tumours         |              | Non-neoplastic Diseases      |              |
|-------------------------------|--------------|------------------------------|--------------|
| Diagnosis                     | Cases        | Diagnosis                    | Cases        |
| Angiomata, haemangiomata..... | 313          | Actinomycosis.....           | 5            |
| Cysts (various).....          | 105          | Asthma.....                  | 9            |
| Fibromata.....                | 68           | Cervicitis.....              | 31           |
| Keloids.....                  | 66           | Diseases of the thyroid..... | 13           |
| Keratosis.....                | 450          | Fibrosis uteri.....          | 10           |
| Leukoplakia.....              | 64           | Infections n.s.e.....        | 273          |
| Moles, naevi.....             | 93           | Mastitis.....                | 59           |
| Papillomata.....              | 119          | Menorrhagia, etc.....        | 222          |
| Polypi.....                   | 18           | Parotitis.....               | 13           |
| Warts.....                    | 447          | Pruritis.....                | 45           |
| Others.....                   | 172          | Skin diseases (various)..... | 436          |
|                               |              | Thymic enlargement.....      | 25           |
|                               |              | Tuberculosis.....            | 33           |
|                               |              | Consultation only.....       | 120          |
|                               |              | Others.....                  | 367          |
| <b>TOTAL.....</b>             | <b>1,915</b> | <b>TOTAL.....</b>            | <b>1,661</b> |

Of the total number, 1,915 were patients with non-malignant tumours (including "precancerous" conditions such as leukoplakia) and 1,661 were non-neoplastic diseases. The large number of cases of keratosis and leukoplakia is of interest.

This concludes the general resume of the 1946 new case experience in Ontario's seven Cancer Centres.

## SUPPLEMENTARY STATISTICS

*Delay in Treatment*

Data have been presented in Tables 6 and 7 to illustrate the substantial proportion of patients reaching the clinics after local spread, extension or metastasis has occurred. The extent of delay in diagnosis and treatment, in terms of time since recognizable symptoms or signs were present, is difficult if not impossible to determine accurately for the reason that statements made by patients as to date of onset of disease (first symptom or sign) are unreliable in a great many cases. Patients who present themselves in the early stages of disease are more likely to report the appearance of the first symptom or sign accurately. On the contrary, patients with far advanced disease are likely to understate the duration of disease.

The recorded durations of symptoms in a group of cases of *new* cases of cancer of the cervix uteri treated during 1946 are presented in Table 20. These data were taken directly from the "follow-up" cards and refer to the intervals between date of first recorded symptom or sign and the date of admission to the Centre for treatment. Intervals are to the *nearest* month and figures are given separately by stage of disease.

TABLE 20  
DURATION OF SYMPTOMS BY STAGE OF DISEASE  
TREATED CERVIX CASES\*

| STAGE          | Duration of Symptoms (months) |      |      |      |       |       |     |      | TOTAL |
|----------------|-------------------------------|------|------|------|-------|-------|-----|------|-------|

| TOTAL.....     | 23                            | 44   | 17   | 11   | 20    | 4     | 10  | 6    | 135   |
| PER CENT....   | 17.0                          | 32.6 | 12.6 | 8.1  | 14.8  | 3.0   | 7.4 | 4.4  | 100.0 |

\*Excluding recurrences, and ten cases for whom stage of disease was not stated.

Almost half of the cases had had symptoms for six months or longer before receiving treatment. Only 23 cases were admitted for treatment within three months of *recorded* onset. There is no evidence in these data of the expected relationship between stage of disease and delay in treatment. The reported long history, in Stage I cases particularly, is possibly open to question.

Another aspect of the problem of early treatment is that of delay following the first consultation of patients with a physician for symptoms or signs referable to cancer. Data on the recorded intervals between date of first consultation and admission to the Centre for treatment are given in Table 21. The cases included in this table are the same as those covered by Table 20.

TABLE 21  
TIME SINCE FIRST CONSULTATION BY STAGE OF DISEASE  
TREATED CERVIX CASES\*

| STAGE          | Time Since First Consultation (months) |      |     |      |      |       |     |      | TOTAL |
|----------------|--|------|-----|------|------|-------|-----|------|-------|
|                | < 1                                    | 1    | 2   | 3-5  | 6-11 | 12-23 | 24+ | N.S. |       |

| III.....       | 17                                     | 11   | 5   | 4    | 3    | —     | —   | 4    | 44    |
| IV.....        | 9                                      | 7    | 3   | 7    | 2    | 2     | 2   | 1    | 33    |
| Post-operative | —                                      | 1    | 2   | 2    | —    | —     | 1   | 1    | 7     |
| TOTAL.....     | 41                                     | 36   | 13  | 19   | 9    | 4     | 4   | 9    | 135   |
| PER CENT....   | 30.4                                   | 26.7 | 9.6 | 14.1 | 6.7  | 3.0   | 3.0 | 6.7  | 100.0 |

\*Excluding recurrences, and ten cases for whom stage of disease was not stated.

Approximately one-third of the 135 patients received treatment within one month of their first consultation and two-thirds of them received treatment before three months had elapsed. On the other hand, in eight cases treatment was not received until after one year had elapsed.

Considerably more data are required to afford a precise statistical appraisal of the delays which occur between the reported onset of disease, diagnosis and treatment. Such studies were interrupted by the War but are now to be resumed.

### *Trends in Volume of Treated Cases*

The present uniform system of record-keeping has been in operation in all seven Ontario Cancer Centres for nine full years, having been introduced in August, 1937. It is useful, therefore, to record the trend in case-volume during this period. A summary of the new cases treated, by site of disease, for the period 1938-1946 inclusive, is given in Table 22 for all Centres combined. Data for each Centre all sites combined, are given in Table 23.

These tables illustrate the steady increase in case-volume. The number of patients treated in 1946 was 58 per cent greater (1,230) than the number in 1938. Each of the specified site groups shows a substantial increase. Each of the seven Centres has contributed to the recorded increase in total number of new treated cases (Table 23). The ratios of the 1946 case-volume to that for 1938, for each Centre, are as follows: Hamilton, 1.61; Kingston, 1.40; London, 3.18; Ottawa Civic, 1.54; Ottawa General, 1.54; Toronto, 1.32; and Windsor, 2.06.
